Neil McKay, Manager Natural Gas Applications Ontario Energy Board, Suite 2700, 2300 Yonge Street, Toronto, Ontario. M4P 1E4

RE: EB-2011-0040 Red Lake Project

Dear Sir:

This letter will update the Ontario Energy Board ("OEB") on Union Gas Limited ("Union") plans for Phase II of the Red Lake Project. This letter will also fulfill Conditions of Approval 1.1, 1.2, 1.5, 1.6, 1.7, 1.8 and 2.3 of the OEB's Leave to Construct Order regarding the project.

Union is proposing to commence construction of Phase II of the Red Lake Project on May 25, 2012. Phase II will provide distribution service to the residents of Red Lake. Union has worked with the Municipality of Red Lake in developing the detailed construction plans to serve the Municipality. Updated maps of the areas which Union is proposing to serve are attached as Appendix 1. These maps show some minor changes to the location of pipelines from Union's original pre filed evidence. There is one significant change in Union's construction plan from the pre filed evidence. Union is not proposing to construct a pipeline north from Cochenour. The purpose of that line was to provide service to a potential mine north of Cochenour which is still at the conceptual stage.

Union has completed an environmental review for Phase II, which is attached as Appendix 2. No significant environmental concerns were identified as part of this review. Union's standard construction practices and the mitigation measures outlined in the environmental checklist will ensure that there will be no long term significant environmental impacts as a result of pipeline construction.

Union has completed an economic analysis for Phase II as per the EBO 188 guidelines, which is attached as Appendix 3. This analysis was completed using the same input parameters as the Phase I analysis. This analysis is based on the project costs attached as Appendix 4, and an updated attachment forecast attached as Appendix 5. The attachment forecast has been updated based on discussions with Municipal officials who have provided Union with addition details regarding growth and conversion potential. Appendix 4 does not include the \$7M that was spent as part of Phase I to facilitate Phase II. The total Phase II costs are approximately \$19.3M.

Union has reviewed its rolling and investment portfolios and has determined that there will be no significant impact to Union's existing customers if Phase II of the Red Lake Project has a PI of 0.9. With a PI of 0.9 the economic analysis indicates that there is a \$10.5M aid to construct. In order to fund this aid to construct, the following contributions will be made:

- The Province of Ontario will contribute \$4.9M;
- FedNor is expected to contribute \$2.7M;
- The Municipality of Red Lake will contribute \$0.75M; and,
- Goldcorp Red Lake Mines will forgive \$2.15M of the payment they made to upsize Phase I of the project.

If you have any questions or require additional information please contact the undersigned.

Yours sincerely

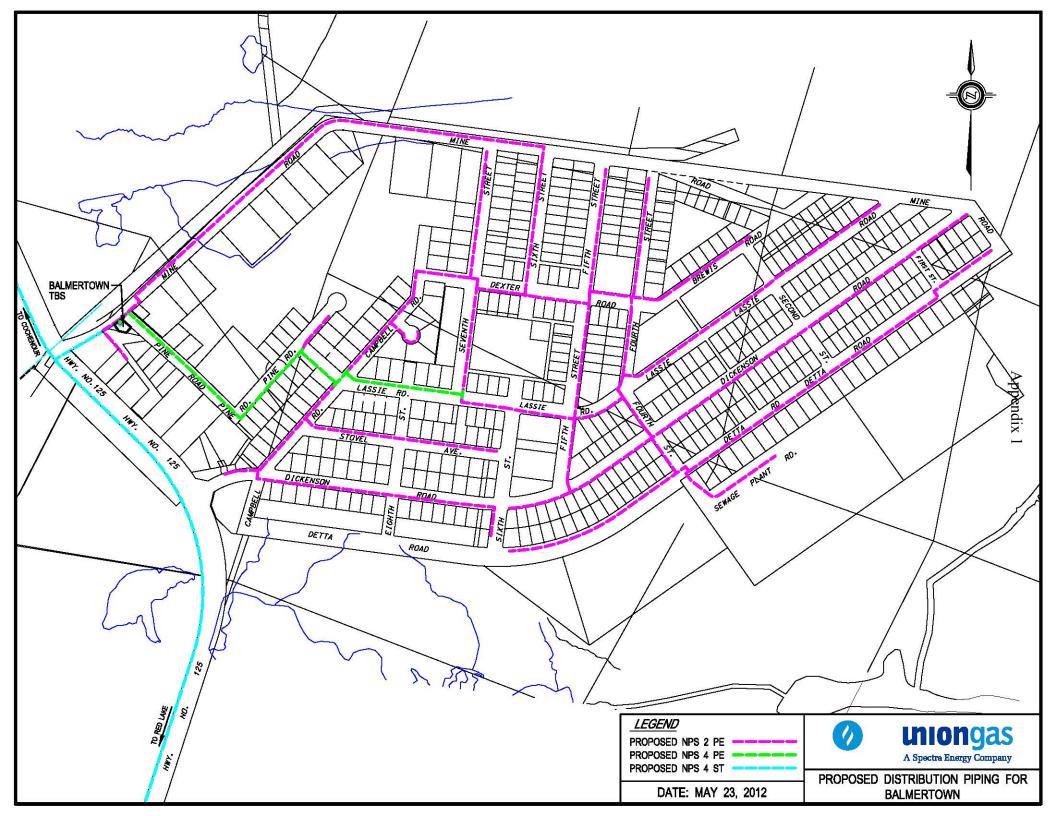

William Wachsmuth

#### **Environmental Checklist**

The Project Originator is responsible for reviewing and completing the following checklist to determine if the project should be forwarded to EH&S Planning for their review. When completing this form, please <u>ensure</u> that a Description of Feature is given and that the Proposed Mitigation is identified for those features marked YES in the Impacted column.

Project Name: Red Lake Pipeline Project Number:

Project Phase 2

Date: 2012-05-01

Project Originator: Peter Fantuz/Doug Schmidt

Project Description: The Red Lake Pipeline Project Phase 2 includes the construction and

installation of in town pipelines in the communities of Red Lake, Balmertown and Cochenour. Pipelines will be located within the municipal road allowance and will range in size from 2" to 4". Construction is proposed to commence in spring 2012.

Feature and Description	Impacted Yes/No	Proposed Mitigation
Water Course Crossings Description: Crossings see attached drawings for locations There will be seven (7) watercourse crossings associated with Phase 2 of the Red Lake Pipeline Project.  Six (6) are located within the community of Red Lake and one (1) is located in the Chukuni Subdivision.  An Environmental Protection Area (ESA) - Locally Significant Wetland will be crossed in two separate areas in the community of Red Lake.	Yes	See sections 3.44 and 3.45 C&M Manual for mitigation. Adhere to SCR and permit requirements  Watercourse crossings will be completed by either installing the pipe over top the watercourse in cover associated with an existing bridge or culvert, Horizontal Directional Drill (HDD) or Dam & Pump.  For HDD and Dam & Pump installations, Department of Fisheries and Oceans DFO-OGLA/UGL AGREEMENT 2008 will be adhered to.  Impacts to the ESA will be minimized or avoided by installing the pipeline within the road allowance and installation will be completed by one of the methods identified above.  For additonal information and mitigation refer to the Red Lake Environmental Protection Plan, Section 7.1 General Environmental Features - Watercourse Crossings, Environmental Protection Area and Appendix 4 (associated drawings).  Any permits required will be obtained prior to construction.
Social Impacts Description: Construction in road allowance Potential impacts associated with construction noise, dust, traffic, acess to homes and businesses etc.	Yes	See sections 18.7 and 18.8 of the C&M manual for mitigation  For additional information and mitigation refer to the Red Lake Environmental Protection Plan, Section 7.1, General Environmental Features - Water Wells, Blasting and Table 1 Pipeline Construction Mitigation Summary in Appendix 2.
Land use Designations Description: Three Hazard Land Areas	Yes	Pipelines will be located within the road allowance and will avoid hazard areas.

#### Appendix 2

Agricultural Resources Description:	No	See sections 3.46 and 3.25 C&M Manual for mitigation
Vegetation and Wildlife Habitat Description: Potential for minor amount of shrub/vegetation removal.	Yes	Removal of vegetation is limited. Cover to be restored through seeding as soon as practical.
Water Wells and Hydrology Description: Water Wells	No	Impacts are not anticipated as the communities of Red Lake, Balmertown and Cochenour are serviced by a municipal source.
Heritage Resources Description: Archaeology	No	Construction to remain in disturbed portions of the road allowance.
Geological Resources and Minerals Description: Rock Outcrops	Yes	Blasting will follow Union's standard blasting procedure during construction.  For additional details refer to the Red Lake Environmental Protection Plan, Section 7.1, General Environmental Features - Blasting.
Additional Concerns Description:	No
