Subject: Re: EB-2012-0442 -- Varna Wind Inc. - Argument-In-Chief

It appears the Applicant is indicating that they have dealt with all of the issues.

The Applicant is fully aware of the house located on Centennial Road,

Lot 6 Con 6, being situated extremely close to Centennial Road.

Concerns were raised with the Applicant, yet to date, we have heard NOTHING from the Applicant about this property.

Is the Applicant negotiating with HONI on this property as they have been with the Oldfield's and the Papple's??? to bury the transmission line, etc.???

The last map still showed the proposed transmission line on the same side of the road as the house, putting the transmission line extremely close to the house.

Is there a reason why the Applicant did not mention the fact that the MOE decision was Appealed?

John and Mary Van Miltenburg
