NOTICE OF APPLICATION

Union Gas Limited has applied for approval to build a natural gas pipeline and supporting infrastructure in the City of Cambridge and City of Hamilton, and for approval to recover the costs from its ratepayers

What?

Union Gas Limited (Union) has applied to the Ontario Energy Board (OEB) for approval to construct 13.9 kilometers of natural gas pipeline and associated facilities that will run from the City of Cambridge to the City of Hamilton. Union has also applied for approval to construct compressor facilities in the Town of Milton at the proposed Parkway West Compressor Station. The purpose of the compressor facilities is to move gas through the proposed new pipeline. The approximate total cost of the project is \$204 million. Please see attached maps for details of the proposed pipeline route and compressor site. Construction of the proposed pipeline is scheduled to commence in 2014. Union has also applied to recover the costs of the project from ratepayers starting when the project is completed in January 2015.

Why?

Union Gas says that the proposed project will provide greater reliability of supply and allow for more gas to flow through its main transmission system feeding the Greater Toronto Area.

The Ontario Energy Board's Role

The OEB will hold a hearing to consider whether Union's request for approval to construct the natural gas pipeline (and associated facilities) should be approved. The Board will also determine if Union will be permitted to recover the costs of the project through the rates Union charges to consumers.
