To Shelly-Anne Connell as to the matter that has been passed by the Board I am concerned by the remark as stated in your letter

pursuant to section 21(4)(B) of the act the Board has decided dispose of this application without a hearing, since no other party is affected in a material way. We the people Will be affected by this transmission line placement. some homes are only 1 meter from the property line\ . All of these concerns I and others have posted on your WEB site since the beginning. I would appreciate your attention to this matter as it seems to us that we the people living on the 19 kilometer long power line will have material affects please review my and others comments as they are still the same.

Intervenor Norman Negus
