Brantford Power understands that an open energy market can raise questions and concerns. We're here to provide the answers you need to make the best energy decisions for your home and business.

Generating Electricity
If you are exploring generating your own green energy (solar, wind, water or biomass), and selling it to the electricity grid, this section will provide information and explain the process, requirements and options for connecting generation facilities to Brantford Power's distribution system.

TIME-OF-USE PRICING

Time-of-Use prices vary over the day to better reflect the way electricity prices fluctuate. Depending on demand and the availability of supply, the price of electricity tends to rise and fall over the day and drop overnight. Click here for more information, plus energy shifting and saving tips.
