

May 28, 2012

Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
2300 Yonge Street
26th Floor, Box 2319
Toronto, ON M4P 1E4

Dear Ms. Walli

**Re: PowerStream Inc. (Licence ED-2004- 0420)
2013 Electricity Distribution Rates Application EB-2012- 0161**

We are in receipt of the Board's May 18, 2012 letter that acknowledged receipt of PowerStream's 2013 cost of service application on May 4, 2012 and that also sought some additional information.

Please find enclosed two (2) paper copies and a CD containing the requested information in PDF format, along with electronic copies as applicable. Please note also that this information has been filed through the Board's Regulatory Electronic Submission System (RESS).

Please note the explanations below, in response to the Board's letter.

1. Missing Appendices to Filing Requirements:

Three Filing Requirement Appendices are missing (2-A "Capital Projects," 2-L "Shared Services/Corporate Cost Allocation", and 2-S "Embedded Distributor Low Voltage Rate", required since PowerStream is embedded to Hydro One).

Response:

Appendix 2-A "Capital Projects" – PowerStream filed this appendix with a reference to written evidence since Section 2.5.2.1 of the Filing Requirements indicates that Appendix 2-A is "one suggested format for filing this material". In order to comply with the Board's May 18, 2012 letter, however, the appendix has been completed for the 2011 historic, 2012 bridge and 2013 test years. The impact of the PowerStream – Barrie Hydro merger on financial reporting makes presenting this information for prior years impossible. Presentation by fixed asset account is not how PowerStream manages its

capital spending and this information has only been added to the capital budget in recent years. Appendix 2-A is part of Appendix 1, Schedule 21.

Appendix 2-L "Shared Services/Corporate Cost Allocation" - PowerStream filed this appendix with a reference to written evidence that describes in detail certain services that are provided to the City of Vaughan, the Town of Markham and the Town of Bradford West Gwillumbury. Note that as described in Section 2.7.5 of the Filing Guidelines, none of PowerStream's three Shareholders are affiliates nor are there any affiliates that are subsidiaries of PowerStream. PowerStream does not have a holding company structure so there are no cost allocations from a parent company to a utility. In order to comply with the Board's request, Appendix 2-L has been completed for the three entities noted above and for PowerStream Solar. Appendix 2-L is part of Appendix 1, Schedule 21.

Appendix 2-S: "Embedded Distributor Low Voltage Rate" – PowerStream filed this appendix with a note that PowerStream has no embedded distributors. PowerStream confirms that it does not have any embedded distributors. PowerStream has some embedded supply points with Hydro One Networks Inc. (HONI). In some of these situations, PowerStream is charged for use of HONI low voltage assets for supplying power to PowerStream's distribution system.

Appendix 2-S, as provided by the OEB, appears designed to calculate a low voltage charge to an embedded distributor based on the use of a distributor's assets. As explained above, PowerStream does not have embedded distributors and is not proposing low voltage charges based on use of its assets. PowerStream is only proposing to recover the low voltage charges from HONI.

PowerStream has estimated the 2013 low voltage charges from HONI as \$2,731,456 as explained in the Exhibit H, Tab 3, Schedule 1. PowerStream has included the calculation of the HONI low voltage charges for 2013 as a replacement for Appendix 2-S. Appendix 2-S is part of Appendix 1, Schedule 21

- 2. Deferred PILs (acc. 1562):** *The application does not include Excel versions of some models and worksheets, specifically the Board-approved PILs proxy models for 2001, 2002 and 2005, RAM models for 2002, 2004 and 2005, continuity schedules for 2001 to 2012 and PILs recovery worksheets for 2002 to 2006.*

Response:

Paper copies of most of the PILs information requested were provided in PowerStream's May 4, 2012 application. Excel models have been provided and are part of Appendix 5. Note that due to the previous mergers and the considerable passage of time, information is not available in electronic form in limited cases. PILs recovery worksheets have been added to Appendix 5 as schedules 15-31 to 15-35. The Excel files of the Board-approved PILs proxy models for 2001, 2002 and 2005, RAM models for 2002, 2004 and

2005, continuity schedules for 2001 to 2012 and PILs recovery worksheets for 2002 to 2006 have been submitted through RESS.

- 3. Pro-forma Financial Statements:** *Page 16 of the Filing Requirements states that Pro-Forma Financial Statements for the Bridge and Test Years should be provided. PowerStream has provided in Appendix 1, Schedules 17 and 18 of the application only Pro-Forma Income Statements for the Bridge and Test Years containing very broad categories (e.g. "Expenses" with no further breakdown). There are no Pro-Forma Balance Sheets or Cash Flow statements provided.*

Response:

PowerStream has a financial model that is used to prepare high level pro-forma financial statements. PowerStream does not have the capability to prepare detailed pro-forma statements. Pro-forma consolidated statements are not prepared as part of the annual budget and financial planning process. Pro-forma income statements were filed on May 4, 2012. In response to the Board's May 18, 2102 request, PowerStream has provided pro forma balance sheets and cash flow statements. These are in Appendix 1, Schedule 17 and 18.

- 4. PowerStream Solar (Distributor owned generation facility):** *Page 12 of the Filing Requirements states that when such a facility is owned and operated as part of a distributor's business, as is the case for PowerStream:*

"the distributor would need to file financial information in its rate application that clearly delineates the distributor's regulated activities from its non-rate regulated as outlined in the Guidelines. For greater clarity, the distributor would need to file financial information for the consolidated utility, and individual statements for rate regulated activities and non-rate regulated activities on a pro-forma basis for the test period. By individual statements, the Board intends that separate financial information should be filed, not separate audited financial statements."

As is the case with the total business pro-formas, PowerStream has only filed pro-forma income statements for PowerStream Solar, but no balance sheets or cashflow statements. In addition, PowerStream has not included individual statements for rate regulated activities and non-rate regulated activities on a pro-forma basis.

Response:

As noted in the response to item #4 above, PowerStream has provided pro forma balance sheets and cash flow statements for PowerStream Solar. These are in Appendix 1, Schedule 17 and 18

- 5. Specific Service Charges:** Page 42 of the *Filing Requirements* states that if a distributor is proposing either a new specific service charge, or a change to the level of an existing charge, it should describe the purpose of the charge and provide calculations supporting the determination of the charge as outlined in the *Filing Requirements*. PowerStream is proposing certain new charges without including the required calculations supporting the determination of these charges. These charges are: (1) new specific service charges for "Disconnect/Reconnect at meter during/after regular hours" to be used in the cases of vacant rental properties with no active account, which are proposed to be equal to the default charges "Disconnect/Reconnect at meter during/after Regular Hours" in the cases of non-payment and (2) new specific charges for "Install/Remove load control devices during/after regular hours to be used in cases when a load control device is installed during the winter time instead of disconnecting the service.

Response:

As discussed in PowerStream's Exhibit C2, Tab1, Schedules 1 and 2, both of the proposed new specific service charges are set at the Board's standard amounts and are identical to the existing standard service charges.

For the "Disconnect/Reconnect at meter during/after regular hours" charge for vacant rental properties, the service provided is exactly the same as is in the case of the standard charge "Disconnect/Reconnect at meter during/after Regular Hours", therefore the charge is exactly the same. The only reason to introduce a new charge is that a current definition of existing charge assumes that current charges is to be applied in the cases of non-payment only (2006 EDR Handbook, Chapter 11, p.109) and does not address the situation with the vacant properties.

As discussed in Exhibit C2, Tab 1, Schedule 2 of the written evidence, "Install/Remove load control devices during/after regular hours", involves the same time and effort to perform this activity as the existing Disconnect/Reconnect process, therefore the fee for this activity is proposed to be equal to the established standard service charge for those activities (\$65 during regular hours/\$185 for after hours). This is consistent with the provisions of *Distribution System Code* (Section 2.9, added on July 1, 2011), which considers installation of load control devices be an activity equivalent to disconnecting supply. Consequently, PowerStream does not consider this charge as unique and proposes to use the established standard charge.

6. Miscellaneous:

- i. *The application does not include a statement as to which publication(s) the applicant proposes that notice should appear, whether it is a paid publication or not and the readership and circulation numbers as required on page 14 of the Filing Requirements.*

Response:

PowerStream has added a statement regarding the publishing notices in Exhibit J, Miscellaneous Updates.

- ii. *The application does not include a statement as to whether or not the distributor has had any transmission assets (>50kV) deemed previously by the Board as distribution assets and whether or not there are any such assets for which the distributor is seeking Board approval to be deemed as distribution assets in the present application as is specified on pages 14 and 15 of the Filing Requirements.*

Response:

PowerStream has added a statement regarding transmission assets deemed previously by the Board as distribution assets in Exhibit J, Miscellaneous Updates

- iii. *The application does not include a Proposed Issues List as is specified on page 15 of the Filing Requirements.*

Response:

A draft issues list has been included in Appendix 1, Schedule 2.

- iv. *It is unclear whether or not the acquisition of the 50% interest in Collingwood Utility Services has been included in the application, and, if so, on what basis.*

Response:

The acquisition of 50% interest in Collingwood Utility Services (COLLUS) is currently in the Mergers, Acquisitions, Amalgamations and Divestitures (MAADs) review process by the OEB and has not yet been approved. This rate application has been prepared without any consideration of the purchase of a 50% interest in COLLUS. This update has been added to Exhibit D1, Tab 1, Schedule 3.

- v. *The application does not include a statement as to when the forecast on which it was based was prepared and when it was approved by the utility's management and/or Board of Directors for use in the application as is specified on page 8 of the Filing Requirements*

Response:

The forecast that underpins the rate application was developed in 2011 and was approved by PowerStream's Board of Directors on December 14, 2011. This information has been added to Exhibit J.

We trust that this additional information is satisfactory, but if there is any further information required, please contact the undersigned.

Yours truly,

Original signed by

Colin Macdonald
Vice President, Rates and Regulatory Affairs

1 **MERGERS AND ACQUISITIONS**

2 PowerStream's corporate strategy includes an initiative to grow through mergers and
3 acquisitions. PowerStream was in fact created on June 1, 2004 by the amalgamation of Hydro
4 Vaughan Distribution Inc. ("Hydro Vaughan"), Markham Hydro Distribution Inc. ("Markham
5 Hydro"), and Richmond Hill Hydro Inc. ("Richmond Hill Hydro"). PowerStream completed the
6 acquisition of Aurora Hydro Connections Limited ("Aurora Hydro") on November 1, 2005 thus
7 adding a fourth municipality to the service territory.

8 In 2009 PowerStream merged with Barrie Hydro Distribution Inc. ("Barrie Hydro"). Prior to this
9 merger, Barrie Hydro had acquired four smaller distributors in Simcoe County. PowerStream-
10 Barrie Hydro made PowerStream the second largest municipally owned distribution utility in the
11 province of Ontario.

12 In 2011 PowerStream formed a strategic partnership with the Town of Collingwood, pending
13 regulatory approval.

14 **PowerStream – Barrie Hydro Merger**

15 Negotiations between PowerStream and Barrie Hydro began in 2008 and the public was
16 advised of the pending merger through news releases, advertisements, council meetings and
17 public consultation sessions.

18 Following the approval of the merger application by the Ontario Energy Board ("OEB") on
19 December 15, 2008, PowerStream Inc. and Barrie Hydro Distribution Inc. merged effective
20 January 1, 2009 to become the second largest, municipally owned Local Distribution Company
21 ("LDC") in Ontario. The new entity was jointly owned by the City of Barrie, the Town of
22 Markham and the City of Vaughan through their respective holding companies.

23 The synergies realized through combining the two LDCs and achieving economies of scale
24 were expected to result in operating savings of between \$5.0 and \$5.5 million annually with \$0.4
25 million in annual capital savings. Merger transition costs (i.e. the one time costs to integrate the
26 two utilities) were estimated to be the equivalent of approximately one year's projected savings.

- 1 The merger transition was managed in a planned and controlled manner under which customer
2 service, employee relations and health and safety were of the utmost priority. A “best practice”
3 business process philosophy was adopted whereby the best practices of Barrie Hydro or
4 PowerStream were adopted, or in some cases a better alternative was adopted.
- 5 PowerStream and Barrie Hydro established a joint merger integration structure which included
6 oversight by the Board of Directors, the Executive Management Team (“EMT”), and a Merger
7 Integration Team (“MIT”) with sub-committees established to execute specific integration plans.
8 Highlights of the integration included:
- 9 • Creation of a new Vision, Mission, and Values;
10 • Barrie Hydro was integrated with PowerStream’s Enterprise Resource Planning System
11 (JD Edwards financial, payroll and procurement system) on target in May 2009;
12 • PowerStream began to provide control room operations during business and after hours
13 for the former Barrie Hydro. The integration of the “Avalanche” system allowed the
14 control room to take after hour’s calls in the north service territory (former Barrie Hydro
15 territory), enhancing customer service for the former Barrie Hydro customers;
16 • The Customer Information System (“CIS”) conversion was completed according to plan
17 in November 2009. Billing activity was harmonized ahead of schedule. This was a
18 significant achievement lead by a cross functional transition team consisting primarily of
19 customer service and information services staff;
20 • Negotiation of a transitional agreement and a three year Collective Agreement with the
21 bargaining unit, consolidating three collective agreements into one;
22 • Implementation of revised position profiles and a management compensation structure;
23 • Integration of all Human Resources and Health and Safety policies;
24 • Implementation of a co-branding strategy to assist customers with the transition;
25 • Integration of the phones, email, internet and intranet sites;.
26 • Installation of a fibre network to link the north and south service areas enabling local
27 voice and data connectivity; and.

- Creation of a “Champions of Change” team to demonstrate, influence and promote a positive culture for the new company.

3 The financial results of the merger were tracked and reported to the EMT, the Board of Directors
4 and the Shareholders.

5 After effectively completing the merger, a review of the transition showed that the actually
6 merger savings were \$6.2 million, slightly higher than the \$5.0 to \$5.5 million range expected
7 and noted above.

8 Similarly, annual capital savings of \$0.8 million were achieved, an improvement to the \$0.4
9 million anticipated. The one time capital savings were estimated at \$0.6 million and the actual
10 savings achieved was \$1.8 million.

11 Transitions costs estimated at \$4.6 million were slightly higher at \$5.2 million.

12 Each year it becomes increasing difficult to precisely analyze the merger savings due to organic
13 growth and the impact of government, regulatory and other changes to the business. In order to
14 complete our analysis of the merger savings we reviewed the savings we projected to achieve
15 in 2011 and beyond that were considered "ongoing". We determined that the estimated amount
16 of ongoing savings of at least \$5 to \$5.5 million will be \$5.8 million for 2011 and will continue
17 into the future and as such the expected merger savings will have been achieved.

18 The Director of Enterprise Risk and Internal Audit reviewed the 2010 synergy savings and
19 transition costs and also reviewed the net estimated savings for 2011 and beyond and has
20 determined that the assumptions and amounts are reasonable.

21 Collingwood – PowerStream Strategic Partnership

22 In January 2011 the Town of Collingwood (“Collingwood”) and PowerStream announced their
23 intention to form a strategic partnership, subject to OEB approval. PowerStream was selected
24 by Collingwood through a competitive bid process.

- 1 Collingwood intends to sell 50% of the shares of Collingwood Utility Services Corp., the holding
2 company for Collus Power Inc., Collus Solutions Corp. and Collus Energy Corp. to
3 PowerStream. PowerStream is purchasing the 50% of the shares for \$8.0 million.
- 4 Collus Power Inc., the distribution company, serves 15,860 customers (as of December 31,
5 2011) in Collingwood, Thornbury, Stayner and Creemore. Collus Solutions Corp. provides
6 services to Collus Power Inc. Collus Energy Corp. is dormant.
- 7 On March 9, 2012 Collingwood Utility Services Corp. applied to the OEB for approval of the
8 transaction (EB-2012-0056).
- 9 The Collus transaction has not been considered in PowerStream's 2013 cost of service rate
10 application.

1 **MISCELLANEOUS UPDATES**

2 In a May 18, 2012 letter, the Board asked PowerStream to add certain statements to clarify the
3 application. These are noted below.

4 ***Publication of Notice***

5 Upon receipt of the Letter of Direction from the Board, with the Notice of Application and
6 Hearing, PowerStream will arrange to have the Notice of Application and Hearing posted in a
7 newspaper which has the highest paid circulation in PowerStream's service area, in order to
8 reach the greatest number of customers. This will be done in accordance with the schedule
9 established by the Board

10

11 The Notice of Application and Hearing will appear in the following newspapers:

12

- 13 • The Toronto Star zoned newspaper (paid subscription) for Thursday with an estimated
14 circulation of 87,687 and estimated readership of 275,516 or for Saturday with an estimated
15 circulation of 112,970 and estimated readership of 326,674 ;
16 • The Barrie Examiner (paid and unpaid subscription) with an estimated circulation of 54,743;
17 and
18 • Le Gout de Vivre (paid subscription) with an estimated circulation of 1,000.

19

20 Once the Notice of Application and Hearing has been published in the above listed newspapers,
21 PowerStream will file immediately an Affidavit of Publication with proof, and as directed and
22 approved by the Board.

23

24 ***Transmission Assets Deemed as Distribution Assets***

25 PowerStream owns a number of Transformer Stations supplied at 230kV and therefore has
26 transmission assets. The Board has previously deemed these assets as distribution assets.
27 This application seeks approval to have such assets become part of PowerStream's rate base.

28

1 ***Approval of Forecast Underpinning Application***

2 The forecast underpinning the 2013 cost of service rate application was prepared in 2011 and
3 was approved by PowerStream's Board of Directors on December 14, 2011.

4

5

6

1 **DRAFT ISSUES LIST**

2 **1. Rate Base (Exhibit B)**

- 3 1.1 Is the proposed Rate Base for Test Year 2013 appropriate? (B1)
4 1.2 Is the Working Capital Allowance for Test Year 2013 appropriate? (B3)
5 1.3 Are the proposed Capital Expenditures forecast for Test Year 2013 appropriate? (B1)

6

7 **2. Operating Revenue (Exhibit C)**

- 8 2.1 Is the proposed forecast of 2013 Test Year Throughout Revenue appropriate? (C1)
9 2.2 Are the proposed customers/connections and load forecasts (both kWh and kW) for Test
10 Year 2013 appropriate, including the impact of CDM and weather normalization? (C1)
11 2.3 Is the proposed forecast of Test Year 2013 revenues from other regulated rates and
12 charges appropriate? (C2)

13

14 **3. Operating Costs (Exhibit D)**

- 15 3.1 Is the overall Test Year 2013 OM&A forecast appropriate? (D1)
16 3.2 Is the proposed level of the Depreciation/Amortization expense for 2013 appropriate? (D1)
17 3.3 Is the Test Year 2013 forecast of PILs appropriate? (D2)

18

19 **4. Deferral and Variance Accounts (Exhibits I)**

- 20 4.1 Is the proposed clearance of deferral and variance account balances appropriate?
21 4.2 Are the proposed new deferral and variance accounts for the test year appropriate?

22

23 **5. Cost of Capital (Exhibit E)**

- 24 5.1 Are the proposed Test Year cost of capital parameters appropriate?

25

26 **7. Cost Allocation (Exhibit G)**

- 27 7.1 Are the revenue to cost ratios in the cost allocation for Test Year 2013 appropriate?

28

29 **8. Modified International Financial Reporting System (Exhibit F)**

- 30 8.1 Is the proposed service revenue requirement calculated using modified IFRS appropriate?

31

1

2 **9. Rate Design (Exhibits H)**

- 3 9.1 Is the full schedule of rates as proposed appropriate?
4 9.2 Is the derivation of the proposed base distribution rates appropriate?
5 9.3 Are the proposed changes to LV rates appropriate?
6 9.4 Are the proposed Distribution Loss Factors appropriate?

Appendix 2-L Shared Services/Corporate Cost Allocation

Year: 2009

Name of Company		Service Offered	Pricing Methodology	Price for the Service	Cost for the Service	Percentage Allocation
From	To			\$	\$	%
City of Vaughan	PowerStream	Leased facilities	Fully allocated costs w. markup		731,882	
City of Vaughan	PowerStream	Software Maintenance	Fully allocated costs w. markup		37,740	
PowerStream	City of Vaughan	Water and sewer	Fully allocated costs w. markup (WACC)	1,414,367		
PowerStream	City of Vaughan	Payroll	Fully allocated costs w. markup (WACC)	266,091		
PowerStream	City of Vaughan	Cashier	Fully allocated costs w. markup (WACC)	235,965		
Town of Markham	PowerStream	Cashier	Fully allocated costs w. markup		81,930	
PowerStream	Town of Markham	Water and sewer	Fully allocated costs w. markup (WACC)	1,401,200		
PowerStream	Town of Markham	Street Lighting	Fully allocated costs w. markup (WACC)	965,340		
PowerStream	Bradford West Gwillimbury	Water and sewer	Fully allocated costs w. markup (WACC)	265,000		

Year: 2010

Name of Company		Service Offered	Pricing Methodology	Price for the Service	Cost for the Service	Percentage Allocation
From	To			\$	\$	%
City of Vaughan	PowerStream	Leased facilities	Fully allocated costs w. markup		286,565	
City of Vaughan	PowerStream	Software Maintenance	Fully allocated costs w. markup		38,495	
PowerStream	City of Vaughan	Water and sewer	Fully allocated costs w. markup (WACC)	1,439,592		
PowerStream	City of Vaughan	Payroll	Fully allocated costs w. markup (WACC)	272,253		
PowerStream	City of Vaughan	Cashier	Fully allocated costs w. markup (WACC)	240,972		
Town of Markham	PowerStream	Cashier	Fully allocated costs w. markup		84,388	
PowerStream	Town of Markham	Water and sewer	Fully allocated costs w. markup (WACC)	1,426,190		
PowerStream	Town of Markham	Street Lighting	Fully allocated costs w. markup (WACC)	1,041,443		
PowerStream	Bradford West Gwillimbury	Water and sewer	Fully allocated costs w. markup (WACC)	155,000		
PowerStream	PowerStream Solar	Executive support	Allocated based on the % time spent	183,180		
PowerStream	PowerStream Solar	Legal Support	Allocated based on the % time spent	16,800		
PowerStream	PowerStream Solar	Human Resources	Allocated based on the % time spent	7,140		
PowerStream	PowerStream Solar	Corporate Finance	Allocated based on the % time spent	39,900		
PowerStream	PowerStream Solar	Accounting and Payroll	Allocated based on the % time spent / transactions count	8,960		
PowerStream	PowerStream Solar	Financial Services	Allocated based on the % time spent	4,836		
PowerStream	PowerStream Solar	Rates and Regulatory Affairs	Allocated based on the % time spent	7,420		
PowerStream	PowerStream Solar	IT Services	Allocated based on headcount	66,571		
PowerStream	PowerStream Solar	Facilities	Allocated based on sq. footage	25,730		
PowerStream	PowerStream Solar	Purchasing	Allocated based on the % time spent	6,370		
PowerStream	PowerStream Solar	Office supplies	Allocated based on headcount	1,190		

Year: 2011

Name of Company		Service Offered	Pricing Methodology	Price for the Service	Cost for the Service	Percentage Allocation
From	To			\$	\$	%
City of Vaughan	PowerStream	Leased facilities	Fully allocated costs w. markup		133,149	
City of Vaughan	PowerStream	Software Maintenance	Fully allocated costs w. markup		39,650

January 1, 2006 to April 30, 2006	\$ 310,095	\$ 310,095	\$ -	1	\$ 298,495
Total	\$ 4,398,773	\$ 4,398,773	\$ -		\$ 4,097,703

NOTES

1. Aurora analyzed the revenue & billing statistics and used the PILs rate adders to calculate the amount of PILs billed.
 The "Estimated Proof" sheet was used to calculate and book these amounts so there is no difference.
 This was done annually for 2002 and 2003 and the average monthly amounts entered into the account 1562 continuity schedule.
 Starting in 2004, the PILs amounts were calculated and booked monthly. These actual amounts are entered into the 1562 continuity.
 The above Booked amounts were entered into the Aurora Account 1562 continuity schedule up to April 30, 2006.
 After April 30, 2006, an additional \$100,966 was billed and included in the PowerStream 1562 continuity schedule.

2. Estimate based on PILs proxy and number of months.

		10 months Mar- Dec 2002	3 months Jan - Mar 2004	
2001 PILs Proxy	\$ 247,999			
2002 PILs Proxy	\$ 846,788			
Total in 2002 Rates	\$ 1,094,787	\$ 912,323	\$ 273,697	
		9 months Apr - Dec 2004	3 months Jan - Mar 2005	
2004 PILs Proxy	\$ 846,788	\$ 635,091	\$ 211,697	
		9 months Apr - Dec 2004	4 Months Jan- Apr 2006	
2005 PILs Proxy	\$ 895,485	\$ 908,788	\$ 671,614	\$ 298,495

PowerStream Inc.
Account 1562 - PILs Billed
Markham Hydro

	Actual Billed & Booked	Estimated "Proof"	Difference	Note	Estimated based on PILs Proxy (note 2)
March 1, 2002 to December 31, 2002	\$ 5,910,976	\$ 5,844,500	\$ 66,476	1	\$ 5,604,955
January 1, 2003 to December 31, 2003	\$ 7,110,030	\$ 7,074,465	\$ 35,565	1	\$ 6,725,946
January 1, 2004 to May 31, 2004	\$ 2,669,933	\$ 2,613,156	\$ 56,777	1	\$ 2,547,149
Total	\$ 15,690,939	\$ 15,532,121	\$ 158,818	1	\$ 14,878,050

NOTES

1. Markham Hydro billing was set up with separate billing codes to capture the PILs billed and credit these amounts directly to account 1562.

The estimated proof sheet takes the actual billed kWhs/kWs and customer counts on an annual basis to calculate the estimated PILs billing amounts as a check on the actual billings posted to account 1562.

This involved some estimation regarding customer numbers each month and the allocation of kWhs billed to Residential and GS<50 kW classes. The billed amounts are based on actual customer numbers, number of days and actual kWhs/kWs billed.

For each period shown above, the average monthly amount was determined, as shown on the right, and entered into each month in the account 1562 continuity schedule.

2. Estimate based on PILs Proxy and number of months:

	Mar - Dec 2002	Jan - Mar 2004
	10 Months	3 months
2001 PILs Proxy	\$ 1,531,970	
2002 PILs Proxy	\$ 5,193,976	
Total PILs Proxy in 2002 Rates	<u>\$ 6,725,946</u>	\$ 5,604,955 \$ 1,681,487
		Apr- May 2004
		2 months
2004 PILs Proxy	\$ 5,193,976	<u>\$ 865,663</u> <u>\$ 2,547,149</u>

Total	\$ 10,972,281	\$ 10,446,346	\$ 525,935		10,249,634

NOTES

The above Booked amounts were entered into the Richmond Hill Account 1562 continuity schedule up to May 31, 2004.

For 2002 and 2003, Richmond Hill Hydro did not separate the PILs amount from Distribution revenue when billing.

At year end the distribution revenue was analyzed and the amount of PILs included was transferred to account 1562. In the account 1562 continuity schedule, the total for the year was divided by the number of months to determine the average monthly billing amount and this amount was entered into each month.

Starting 2004, Richmond Hill Hydro billing was set up with separate billing codes to capture the PILs billed and credit these amounts directly to account 1562.

The estimated proof sheet takes the actual billed kWhs/kWs and customer counts on an annual basis to calculate the estimated PILs billing amounts as a check on the actual billings posted to account 1562.

This involves some estimation regarding customer numbers each month and the allocation of kWhs billed to Residential and GS<50 kW classes. The billed amounts are based on actual customer numbers, number of days and actual kWhs or kWs billed. Amounts billed and booked appear reasonable.

1. The average monthly amount of \$335,353 was entered in the account 1562 continuity schedule for March to December 2002.
2. The average monthly amount of \$428,251 was entered in the account 1562 continuity schedule for January to December 2003.
3. The average monthly amount of \$495,949 was entered in the account 1562 continuity schedule for January to May 2004.
4. Estimated based on PILs proxy and number of months.

Notes:

Average Customer Count for period used each month
 Total kWhs/kWs for period allocated to months arbitrarily based on higher usage in winter months.
 April billings assumed to be mainly at 2002 rates. May billings mainly at 2004 rates which were effective April 1, 2004.

NOTES

1. Hydro Vaughan used billing determinants from revenue analysis and PILs rate adders to calculate the amount of PILs billed. There are slight differences for 2002 and 2003 due to rounding. Totals for each "year" were divided by number of months and the average monthly amount was entered into the account 1562 Continuity Schedule.
2. The months of April and May 2004 were estimated - actual calculation including May 31, 2004 unbilled accrual is slightly higher.
3. Estimated based on PILs Proxy and Number of Months

NOTES

- i) PowerStream's billing system allowed the PILs amounts to be set up as a separate billing code so that these amounts were directly recorded in account 1562. These amounts are calculated based on the actual number of customers billed, number of month periods, actual kWhs/kWs, all billed at the applicable rate when the billing period spans a rate change. The Estimated "Proof" is based on annual billing statistics and provides an estimate as a reasonableness check on the billed amount.
 - ii) Aurora billed PILs amounts were recorded separately up to April 30, 2006, in the Aurora account 1562 continuity schedule (CS). See the separate account 1562 CS sheets and PILs Billed worksheets for details. Balances from the Aurora account 1562 CS were transferred to the PowerStream account 1562 continuity schedule as of May 1, 2006. Billings subsequent to April 30, 2006 are recorded in PowerStream.
 - iii) Billed PILs amounts for Markham Hydro, Richmond Hill Hydro and Hydro Vaughan (MRV) were recorded separately up to May 31, 2004. See the separate account 1562 CS sheets and PILs Billed worksheets for details. Balances from the MRV account 1562 CS were transferred to the PowerStream account 1562 continuity schedule as of June 1, 2004.
1. Total billed for June to December 31, 2004 was divided by 7 to get an average monthly amount of \$1,310,838, which was entered in the account 1562 Continuity Schedule for those months.
 2. Actual monthly amounts billed from general ledger have been entered into the account 1562 Continuity Schedule.
 3. Estimated PILs billed based on PILs proxy and number of months billed.
