ONTARIO ENERGY BOARD

IN THE MATTER of the *Ontario Energy Board Act 1998*, 1998, S.O. 1998, c.15 (Schedule B);

AND IN THE MATTER of an Application by Hydro One Networks Inc. for a deferral account related to an ongoing proceeding EB-2011-0140 to designate an electricity transmitter to undertake development work for the East-West Tie Line.

INTERROGATORIES

FROM THE

SCHOOL ENERGY COALITION

1. What is the Hydro One's materiality threshold for deferral account disposition?
2. With respect to the support costs for the OEB designation process:
 - a) How specifically does Hydro One propose to track non-incremental labour costs?
 - b) How will Hydro One determine when labour required is incremental?
 - c) What type of records will Hydro One be keeping so that prudence of these costs can be examined upon disposition?
 - d) Is the method Hydro One will use for tracking support costs, the same method that it is using for tracking and billing EWT LP for its use of Hydro One personal and other costs? If not, please explain the difference.
3. Hydro One states that will track costs from January 3, 2012. For each proposed sub-account, what is the total amount tracked so far.

Submitted by the School Energy Coalition on this 30th day of April, 2012.
