**Re: Development of a Standby Rates Policy for Load Displacement Generation  
Board File No. EB-2013-0004**

Dear Ms. Walli,

Entegrus Powerlines Inc. ("Entegrus") respectfully requests the opportunity to participate in the upcoming Load Displacement Generation Working Group. Entegrus nominates Ryan Diotte, Senior Regulatory Specialist, as our representative.

Ryan joined Entegrus as Senior Regulatory Specialist in 2012 and is responsible for the preparation of regulatory and rate applications. His duties include rate analysis and rate design considerations with respect to Entegrus' major load displacement customer. Ryan would be supported in this endeavor by the Entegrus Group's CEO, Jim Hogan, who designed Entegrus' "Intermediate with Self Generation Service Classification" and has also been involved in load displacement generation rate design in multiple other utility environments.

Ryan is a Chartered Accountant who most recently held the position of Assistant Audit Manager with a multi-national professional services firm, which included providing progressive assurance and advisory services for rate-regulated utilities. We are confident that his experience will provide a unique perspective into assessing technical issues such as cost allocation, avoided costs, benefits valuation and rate design.

Ryan's contact information is as follows:

Ryan Diotte  
Senior Regulatory Specialist  
Entegrus Powerlines Inc.
