

**INTERROGATORIES**  
**From**  
**DONALD RENNICK**  
**To**  
**North Bay Hydro Services Inc. (NBHSI)**  
**OEB FILE NO: EB-2013-0253/0254**

1. This application requests that an electricity generation licence be issued to the NBHSI.

At the same time North Bay Hydro Distribution Limited (an affiliated company) has requested that the Board cancel its generation license (EG-2011-0279).

In addition, NBHDL currently has an FIT contract with OPG and has made a request to transfer the contract to its affiliate, the applicant.

**Interrogatories**

1. The applicant has failed to provide reasons for initiating these changes.

Please indicate the factors that affected the decision to make these changes.

2. The applicant has failed to indicate what the advantages/disadvantages would accrue to North Bay ratepayers following these changes.

Please indicate the advantages/disadvantages of these changes vis-à-vis North Bay ratepayers.

3. I have requested but have not been able to see copies of the application and the pre-filed evidence in support of the applicant's application.

Please provide copies of the application and pre-filed evidence.

4. The applicant has not provided a business case for acquiring a generation license. The income from the operation of a FIT contract is taxable in the hands of the applicant. The income from operations in the hands of the shareholder municipal corporation would not be taxable.

Please provide an explanation of the business case for the applicant acquiring a generation licence rather than the municipality who are owners of the methane producing site.
