## **LETTER OF COMMENT**

### **Comments:**

Hydro one should not be allowed to "recover" the costs of the smart meters. We as a customer were told, the purpose of smart meters was to use hydro in non peak times and be more energy efficient. Well the truth to that is, people still need hydro in those "peak" times, and in my case heat my home, to the tune of a bunch of \$800 hydro bills in the winter months...

The point I am trying to make is, that hydro one profited from the "smart" meters.. and the fact that they want to recoup the cost of the program is insulting as a customer. Not only does the smart meter cost me, the customer more every month.. they also want me the customer to PAY FOR THEIR EQUIPMENT!
