ONTARIO ENERGY BOARD

Ontario Energy Board

P.O.Box 2319 27th Floor

2300 Yonge Street

Toronto, ON M4P 1E4

Attention: Board Secretary.

Subject: File No. EB-2012-0112.

I would like to state that I am not in favour of any rate changes, until such a time as there has been an independent audit completed of the operating costs of this utility, and a professional review of what cost reductions have been implemented since the last rate increase in order to justify any rate increase. Assuming there are no changes to the normal daily usage, there is bound to be an increase in revenue as a result of the new time of use price periods.

Too often today, we hear of rate increases without complete justification. Rate increases have to be extremely carefully reviewed, and where staffing is held to a minimum. Simply put; there are too many fat cats out there who assume that the government control agencies will rubber stamp the rate increases proposed by these utilities, and we, the public, require every assurance that these audits are completed by an independent organization.

I would appreciate receiving a copy of any approvals given for this application.

Yours truly,

Marvin Riegle.
