Subject: EB-2012-0442 observer status request

Hello, I, Jeff Allan would like to request observer status of the hearing of Varna Wind at the Ontario Energy Board, EB-2012-0442. As an affected landowner along the proposed Cenntennial Rd transmission line route who has had very limited results over the past 14 months negotiating the easement agreement with the holding company of Varna Wind who is presenting themselves as the holding company for the proposed transmission facilities. It will be interesting to see what stories they give you compared to the different ones they have told various landowners and compared to what they have in writing.

May I assume this observer status will include minutes of the meeting when it becomes an oral hearing, even though NextEra succeeded in making that very difficult by having the notice of the registered letters show up on the afternoon of Dec.24 after most offices were closed, or skeleton staff for the holidays. Just another unsurprising churn in this saga.

May I ask for this info to come by hard copy as well as email as our rural internet service sometimes dosen't handle large attachments well.

Thank you for your patience and have a good new year. Jeff Allan [REDACTED]
