Re: Hydro One Networks 2013 Distribution Rate Application
FOCA Request for Intervenor Status, Board File EB-2013-0141

June 10, 2013

Dear Ms. Walli,

Pursuant to the above 2013 Distribution Rate Application, FOCA wishes to apply for intervenor status and an award of any out of pocket expenses for travel, meals and any necessary overnight accommodation.

As we have commented to Hydro One in the past, we have a number of chronic concerns about the rates being disproportionately borne by FOCA's membership.

FOCA is a not-for profit educational and advocacy group representing the interests of residential waterfront property owners, who comprise a significant portion of the 150,000 members of Hydro One's "Seasonal Class". FOCA was established in 1963 and has over 500 paid member associations having an underlying membership of almost 50,000 families.

FOCA would like to assert (again) that we remain interested in a future Cost of Service proceeding, one which includes making use of Smart Meter data to more accurately allocate costs to classes and the seasonal class definition. It is our hope that reforms to the rating system (that currently is defined by the type of property ownership, versus energy consumption) will be part of future rating changes.

Our representative for service in this proceeding is:

John McGee, P.Eng.
36 Grouse Glen, Barrie, ON, L4N 7Z7
T 705 726 0707 E mail mcgeejs@csolve.net

Sincerely,

Terry Rees
Executive Director, FOCA
