Re: Board File No. EB-2013-0233

When we purchased this property 44 years ago there was lots of wildlife. There are many walnut trees around and it is very quiet there.

One concern we have, is that the sound will follow the creek. There is a spring which supplies water to the house and the overflow from the spring runs into the creek, which may amplify the sound to the house and surrounding area. Have there been any studies done on this?

We built this home as we could afford it. We have a family of 5 and now they are grown up and camp occasionally on part of this property. Each year we have our Family Reunion there with many grandchildren and great grandchildren who enjoy this property. It is up for sale now, but we have not received any offers, especially once people hear that wind turbines are proposed nearby.

After the many years of paying taxes to the Township and keeping the property up – you seem to think you can just move in and take over.

Yours truly,

Florence McCallum
