DECISION AND ORDER

April 11, 2013

Tillsonburg Hydro Inc. (“THI”) filed an application with the Ontario Energy Board (the “Board”) on November 8, 2012 under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, (Schedule B), seeking approval for changes to the rates that THI charges for electricity distribution, to be effective May 1, 2013. The Board had assigned the application File Number EB-2012-0168.

On December 10, 2012, the Board issued Procedural Order No. 1 granting intervenor status and cost award eligibility to Energy Probe Research Foundation (“Energy Probe”) and the Vulnerable Energy Consumers Coalition (“VECC”). The Procedural Order also set dates for interrogatories and interrogatory responses. On February 7, 2013, the Board issued Decision and Order on Confidential Filings & Procedural Order No. 3, which granted confidential treatment to responses to VECC interrogatory #22c) and Energy Probe interrogatory #1c) and set dates for a technical conference, a settlement conference and written submissions on any unsettled issues. A date of March 15, 2013

was also set for the filing of any proposed settlement agreement. On February 15, 2013, the Board issued Procedural Order No. 4, which cancelled the technical conference and replaced it with a second round of written interrogatories.

The settlement conference took place on March 4, 2013 and was attended by THI, VECC and Energy Probe (collectively, the “Parties”). Board staff was also present at the settlement conference. The Parties reached a complete settlement on all issues in the proceeding. The proposed Settlement Agreement was filed with the Board on March 25, 2013.

THI also filed a proposed Tariff of Rates and Charges, reviewed by all Parties, incorporating the terms of the Settlement Agreement to avoid the need to circulate a draft Rate Order. The Settlement Agreement and Tariff of Rates and Charges is included as Appendix A to this Decision and Order.

As part of the Settlement Agreement, several appendices were attached which set out all relevant calculations showing the impact of the implementation of the proposed Settlement Agreement on THI’s revenue requirement, the allocation of the resulting revenue requirement to the rate classes, and the determination of the final rates, including bill impacts.

The Board has reviewed and accepts the proposed Settlement Agreement as filed. The Board commends the parties on achieving a complete settlement of all matters. THI’s new rates are to be effective May 1, 2013.

The Board has also reviewed the information provided in support of the proposed Tariff of Rates and Charges and is satisfied that it accurately reflects the Settlement Agreement. The Board makes provision for the following three matters to be incorporated into THI’s Tariff of Rates and Charges:

Rural or Remote Electricity Rate Protection Charge

On March 21, 2013, the Board issued a Decision with Reasons and Rate Order (EB-2013-0067) establishing that the Rural or Remote Electricity Rate Protection (“RRRP”) used by rate regulated distributors to bill their customers shall be \$0.0012 per kilowatt

hour effective May 1, 2013. The draft Tariff of Rates and Charges flowing from this Decision and Order reflects this RRRP charge.

Wholesale Market Service Rate

On March 21, 2013, the Board issued a Decision with Reasons and Rate Order (EB-2013-0067) establishing that the Wholesale Market Service rate (“WMS rate”) used by rate regulated distributors to bill their customers shall be \$0.0044 per kilowatt hour effective May 1, 2013. The draft Tariff of Rates and Charges flowing from this Decision and Order reflects this WMS rate.

Smart Metering Entity Charge

On March 28, 2013, the Board issued a Decision and Order (EB-2012-0100/EB-2012-0211) establishing a Smart Metering Entity charge of \$0.79 per month for Residential and General Service < 50kW customers for those distributors identified in the Board’s annual *Yearbook of Electricity Distributors*. This charge will be in effect from May 1, 2013 to October 31, 2018. The draft Tariff of Rates and Charges flowing from this Decision and Order reflects this Smart Metering Entity charge.

A Rate Order will be issued after the steps set out below are completed.

THE BOARD ORDERS THAT:

1. The Tariff of Rates and Charges for THI set out in Appendix B of this Decision and Order is approved effective May 1, 2013 for electricity consumed or estimated to have been consumed on and after May 1, 2013. THI shall notify its customers of the rate changes no later than with the first bill reflecting the new rates.

Cost Awards

The Board may grant cost awards to eligible parties pursuant to its power under section 30 of the Ontario Energy Board Act, 1998. When determining the amount of the cost awards, the Board will apply the principles set out in section 5 of the Board’s Practice Direction on Cost Awards. The maximum hourly rates set out in the Board’s Cost Awards Tariff will also be applied.

1. Intervenors shall file with the Board and forward to THI their respective cost claims within **7 days** from the date of this Decision and Order.
2. THI shall file with the Board and forward to intervenors any objections to the claimed costs within **17 days** from the date of this Decision and Order.
3. Intervenors shall file with the Board and forward to THI any responses to any objections for cost claims within **24 days** of the date of this Decision and Order.
4. THI shall pay the Board's costs incidental to this proceeding upon receipt of the Board's invoice.

All filings with the Board must quote the file number EB-2012-0168, and be made through the Board's web portal at www.pes.ontarioenergyboard.ca/service, and consist of two paper copies and one electronic copy in searchable / unrestricted PDF format. Filings must be received by the Board by 4:45 p.m. on the stated date. Parties should use the document naming conventions and document submission standards outlined in the RESS Document Guideline found at www.ontarioenergyboard.ca. If the web portal is not available, parties may e-mail their documents to the attention of the Board Secretary at BoardSec@ontarioenergyboard.ca. All other filings not filed via the Board's web portal should be filed in accordance with the Board's *Practice Directions on Cost Awards*.

All communications should be directed to the attention of the Board Secretary and be received no later than 4:45 p.m. on the required date.

Dear Ms. Walli:

**Re: Tillsonburg Hydro Inc. 2013 Rates
Settlement Agreement
Board File Number: EB-2012-0168**

We are counsel to Tillsonburg Hydro Inc. ("THI").

Attached to this letter is the proposed Settlement Agreement for THI for the 2013 Rates. This Settlement Agreement, which includes the settlement of all issues, has been negotiated and accepted by THI and the intervenors in this proceeding, Energy Probe Research Foundation and the Vulnerable Energy Consumers Coalition. Board Staff, while not a party, has participated in throughout the settlement process. Mr. Paul Vlahos was the Facilitator for the settlement conference.

If the Board accepts the proposed Settlement Agreement, to avoid the need to circulate a draft rate order, a draft Tariff of Rates and Charges has been included as Appendix B. Appendix B incorporates the terms of the Settlement Agreement and has been reviewed by the Parties. THI was requesting implementation on May 1, 2013 and would request that the Board issue a final decision and order such that rates reflecting the Settlement Agreement may be implemented for May 1, 2013.

If the Board is unable to complete a final determination of this matter as requested above, THI would request the Board issue an interim decision and order at its earliest opportunity implementing the rates provided in the Settlement Agreement effective May 1, 2013 until the Board completes its deliberation.

EB-2012-0168
Tillsonburg Hydro Inc.
Proposed Settlement Agreement
March 25, 2013

This proposed settlement agreement (the “**Settlement Agreement**”) is for the consideration of the Ontario Energy Board (the “**Board**”) in its determination of the rate application by Tillsonburg Hydro Inc. (“**THI**”) for 2013 electricity distribution rates (EB-2012-0168), (the “**Application**”) for rates that are to be effective May 1, 2013.

THI's complete Application was received by the Board on November 8, 2012. Further to Procedural Order No.1, dated December 10, 2012 written interrogatories were completed. Further to Procedural Order No. 3 and Procedural Order No. 4 a second round of written interrogatories were completed and a settlement conference was scheduled for March 4, 2013. The Settlement Conference was duly convened and concluded on March 4, 2013 with Mr. Paul Vlahos as Facilitator.

THI and the following intervenors (the “**Intervenors**” and collectively including THI, the “**Parties**”) participated in the Settlement Conference:

Energy Probe Research Foundation (“**EP**”)

Vulnerable Energy Consumers Coalition (“**VECC**”)

The role adopted by the Board Staff in the Settlement Conference is set out on page 5 of the Board’s Settlement Conference Guidelines (the “**Guidelines**”). Although Board Staff is not a party to this Agreement, as noted in the Guidelines, the Board Staff who did participate in the Settlement Conference are bound by the same confidentiality standards that apply to the Parties to the proceeding.

These settlement proceedings are subject to the rules relating to confidentiality and privilege contained in the Guidelines. The Parties understand this to mean that the documents and other information provided, the discussion of each issue, the offers and counter-offers, and the negotiations leading to the settlement – or not – of each issue during the Settlement Conference are strictly confidential and without prejudice. None of the foregoing is admissible as evidence in this proceeding, or otherwise, with one exception: the need to resolve a subsequent dispute over the interpretation of any provision of this settlement proposal.

This Agreement represents a complete settlement of all issues. It is acknowledged and agreed that none of the Parties will withdraw from this Agreement under any circumstances, except as provided under Rule 32.05 of the Board's Rules of Practice and Procedure.

The Parties explicitly request that the Board consider and accept this Settlement Agreement as a package. None of the matters in respect of which a settlement has been reached is severable. Numerous compromises were made by the Parties with respect to various matters to arrive at this comprehensive Settlement Agreement. The distinct issues addressed in this proposal are intricately interrelated, and reductions or increases to the agreed-upon amounts may have financial consequences in other areas of this proposal which may be unacceptable to one or more of the Parties. If the Board does not accept the Settlement Agreement in its entirety, then there is no settlement unless the Parties agree that those portions of the Settlement Agreement that the Board does accept may continue as a valid settlement.

It is also agreed that this Settlement Agreement is without prejudice to any of the Parties re-examining these issues in any subsequent proceeding and taking positions inconsistent with the resolution of these issues in this Settlement Agreement. However, none of the Parties will in any subsequent proceeding take the position that the resolution therein of any issue settled in this Settlement Agreement, if contrary to the terms of this Settlement Agreement, should be applicable for all or any part of the 2013 Test Year.

References to the evidence supporting this Agreement on each issue are set out in each section of the Agreement. The Appendices to the Settlement Agreement provide further evidentiary support. The Parties agree that this Settlement Agreement and the Appendices form part of the record in EB-2012-0168. The Appendices were prepared by the Applicant. The Intervenors are relying on the accuracy and completeness of the Appendices in entering into this Agreement. The Parties agree the revenue requirement and rate adjustments arising from this Settlement Agreement will allow THI to make the necessary investments to serve customers, maintain the integrity of the distribution system, to maintain and improve the quality of its service and to meet all compliance requirements during 2013.

A draft issues list was provided at Exhibit 1, Tab 1 Schedule 4. There was no Board approved issues list for this proceeding. However, for the purposes of organizing this Settlement Agreement, and without prejudice to the positions of the Parties as to the issues that might otherwise be considered in this proceeding should a hearing be required, the Parties have followed the issues list set out at Appendix "A" to this Settlement Agreement. The issues list follows the organization of the Application.

The appendices attached to this Settlement Agreement are:

Summary Comparison of Application and Proposed Settlement

The table below depicts a comparison of the main components in the Application and in the Proposed Settlement

<i>Rate Base (Exhibit 2)</i>	<u>Application</u>	<u>Settlement</u>
Rate Base	\$9,522,071	\$9,823,188
Working Capital Allowance	\$2,590,610	\$2,527,065
Capital Expenditures	\$661,000	\$642,805
<u>Revenue and Deficiency (Exhibits 3, 6)</u>		
Other Revenue	\$130,345	\$138,345
Distribution Revenue Requirement	\$3,444,405	\$3,234,015
Revenue Deficiency	(\$500,884)	(\$269,296)
<u>Operating Costs (Exhibit 4)</u>		
OM&A	\$2,715,082	\$2,515,082
Amortization/Depreciation	\$282,539	\$278,975
<u>Cost of Capital and ROR (Exhibit 5)</u>		
Short Term Debt Rate	2.08%	2.07%
Long Term Debt Rate	4.41%	4.19%
Return on Equity	9.12%	8.98%
Cost of Capital	6.20%	6.02%
Deemed Capital Structure	Long Term Debt 56% Short Term Debt 4% Equity 40%	Long Term Debt 56% Short Term Debt 4% Equity 40%

Cost Allocation & Rate Design

Cost Allocation was performed in accordance with the Board’s guidelines. An updated summary of the cost allocation model reflecting the proposed settlement has been included in Appendix H. One class, Sentinel, is below the Board-endorsed revenue-to-cost ratio range (at 60%) for the test year. As a result of the settlement proposal, the Applicant is to request from the Board in future proceedings that the Revenue to Cost ratio for the Sentinel class move within the Board-endorsed range over 2 years - 2014 (70%); 2015 (80%) and that the additional revenue from this class to be split evenly across the 3 rate classes – Streetlighting, Unmetered Scattered Load and GS>1,500kW - which are at the upper limit of the Board-endorsed ranges.

Bill Impacts

The impacts on the customer are a combination of an increase in distribution rates, a revised allocation of primary and secondary assets in the cost allocation study, changes in retail transmission rates and the disposition of deferral and variances accounts. Also included in these impacts are the addition of a Stranded Meter Rate Rider and Smart Meter Disposition Rider.

Rate Class	Distribution Charge Impact		Total Bill Impact	
Residential (avg. 800kWh)	\$3.33	15.03%	\$1.65	1.49%
GS < 50 kW (2000 kWh)	\$9.38	17.74%	\$3.34	1.18%
GS>50 kW to 499 kW	(\$100.88)	-31.48%	(\$192.47)	-3.58%
GS> 500kW to 1,499kW	(\$1,048.42)	-55.11%	(\$1,752.53)	-4.27%
GS> 1,500kW	(\$11,194.97)	-90.95%	(\$14,574.22)	-7.68%
Unmetered Scattered Load	(\$11.02)	-58.76%	(\$11.53)	-33.09%
Sentinel Lighting	\$0.39	13.05%	\$0.23	2.09%
Street Lighting	(\$4.98)	-0.29%	(\$5.36)	-3.1%

Variance and Deferral Accounts (Exhibit 9)

- ❖ No changes in the Methodology of calculating or allocating the Deferral and Variance Accounts were proposed.
- ❖ Group 1 Deferral and variance account balances as of December 31, 2011 plus interest are disposed of through this proceeding for the accounts provided.
- ❖ The repayment of \$152,143.51 in the sub-account of account 1592 (including \$5,856.75 interest and applying the 50% factor) attributable to the change from PST to HST.
- ❖ All rate riders will be in effect for 1 year.
- ❖ The Smart Meter accounts are disposed of in accordance with the Board's Guidelines.

Settlement Terms by Issue

1. Administration (Exhibit 1)

1 a. Has THI responded appropriately to all relevant Board directions from previous proceedings?

Complete Settlement: For the purpose of obtaining complete settlement of all issues, the Parties accept the evidence of THI that there are no outstanding Board directions from previous proceedings.

Evidence: Exhibit 1, Tab 1, Schedule 13.

Supporting parties: THI, EP and VECC.

Parties taking no position: None.

Opposing parties: None.

1. b. Are THI's planning assumptions (asset condition, economic, business, etc.) 2013 appropriate?

Complete Settlement: For the purpose of obtaining complete settlement of all issues, the Parties accept that THI's assumptions on asset condition, economic and business planning assumptions for 2013 are an appropriate and reasonable foundation for the settlement herein.

Evidence: Exhibit 2, Tab 1, Schedules 1, 2
Exhibit 2, Tab 2, Schedule 1, 2, 3
Exhibit 2, Tab 3, Schedule 1
Exhibit 2, Tab 5, Schedule 1, 2
Response to Interrogatories:
0.0 – Staff – 1, 2, 8

Supporting parties: THI, EP and VECC.

Parties taking no position: None.

Opposing parties: None.

1 c. Is service quality, based on the Board specified performance assumptions for 2013, appropriate?

Complete Settlement: For the purpose of obtaining complete settlement of all issues, the Parties accept THI's evidence with respect to the acceptability of its service quality, based on the Board-specified indicators.

Evidence: Exhibit 2, Tab 6, Schedule 1, Attachment 1
Exhibit 2, Tab 6, Schedule 2, Attachment 1

Supporting parties: THI, EP and VECC.

Parties taking no position: None.

Opposing parties: None.

2. Rate Base (Exhibit 2)

2 a. Are the amounts proposed for the Rate Base appropriate?

Complete Settlement: THI originally applied for a rate base with Net Fixed Assets of \$6,931,460 and a Working Capital Allowance of \$2,590,610. The Application treated the stranded meters as disposed of during the 2013 Test Year and Smart Meters as being included during the 2013 Test Year. For the purposes of obtaining complete settlement of all issues, the Parties accept that: (i) Smart Meters should be included and stranded meters should be excluded from the opening balance for the 2013 Test Year; and (ii) Working Capital Allowance amount will be calculated based upon the changes in cost of power, the agreed to changes in costs (i.e. OM&A) and the change in Working Capital Allowance from 13% to 12%. The Parties also agreed that the 2013 rate base should be adjusted to reflect the actual capital additions in 2012 as filed in response to 2.0-Energy Probe - 6 and 9.

The revised rate base includes Smart Meters and excludes stranded meters in the 2013 Test Year Opening balances and incorporates the changes to the Working Capital Allowance. The Parties are relying upon the accuracy of THI's calculation for the changes in rate base provided in Appendix D and E. For the purpose of obtaining complete settlement of all issues, the Parties accept the Net Fixed Asset amount of \$7,296,123 (2013 Test Year Average).

Appendix D and E

Supporting parties: THI, EP and VECC.

Parties taking no position: None.

Opposing parties: None.

2 b. Has the Working Capital Allowance been determined appropriately?

Complete Settlement: For the purposes of obtaining complete settlement of all issues, the Parties accept a Working Capital Allowance of 12% of the Cost of Power and controllable distribution expenses. The amount was reduced by the agreement of the Parties from the Board default of 13% which does not distinguish between monthly billing and bi-monthly billing. A recent lead-lag study filed by London Hydro resulted in a proposed working capital rate of approximately 11.4%. Similar to London Hydro, THI bills its customers monthly and therefore the adjustment was agreed to as appropriate.

THI originally filed for a Working Capital Allowance of \$2,590,610 using the Board default standard 13% of Cost of Power and controllable distribution expenses – excluding amortization and PILs. THI has recalculated the Working Capital Allowance based upon 12% of the Cost of Power and controllable distribution expenses (excluding amortization and PILs) and this has been recalculated at \$2,527,065 incorporating all changes agreed to as part of this Settlement Agreement.

Opposing parties: None.

2 c. Are the amounts proposed for Capital Expenditures appropriate?

Complete Settlement: For the purposes of obtaining complete settlement of all issues, the Parties accept that the capital expenditure budget as adjusted for the CIS upgrade for the Test Year is appropriate. THI had applied for Capital Expenditures in the 2013 Test Year of \$661,000. THI adjusted amounts related to the CIS upgrade by \$18,195 to arrive at a capital expenditure budget of \$642,805 for the Test Year. Smart Meter and stranded meters were removed from the 2013 Test Year capital additions and included in the opening balances for 2013.

2 d. Are the amounts proposed for Depreciation appropriate?

Complete Settlement: For the purpose of obtaining complete settlement of all issues, the Parties accept the revised depreciation of \$278,975. Depreciation reflects updated capital spending, including actuals for 2012, and the reduction for the 2013 Test Year capital expenditures. The Application had not applied the half year rule with respect to the Smart Meters and so there was no further adjustment required even when the Smart Meters and Stranded meters were moved to adjust the 2013 Opening balances. THI uses the depreciation rates and policies set out in the Kinectrics' Report.

Parties taking no position: None.

Opposing parties: None.

2 e. Is THI's Green Energy Plan appropriate?

Complete Settlement: THI filed a Basic Green Energy Plan. For the purpose of obtaining complete settlement of all issues, the Parties accept that the Basic Plan is appropriate. THI is constrained by the upstream transmitter and does not foresee significant activity in this regard as a result.

The 2013 Cost of Service Rate Application does not include any rate riders, capital expenditures or OM&A relating to the Green Energy Plan. Should any such costs arise, THI will use the appropriate deferral accounts to record any amounts and will seek recovery during a future rate proceeding.

Evidence: Exhibit 2, Tab 7, Schedule 1

Supporting parties: THI, EP and VECC.

Parties taking no position: None.

Opposing parties: None.

3. Loads Forecast and Operating Revenue, Customers – Throughput Revenue (Exhibit 3)

3a. Are the customer and load forecasts (including methodology and weather normalization) appropriate?

Complete Settlement: For the purpose of obtaining complete settlement of all issues, the Parties accept the customer and load forecasts, including methodology and weather normalization with the changes described herein. In response to undertakings THI had provided actual year to date information for customers and load. The GS>500kW to 1,499kW and the GS> 1,500kW forecast was increased to reflect the increased average demand in each rate class that occurred in 2012. THI had included 1 customer in the GS>50 to 499kW rate class in its Application that was reclassified to GS>1,500kW as part of this Settlement Agreement based upon forecast demand that is anticipated to be realized in late 2013.

3 b. Is the impact of CDM initiatives suitably reflected in the load forecast?

Complete Settlement: For the purpose of obtaining complete settlement of all issues, the Parties agree that CDM impacts have been suitably reflected in the load forecast. The CDM adjustments, by rate class, are provided in the table above and detailed in Appendix I. The CDM adjustments for each rate class include one half-year of the impact for each of 2011 and 2013, along with a full year impact for 2012. In addition, the CDM adjustments reflect the change from gross to net consumption, as documented in the OPA CDM reports.

3 c. Are the proposed Loss Factors suitably reflected in the load forecast?

Complete Settlement: THI had applied for a Primary Factor of 1.0230 and a Secondary Loss Factor 1.0333 which is applicable to all rate classes with the exception of MicroFIT Generator. The Parties accept and rely upon the evidence of THI that the proposed Loss Factors have been suitably reflected in the load forecast.

3 d. Is the proposed amount for Other Revenue appropriate?

Complete Settlement: THI applied for Other Distribution Revenue of \$130,345. Actual Other Revenue in 2012 exceeded the forecasted amount at the time of Application and the Parties agree for the purposes of settlement that an increase of \$8,000 in Other Distribution Revenue is appropriate. THI has included the \$8,000 in Account 4235 Specific Service Charges to reflect the change agreed to herein by the Parties.

4. Operating Costs (Exhibit 4)

4 a. Are the overall levels of OM&A budgets appropriate?

Complete Settlement: THI had applied for OM&A costs of \$2,715,082 (MIFRS) or \$2,595,842 (CGAAP). For the purpose of obtaining complete settlement of all issues, the Parties accept the revised OM&A of \$2,515,082 (MIFRS) or \$2,395,842 (CGAAP) as appropriate for the 2013 Test Year. The Parties adjusted the OM&A costs to reflect the escalation since 2009 resulting from inflation and customer growth net of efficiency gains within THI and to reflect increased expenses, such as the recommendations of the Electrical Safety Authority audit and 2012 transfer pricing study.

THI has reduced Accounts 5035, 5085, 5120, 5125, 5135 and 5160 by an aggregate sum of \$200,000 (MIFRS) or \$200,000 (CGAAP). The reductions are for the purposes of setting rates and the Parties acknowledge THI retains the complete discretion to manage the OM&A costs.

4 d. Is THI's capitalization policy and depreciation (policy and expenses) appropriate?

Complete Settlement: THI utilizes the depreciation rates set out in the Kinectrics' Report . The calculation of the depreciation is provided in Appendix E. For the purpose of obtaining complete settlement of all issues, the Parties accept that the revised depreciation amount of \$278,975 and the current THI capitalization policy are appropriate.

The changes to the PP&E that have been agreed to as part of this Settlement Agreement have been provided in Appendix E.

5. Cost of Capital and Rate of Return

5 a. Is the proposed Capital structure appropriate?

Complete Settlement: THI has proposed the use of the Board's deemed capital structure for the purpose of setting rates with 40% equity, 56% long-term debt and 4% short-term debt. For the purpose of obtaining complete settlement of all issues, the Parties accept the proposed capital structure for the test year as appropriate.

5 b. Is the Cost of Debt appropriate?

Complete Settlement: In its Application, THI had used the Board's cost of debt parameters provided in the Board's letter dated March 2, 2012. The combined cost of debt was 4.255%.

On February 14, 2013, the Board issued the Capital Parameter Updates for 2013 Cost of Service Applications for rates effective May 1, 2013. The appended RRWF reflects the Board's parameters and THI's third party borrowing arrangements, which produce a combined (short-term (2.07%) and long-term (4.19%)) cost of debt of 4.05%. For the purpose of obtaining a complete settlement of all issues, the Parties accept the proposed cost of debt as appropriate for the test year.

5 c. Is the proposed Rate of Return on Equity appropriate?

Complete Settlement: In its Application, THI had used the Board's Return on Equity ("ROE") of 9.12% as provided by the Board in its letter dated March 2, 2012. Appendix D reflects the Board's Capital Parameter Updates for 2013 Cost of Service Applications for rates effective May 1, 2013, which provides for an ROE of 8.98%. For the purpose of obtaining complete settlement of all issues, the Parties agree to the settlement of this issue and accept the use of the said ROE for the 2013 Test Year.

Appendix: D

Supporting parties: THI, EP and VECC.

Parties taking no position: None.

Opposing parties: None.

7. Cost Allocation (Exhibit 7)

7 a. Is THI's cost allocation appropriate?

Complete Settlement: THI retained Elenchus Research Associates to complete the cost allocation study.

THI did not track secondary assets. The primary/secondary split used in this cost allocation study was an average of the primary/secondary splits of Grimsby and Halton Hills which are in the same cohort as THI for benchmarking purposes. For the purpose of obtaining complete settlement of all issues, the Parties agree the proposed approach to the primary/secondary split is reasonable.

Account	Percentage (%)
1830-4	76
1830-5	24
1835-4	72.5
1835-5	27.5
1840-4	77.5
1840-5	22.5
1845-4	82
1845-5	18

For the purpose of obtaining complete settlement of all issues, the Parties accept the cost allocation as provided in Appendix H as appropriate. The Cost Allocation Model was updated as per the agreed upon settlement items.

Rate Class	Revenue to Cost Ratio 2013 Test Year	Board Range
Residential	96.26%	85% to 115%
GS<50kW	107.64%	80% to 120%
GS>50kW to 499kW	96.26%	80% to 120%
GS>500 to 1,499kW	107.44%	80% to 120%
GS>1,500kW	120.00%	80% to 120%
Streetlighting	120.00%	70% to 120%
Sentinel	60.00%	80% to 120%
Unmetered Scattered Load	120.00%	80% to 120%

The revenue to cost ratio for the Sentinel rate class is below the Board-endorsed minimum and the ratio has been set at 0.60 for the 2013 Test Year. The Parties have agreed that in the subsequent IRM applications THI will apply to move to the minimum of the Board-endorsed range (i.e. 0.80) in equal increments being 0.70 in 2014 and 0.80 in 2015. THI will, in future applications, propose to allocate additional revenues

collected from the Sentinel rate class to: (i) GS >1,500kW; (ii) Streetlighting; and (iii) Unmetered Scattered Load. The proposed revenue to cost ratio adjustments for future years are summarized in Appendix H.

8 b. Are the proposed Retail Transmission Service Rates appropriate?

Complete Settlement: For the purpose of obtaining complete settlement of all issues, the Parties accept the proposed Retail Transmission Service Rates as summarized below and set out in Appendix F, which is the updated RTSR model.

Rate Class	Metric	Network	Connection
Residential	kWh	\$.0070	\$0.0050
GS<50kW	kWh	\$0.0062	\$0.0045

9. Deferral and Variance Accounts (Exhibit 9)

9 a. Is the proposal for the amounts, disposition and continuance of THI's Deferral and Variance accounts appropriate?

Complete Settlement: For the purpose of obtaining complete settlement of all issues, the Parties agree to the disposition of the deferral and variance account amounts as shown below (December 31, 2011 balances plus interest to April 30, 2013) and as detailed in Appendix J.

This does not include Smart Meters which are considered separately as described in 9(b) below.

Account	Amount	Period
1592 - HST	(\$152,144)	1 year
1580 RSVA- WMSC	(\$208,727)	1 year
1584 RSVA - RTNC	\$20,654	1 year
1586 RSVA - RTCC	(\$35,717)	1 year
1588 RSVA - Power	(\$586,789)	1 year
1588/1589 Global Adj.	\$533,688	1 year
1508 – Other Reg. Assets	Not Applicable	Not Applicable
1562 PILs	\$0	
1595	\$60,022	1 year

(#) refers to a credit for customers

The disposition of the above amounts results in rate riders for each class as shown below.

Rate Class	Rate Rider (excl. Global Adj)	Rate Rider Global Adj.	Units
Residential	(\$0.0068)	\$0.0043	\$/kWh
GS<50kW	(\$0.0048)	\$0.0043	\$/kWh

9 b. Is the Smart Meter disposition rider appropriate?

Complete Settlement: THI had originally filed its Application with Smart Meters being included during the 2013 Test Year. THI has adjusted the recovery of Smart meters to be consistent with the Board's *Smart Meter Model for Electricity Distributors* (2013 Filers). Costs were allocated to each class based upon the installation costs multiplied by the customers for each rate class. For the purpose of settlement of all issues, the Parties accept as appropriate the disposition of Smart meter costs as provided in Appendix G.

9. c. Is the Stranded Meter disposition rider appropriate?

Complete Settlement: THI included in the Application the disposal of \$89,345 for stranded meter costs incurred prior to the 2013 Test Year.

For the purpose of settlement of all issues, the Parties accept as appropriate the proposed disposition of the \$89,345 remaining net book value for stranded meter assets of which \$69,262 (78%) and \$20,083 (28%) are allocated to the Residential and GS < 50 kW classes, respectively. Allocation shares for each class were determined on the basis of original installation costs multiplied by the number of meters for each class. The Stranded Meter rate riders and recovery period for each class are shown below. Detailed calculations are provided in Appendix G.

9. d. Is the PST/HST Disposition Calculation appropriate?

Complete Settlement: THI recorded the amounts in Account 1592. For the purpose of settlement of all issues, the Parties relying upon the calculation provided by THI accept as appropriate the approach of THI and the amount to be repaid.

A copy of the calculation of the HST amount is provided in Appendix J.

9. e. Is the proposal for the LRAM and LRAM Variance Account appropriate?

Complete Settlement: For the purpose of obtaining complete settlement of all issues, the Parties accept THI's LRAM and LRAMVA calculations, as outlined in Appendix I, as appropriate. THI has included an LRAM claim of \$14,970, including \$401 in carrying charges, to recover the persistence of 2010 CDM programs in 2011 and 2012.

THI has included an LRAMVA claim of \$17,245, including \$462 in carrying charges, to recover the 2011 lost revenue from 2011 CDM programs. The savings are based on OPA reported amounts. The LRAMVA threshold amount is the sum of the persistence of 2011 and 2012 CDM programs and the annualized impact of 2013 CDM programs in 2013. LRAMVA amounts are allocated to each class based on the percentage of kWh savings achieved for each class. The allocation of the LRAMVA threshold for each class is shown in Appendix I.

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account in one of three categories of residential services: single-family or single-unit homes, multi-family buildings, and subdivision developments. Further servicing details are available in Tillsonburg Hydro's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

- General** Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.
- (1) All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)
 - Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I
 - (2) Net of addbacks and deductions to arrive at taxable income.
 - (3) Average of Gross Fixed Assets at beginning and end of the Test Year
 - (4) Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
 - (5) Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
 - (6) Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
 - (7) 4.0% unless an Applicant has proposed or been approved for another amount.
 - (8) Starting with 2013, default Working Capital Allowance factor is 13% (of Cost of Power plus controllable expenses). Alternatively, WCA factor based on lead-lag study or approved WCA factor for another distributor, with supporting rationale.
 - (9) Depreciation Expense should include the adjustment resulting from the amortization of the deferred PP&E balance as shown on Appendix 2-EA or Appendix 2-EB of the Chapter 2 Appendices to the Filing Requirements.
 - (10) Adjustment should include the adjustment to the return on rate base associated with deferred PP&E balance as shown on Appendix 2-EA or Appendix 2-EB of the Chapter 2 Appendices to the Filing Requirements.

Notes:

- Board policy of the "half-year" rule - the applicant must ensure that additions in the year attract a half-year depreciation expense in the first year. Deviations from this standard practice must be supported in the application.
- The applicant must provide an explanation of material variances in evidence
- The applicant should ensure that the years for new additions of assets are the asset useful lives determined by management in accordance with IFRS.
A recalculation should be performed to determine the average remaining life of opening balance of assets (i.e. excluding 2012 additions) under IFRS. For example, Asset A had a useful life of 20 years under CGAAP. On January 1, 2012, the date of transition, Asset A was 3 years depreciated. As a result, Asset A would have a remaining service life of 17 years (20 years less 3 years) under CGAAP as of January 1, 2012. Due to the transition to IFRS, management re-assessed the asset useful lives under IFRS principles and concluded that the revised useful life of Asset A is now 30 years. Therefore, the average remaining useful life of opening balance of Asset A is determined to be 27 years (30 years less 3 years) under IFRS as of January 1, 2012.
- NBV must exclude assets still on the books but which have been fully amortized or depreciated.
- This column refers to the calculated full year depreciation but excludes the depreciation expense on assets fully depreciated during the year. This column is used for the purpose of calculating depreciation expense in the following year on the next worksheet.

General: Applicants must provide a breakdown of depreciation and amortization expense in the above format for all relevant accounts. Asset Retirement Obligations (AROs), depreciation and accretion expense should be disclosed separately consistent with the Notes of historical Audited Financial Statements.

Notes:

- Tables in the format outlined above covering all fixed asset accounts should be submitted for the Test Year, Bridge Year and all relevant historical years. At a minimum, the applicant must provide data for the earlier of: 1) all historical years back to its last rebasing; or 2) at least three years of historical actuals, in addition to Bridge Year and Test Year forecasts.
- The "CCA Class" for fixed assets should agree with the CCA Class used for tax purposes in Tax Returns. Fixed Assets sub-components may be used where the underlying asset components are classified under multiple CCA Classes for tax purposes. If an applicant uses any different classes from those shown in the table, an explanation should be provided. (also see note 3 below).
- The table may need to be customized for a utility's asset categories or for any new asset accounts announced or authorized by the Board.
- The depreciation column (D) is not required as the relevant information will be provided in the following 2-C series of appendices.

Notes:

- Tables in the format outlined above covering all fixed asset accounts should be submitted for the Test Year, Bridge Year and all relevant historical years. At a minimum, the applicant must provide data for the earlier of: 1) all historical years back to its last rebasing; or 2) at least three years of historical actuals, in addition to Bridge Year and Test Year forecasts.
- The "CCA Class" for fixed assets should agree with the CCA Class used for tax purposes in Tax Returns. Fixed Assets sub-components may be used where the underlying asset components are classified under multiple CCA Classes for tax purposes. If an applicant uses any different classes from those shown in the table, an explanation should be provided. (also see note 3 below).
- The table may need to be customized for a utility's asset categories or for any new asset accounts announced or authorized by the Board.
- The depreciation column (D) is not required as the relevant information will be provided in the following 2-C series of appendices.

Notes:

- 1 Tables in the format outlined above covering all fixed asset accounts should be submitted for the Test Year, Bridge Year and all relevant historical years. At a minimum, the applicant must provide data for the earlier of: 1) all historical years back to its last rebasing; or 2) at least three years of historical actuals, in addition to Bridge Year and Test Year forecasts.
- 2 The "CCA Class" for fixed assets should agree with the CCA Class used for tax purposes in Tax Returns. Fixed Assets sub-components may be used where the underlying asset components are classified under multiple CCA Classes for tax purposes. If an applicant uses any different classes from those shown in the table, an explanation should be provided. (also see note 3 below).
- 3 The table may need to be customized for a utility's asset categories or for any new asset accounts announced or authorized by the Board.
- 4 The depreciation column (D) is not required as the relevant information will be provided in the following 2-C series of appendices.

Amount included in Revenue Requirement on rebasing	-68248

WACC	6.20%
Disposition Period - Note 4	4 Years

Notes:

- For an applicant that adopts IFRS on January 1, 2013, the PP&E values as of January 1, 2012 under both CGAAP and MIFRS should be the same.
- Amortization of the deferred balance in Account 1575 will start from the rebasing year.
Assume the utility requests for a certain disposition period, the amortization that should be included in the depreciation expense is calculated as:
the opening balance of Account 1575 / the approved disposition period
- Return on rate base associated with deferred balance is calculated as:
the deferred account opening balance as of 2013 rebasing year x WACC
* Please note that the calculation should be adjusted once WACC is updated and finalized in the rate application.
- Consistent with the 4 year normal rate cycle, the model is using a 4 year amortization period as a default selection to "clear" the PP&E deferral account through a one-time adjustment to ratebase to capture and remove the impact of the accounting policy changes as caused by the transition from CGAAP to MIFRS.

Smart Meter Model for Electricity Distributors (2013 Filers)

This worksheet calculates the class-specific SMDRs according to accepted practice. A distributor may choose to use its own methodology, but should provide analogous support for its allocation and derivation of class-specific SMDRs and SMIRRs.

Notes

- Customer Classification - If proposed rate classes differ from those in place in the previous Cost Allocation study, modify the rate classes to match the current application as closely as possible.
- Host Distributors - Provide information on embedded distributor(s) as a separate class, if applicable. If embedded distributor(s) are billed as customers in a General Service class, include the allocated cost and revenue of the embedded distributor(s) in the applicable class. Also complete Appendix 2-Q.
- Class Revenue Requirements - If using the Board-issued model, in column 7A enter the results from Worksheet O-1, Revenue Requirement (row 40 in the 2013 model). This excludes costs in deferral and variance accounts. Note to Embedded Distributor(s), it also does not include Account 4750 - Low Voltage (LV) Costs.

Appendix 2-P Cost Allocation

- 1 Columns 7B to 7D - LF means Load Forecast of Annual Billing Quantities (i.e. customers or connections X 12, (kWh or kW, as applicable). Revenue Quantities should be net of Transformer Ownership Allowance. Exclude revenue from rate adders and rate
- 2 Columns 7C and 7D - Column total in each column should equal the Base Revenue Requirement
- 3 Columns 7C - The Board cost allocation model calculates "1+d" in worksheet O-1, cell C21. "d" is defined as Revenue Deficiency/ Revenue at Current Rates.
- 4 Columns 7E - If using the Board-issued Cost Allocation model, enter Miscellaneous Revenue as it appears in Worksheet O-1, row 19.

Notes

- 1 Previously Approved Revenue-to-Cost Ratios - For most applicants, Most Recent Year would be the third year of the IRM 3 period, e.g. if the applicant rebased in 2009 with further adjustments over 2 years, the Most recent year is 2011. For applicants that have had rates adjusted only under IRM 2, the Most Recent Year is 2006, and the applicant should enter the ratios from their Informational Filing.
- 2 Status Quo Ratios - The Board's updated Cost Allocation Model yields the Status Quo Ratios in Worksheet O-1. Status Quo means "Before Rebalancing".

Note

1 The applicant should complete Table D if it is applying for approval of a revenue to cost ratio in 2012 that is outside the Board's policy range for any customer class. Table (d) will show the information that the distributor would likely enter in the IRM model) in 2013. In 2013 Table (d), enter the planned ratios for the classes that will be 'Change' and 'No Change' in 2013 (in the current Revenue Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision – Cost Revenue Adjustment', column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

General Notes

1. Please ensure that your macros have been enabled. (Tools -> Macro -> Security)
2. Due to the time lag of deferral/variance account dispositions, this model assumes that all opening balances include previously disposed of amounts. Accordingly, all "Board Approved Dispositions" are deducted from the opening balance.
3. Please provide information in this model since the last time your balances were disposed.
4. For all Board-Approved dispositions, please ensure that the disposition amount has the same sign (e.g: debit balances are to have a positive figure and credit balance are to have a negative figure) as per the related Board decision.

Notes

 Pale green cells represent input cells.

 Pale blue cells represent drop-down lists. The applicant should select the appropriate item from the drop-down list.

 White cells contain fixed values, automatically generated values or formulae.

⁶ If the LDC's 2013 rate year begins January 1, 2013, the projected interest is recorded from January 1, 2012 to December 31, 2012 on the December 31, 2011 balance adjusted for the disposed balances approved by the Board in the 2012 rate decision. If the LDC's 2013 rate year begins May 1, 2013 the projected interest is recorded from January 1, 2012 to April 30, 2013 on the December 31, 2011 balance adjusted for the disposed balances approved by the Board in the 2012 rate decision.

⁷ Include Account 1595 as part of Group 1 accounts (lines 31, 32 and 33) for review and disposition if the recovery (or refund) period has been completed. If the recovery (or refund) period has not been completed, include the balances in Account 1595 on a memo basis only (line 85).

⁸ As per the January 6, 2011 Letter from the Board, regarding the implementation of the Ontario Clean Energy Benefit:

"By way of exception... The Board does anticipate that licensed distributors that cannot adapt their invoices as of January 1, 2011 will require a variance account for OCEB purposes... The Board expects that any principal balances in "Sub account Financial Assistance Payment and Recovery Variance - Ontario Clean Energy Benefit Act" will be addressed through the monthly settlement process with the IESO or the host distributor, as applicable.

⁹ The Board expected that requests for disposition of the balances in Account 1521 were to be addressed as part of the proceedings to set rates for the 2012 rate year, except in cases where this approach would have resulted in non-compliance with the timeline set out in section 8 of the SPC regulation.

¹⁰ Account 1575 shall not be cleared through the distributor's deferral and variance account rate rider. Account 1575 shall be cleared as an adjustment to the distributor's revenue requirement.

¹¹ Deferral accounts related to Smart Meter deployment are not to be recovered/refunded through the Deferral and Variance Account rate rider. For details on how to dispose of balances in Smart Meter accounts see the Board's Guideline: Smart Meter Disposition and Cost Recovery (G-2011-0001)

For all Board-Approved dispositions, please ensure that the disposition amount has the same sign (e.g. debit to negative figure) as per the related Board decision.

Provide supporting statement indicating whether due to denial of costs in 2006 EDR by the Board, 10% transition costs write-off, etc. Adjustments Instructed by the Board include deferral/variance account balances moved to Account 1590 as a result of the 2006 EDR and Please provide explanations for the nature of the adjustments. If the adjustment relates to previously Board Approved disposed balances, For RSVA accounts only, report the net variance to the account during the year. For all other accounts, record the transactions during the year. Please describe "other" components of 1508 and add more component lines if necessary.

1563 is a contra-account and is not included in the total but is shown on a memo basis. Account 1562 establishes the obligation to the ratepayer for the LDC's 2013 rate year begins January 1, 2013, the projected interest is recorded from January 1, 2012 to December 31, 2012 on the 2012 rate decision. If the LDC's 2013 rate year begins May 1, 2013 the projected interest is recorded from January 1, 2012 to April 30, 2012 on the 2012 rate decision.

Include Account 1595 as part of Group 1 accounts (lines 31, 32 and 33) for review and disposition if the recovery (or refund) period has balances in Account 1595 on a memo basis only (line 85).

As per the January 6, 2011 Letter from the Board, regarding the implementation of the Ontario Clean Energy Benefit: "By way of exception... The Board does anticipate that licensed distributors that cannot adapt their invoices as of January 1, 2011 will require balances in "Sub account Financial Assistance Payment and Recovery Variance - Ontario Clean Energy Benefit Act" will be addressed through the Board expected that requests for disposition of the balances in Account 1521 were to be addressed as part of the proceedings to set non-compliance with the timeline set out in section 8 of the SPC regulation.

Account 1575 shall not be cleared through the distributor's deferral and variance account rate rider. Account 1575 shall be cleared as an interest-free loan account related to Smart Meter deployment are not to be recovered/refunded through the Deferral and Variance Account rate rider. RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account in one of three categories of residential services: single-family or single-unit homes, multi-family buildings, and subdivision developments. Further servicing details are available in Tillsonburg Hydro's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.
