Subject: RE: File No. EB2008-0002 (Mr. Roger Thurston-Sarnia, ON)

ATTENTION: Board Secretary

One of our farms is located just outside the western boundary of the designated area of the storage pool (Lot 13, Concession 8--S.W. corner of Michigan Line and Blackwell Sd. Rd.). I had been in contact with Market Hub Partners through Mr. Jim Redford by phone initially and later by a letter sent January 23, 2007, to varify their claim that the western storage boundary only goes to Blackwell Sd. Rd. and no further.

No evidence or data has been shown to us to date regarding our concerns and I would like to see the supporting arm's length scientific evidence.

Also, I rent land for agricultural purposes on the Airport property where "Airport No. 4--Horizontal 1--Sarnia 2-11-V111" is to be drilled. Will this affect the land and crop growing there now and in the future?

P.S. I will be mailing a copy of the letter we sent Mr. Redford, dated January 23, 2007.
