**Subject:** EB-2013-0053-Application

Hi there,

I am emailing you on the behalf of my mother Lien Tieu. She is the homeowner of [REDACTED] and has addressed the Hydro One application to me.

She has a few concerns regarding EB-2013-0053 with the replacement of the transmission lines and the installation of the new autotransformers. I believe she has missed the written hearing but she has a few concerns regarding this matter. With this new application for the transmissions lines; she is concerned if Hydro One will expand further out. If this project is expanding the use of land and is closer to her property she is not happy and would not like to have the Hydro facilities to be close to her property. I understand that this is replacing the old transmission, but my mother is worried if this will affect her property value and the construction noise that this will have. We understand from reading the application that this is an upgrade but she is worried about her property and the effects that this application may cause.

Please provide any documents/submissions regarding this application. She would like to be a part of this process.
