

Board Staff Interrogatories on Intervenor Evidence of Ritzema Farms

Board Staff Interrogatory 1 (To Varna Wind Inc.)

The evidence filed by Ritzema Farms suggests that the map provided in the Applicant's pre-filed evidence and submitted in response to Board staff interrogatory No. 3 may not be accurate. Specifically, the crossing of Division Line and Centennial Road and the location of the Ritzema property may not have been accurately represented. If the Applicant believes its map is correct, please provide a rationale for the discrepancy between the Applicant's map and the map contained in the Ritzema Farms evidence. If the Applicant finds that the map it previously filed is inaccurate, please file a corrected map and confirm that the location/route of the transmission line is unaffected by the correction and that it does not affect the Applicant's answers to any previous interrogatories. If it does affect the Applicant's answers to previous interrogatories, especially ones in relation to landowner issues, please file corrected responses.
