Subject: EB-2012-0176 request for delivery charges from Westario Power Inc.

To whom it may concern:

This morning, I was sitting reading my Hanover Post at breakfast. I came across a letter in the paper from Westario Power, stating they are applying to have permission to change the delivery charges to everyone's billing starting in May 2013. This completely sickened me. This basically means from the averages they were stating in the paper that most people use, that everyone's bills will be going up about an extra \$10/month. This is ridiculous. Back earlier in the spring, when I called my local MPP's office (Lisa Thompson), I was talking with her secretary, and she stated that soon our electricity bills will be the highest in ALL of North America thanks to the "Time of Use" pricing the province has recently stipulated into being for everyone. With the way that our electricity prices keep going up every May and November, she basically assured me I better hold onto my hat in the next 2 or so years, because it was going to be getting a lot worse, and that again, soon we would be paying the highest rates in all of North America, because of all of these new things being put into place. Does this not concern anyone else?? Don't we already have how many people who can barely afford to pay their regular bills, let alone any adds on?? Why is this even being considered to be approved that the delivery charges are being up'ed in price? Why has Dalton McGuinty been allowed to extend the debt retirement charge into 2016 "because he likes the extra revenue it brings in", even though the debt retirement charge was paid off last spring, which was also confirmed to me via Lisa Thompson's secretary. This is just plain out wrong in so many ways that this is even being allowed on behalf of Westario that this petition to increase prices AGAIN is even being allowed. What is it going to take to have everyone's eyes opened up, that this is not going to help anyone, only the people who are getting the money. Seriously, people are not going to be able to even afford to live soon. This is a problem. Something needs to be changed.
