Ontario Energy Board P.O. Box 2319 27th Floor 2300 Yonge Street Toronto, Ontario M4P 1E4 Attention: Ms. Kirsten Walli, Board Secretary

Dear Ms. Walli,

RE: GRIMSBY POWER INC.

2014 IR RATE APPLICATION OEB File No. EB-2013-0132

Grimsby Power Inc. is pleased to submit its 2014 4th Generation IR Rate Adjustment Application to the Ontario Energy Board in compliance with the OEB letter dated July 17, 2013 which established a deadline of August 16, 2013 for distributors with a January 1st rate year to file their IR applications for 2014.

Please find accompanying this letter, two copies of Grimsby Power's Application for Electricity and Distribution Rates and Charges together with two CDs containing the PDF version of the Application and Excel versions of the OEB's models used in this application.

We would be pleased to provide any further information or details that you may require relative to this application.

Yours truly.

MANAGER'S SUMMARY

1. INTRODUCTION

Grimsby Power Incorporated ("GPI") hereby applies to the Ontario Energy Board (the "Board") for approval of its 2014 Distribution Rate Adjustments effective January 1, 2014. GPI applies for an Order or Orders approving the proposed distribution rates and other charges as set out in Appendix 2 of this Application as just and reasonable rates and charges pursuant to Section 78 of the OEB Act.

GPI has relied on *Chapter 3* of the *Ontario Energy Board Filing Requirements for Electricity Distribution Rate Applications* dated July 17, 2013, *The Report of the Board on Electricity Distributors' Deferral and Variance Account Review Initiative* ("the EDDVAR Report") issued July 31, 2009 and the *Electricity Distribution Retail Transmission Service Rates Guideline* G-2008-0001, Revision 4.0, issued June 28, 2012 ("*RTSR Guidelines*") in order to prepare this application.

In the event that the Board is unable to provide a Decision and Order in this Application for implementation by the Applicant as of January 1, 2014, GPI requests that the Board issue an Interim Rate Order declaring the current Distribution Rates and Specific Service Charges as interim until the decided implementation date of the approved 2014 distribution rates.

In the event that the effective date does not coincide with the Board's decided implementation date for 2014 distribution rates and charges, GPI requests to be permitted to recover the incremental revenue from the effective date to the implementation date.

On August 16, 2011, GPI filed the 2012 Cost of Service Application on the basis of MIFRS; file number EB-2011-0273. On August 2, 2012, GPI filed the first IRM Application (EB-2012-0127) following their rebasement of rates. The current 2013 distribution rates

EB-2013-0132 Grimsby Power Inc. 2014 4th Generation Incentive Rate-setting Application August 15, 2013 Page 5 of 18

(Appendix 1) reflect the Board's Decision and Order issued on December 14, 2012 on GPI's 2013 IRM application.

The Applicant requests that this 4th Generation IR Application be disposed of by way of a written hearing.

In the preparation of this application, GPI used the Board's 2014 rate models, which consist of the following Excel-based files:

- IRM Revenue Cost Ratio Adjustment Workform (Version 2.0);
- RTSR Adjustment Work Form (Version 4.0);
- 2014 IRM Rate Generator (Version 2.3); and the
- Tax Sharing Model for IRM Appliations (Version 1.1)

The rates and other adjustments being applied for and as calculated through the use of the above models include the following:

- An Annual Price Cap Index Adjustment in accordance with Chapter 3 of the Ontario Energy Board Filing Requirements for Electricity Distribution Rate Applications, issued July 17, 2013.
- An adjustment of Retail Transmission Service Rates established in accordance with Board Guideline G-2008-0001 - Electricity Distribution Retail Transmission Service Rates, issued October 22, 2008 and with revisions up to June 28, 2012 (Revision 4.0), along with updates to the Uniform Transmission Rates (January 18, 2011, January 1, 2012 and January 1, 2013).
- An adjustment to the Revenue-to-Cost ratios in accordance with Chapter 3 of the Ontario Energy Board Filing Requirements for Electricity Distribution Rate Applications, issued July 17, 2013.

2. DISTRIBUTOR'S PROFILE

GPI is a for-profit private corporation carrying on the business of distributing electricity within

the Town of Grimsby. GPI is a licensed distributor with approximately 10,000 customers.

Over 90% of customers are residential, whereas 8% are small business or industrial based.

Grimsby Power owns, maintains and operates the distribution system consisting of 168 km of

overhead lines and 70 km of underground lines all carrying a voltage of less than or equal to

27.6kV.

Grimsby Power receives its power from two locations: Beamsville Transformer Station (owned

by Hydro One), and Niagara West Transformer Station (owned by Niagara West

Transformation Corporation).

3. PUBLICATION NOTICE

Grimsby Power is proposing that notices related to this Application appear in *The Niagara this*

Week Grimsby-Lincoln News publication. The Niagara this Week Grimsby-Lincoln News is an

unpaid local publication with an average circulation of 22,412 per day.

4. ANNUAL PRICE CAP ADJUSTMENT MECHANISM

As per Board policy (Chapter 3), distribution rates are to be adjusted according to the Annual Adjustment Mechanism as presented through the Board's Rate Generator model. The calculation would be based on the annual percentage change in the inflation factor (currently set at 2.00%) less an X-Factor comprised of a productivity factor (currently set at 0.72%) and a stretch factor (currently set at 0.60%). The Price Cap Adjustment is therefore set by default in the model to 0.68%. GPI understands that the Board will establish the final inflation factor, productivity factor and stretch factor to apply to distributors by means of a supplemental report on the RRFE. GPI further understands that Board staff will update each distributor's Rate Generator model with the final parameters once they are established.

While the price factor adjustment under this application would apply to fixed and volumetric distribution rates for GPI, it would not affect the following:

- Rate Adders
- Rate Riders
- Low Voltage Service Charges
- Retail Transmission Service Rates
- Wholesale Market Service Rate
- Rural Rate Protection Charge
- Standard Supply Service Administrative Charge
- MicroFIT Service Charge
- Specific Service Charges
- Transformation and Primary Metering Allowances
- Smart Metering Entity Charge

It should be noted that the current rates entered in the Rate Generator model for the Wholesale Market Service ('WMS') rate and Rural Rate Protection ('RRRP') charge were not

EB-2013-0132 Grimsby Power Inc. 2014 4th Generation Incentive Rate-setting Application August 15, 2013 Page 8 of 18

taken directly from the Tariff sheets. The WMS and RRRP rates were \$0.0052 per kWh and \$0.0011 per kWh respectively. However, with the OEB ruling EB-2013-0067 on March 21, 2013 (and as amended April 2, 2013), they were changed to \$0.0044 per kWh and \$0.0012 per kWh effective May 1, 2013. Since the new proposed tariff rates draw from the current rates, the revised rates were entered in the model as current.

5. RTSR ADJUSTMENTS

In reference to Board Guideline G-2008-0001 - *Electricity Distribution Retail Transmission Service Rates*, issued October 22, 2008 and with revisions up to June 28, 2012 (Revision 4.0), GPI is applying for an adjustment of its Retail Transmission Service Rates based on a comparison of historical transmission costs adjusted for new UTR levels and revenues generated from existing RTSRs. This approach is expected to minimize variances in the USoA Accounts 1584 and 1586.

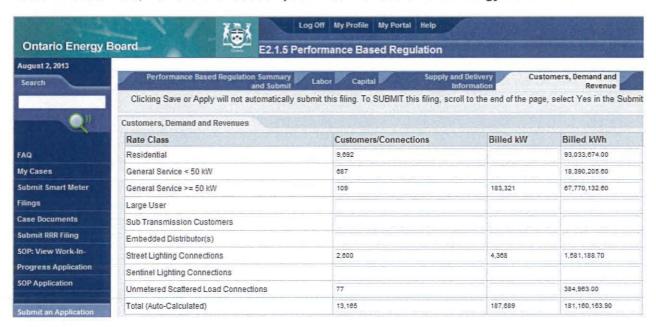

GPI used the 2014 RTSR Adjustment Workform to determine the proposed adjustments to the current Retail Transmission Service Rates approved in the last IRM3 application (EB-2012-0127). GPI understands that the Workform reflects the most recent UTRs approved by the Board (EB-2012-0031, issued on December 20, 2012 and effective January 1, 2013). GPI further understands that Board staff will update each distributor's 2014 RTSR model and Rate Generator to incorporate UTR adjustments approved for 2014.

The proposed adjustments of the Retail Transmission Service Rates and detailed calculations are presented in Appendix 5 - 2014 RTSR Adjustment Work Form

The billing determinants utilized in this model were derived from the RRR 2.1.5 – Performance Based Regulation (Table 1) for 2012 annual consumption in compliance with the instruction to use the most recent reported RRR billing determinants. Quantities were reported on an unadjusted basis.

Table 1: Customers, Demand and Consumption filed with the Ontario Energy Board - 2012

The electricity purchase information depicted on worksheet tab '6. Historical Wholesale' was derived from three sets of invoices:

- Niagara Peninsula Energy Inc invoices for the IESO network and line connection costs
- Niagara West Transformation Corporation invoices for the transformation connection costs at their site
- Hydro One invoices for network, line connection and line transformation at the Beamsville TS.

The proposed new rates compared with the current rates are presented below in Table 2:

6. REVENUE TO COST RATIO ADJUSTMENTS

As a result of GPI's 2012 Cost of Service Rate Application (EB-2011-0273), it was agreed by the parties to adjust the street light revenue-to-cost ratio over a two-year period as follows: 65.6% in 2013 and 70.0% in 2014.

GPI has completed the Board's Revenue-to-Cost Ratio Adjustment Workform and calculated the adjustments to the base distribution rates before the application of the price cap adjustments. The worksheet projects minor changes in the residential and streetlight distribution rates as shown in Table 3:

| Street Lighting | 0.14759470 | 0.00000000 | 0.36714950 |

The source for customer count/connection and consumption data, for current Revenue-to-Cost ratios, and for the allocation of Revenue Offset values by rate class was GPI's Cost of Service Application (EB-2011-0273).

7. DEFERRAL AND VARIANCE ACCOUNTS

Chapter 3 of the Board's Filing Requirements and The Report of the Board on Electricity Distributors' Deferral and Variance Account Review Report (the "EDDVAR Report") provide that under the 4th Generation IR, the distributor's Group 1 audited account balances will be reviewed and disposed if the preset disposition threshold of \$0.001 per kWh (debit or credit) is exceeded. Distributors must file in their application Group 1 balances as of December 31, 2012 to determine if the threshold has been exceeded.

GPI completed the Board Staff's 2014 IRM Rate Generator – Tab 5: '2014 Continuity Schedule' and the threshold test showed a claim per kWh of (0.0040). As the results exceeded the threshold test amount, GPI is seeking for deferral and variance account balances disposition in this application. The GPI Group 1 total claim balance is (\$754,597.04). Therefore, the Group 1 account balances are proposed to be disposed in the upcoming rate year.

Actual interest has been calculated based on the Board's prescribed rates. Forecasted interest for the period January 1, 2013 to December 31, 2013 is based upon the last Board prescribed rate of 1.47%. Deferral and RSVAs balances match the 2012 Audited Financial Statements.

The Group 1 Deferred / Variance Account balances claimed to be disposed are in the following table:

GPI confirms that a separate rate rider to dispose of the Global Adjustment amount for non-RPP customers was implemented on January 1,2013. The proposed rate riders calculated using the Rate Generator model for Deferral & Variance Accounts, and for the Global Adjustment sub-account are as follows:

8. LRAM VARIANCE ACCOUNT

For CDM programs delivered within the 2011 to 2014 term, the Board established Account 1568 as the LRAM Variance Account ("LRAMVA") to capture the revenue variance between the Board-approved CDM forecast and the actual results at the customer rate class level.

Specifically, the LRAMVA captures at the customer rate class level, the difference between the following:

i. The results of actual, verified impacts of authorized CDM activities undertaken by electricity distributors between 2011-2014 for both Board-Approved programs and OPA-Contracted Province-Wide CDM programs in relation to activities undertaken by the distributor and/or delivered for the distributor by a third party under contract (in the distributor's franchise area);

AND

 The level of CDM program activities included in the distributor's load forecast (i.e. the level embedded into rates).

In accordance with the Board's *Guidelines for Electricity Distributor Conservation and Demand Management* (EB-2012-0003) issued on April 26, 2012, at a minimum, distributors must apply for disposition of the balance in the LRAMVA at the time of their Cost of Service rate applications. Distributors may apply for the disposition of the balance in the LRAMVA on IR rate applications if the balance is deemed significant by the applicant. All requests for disposition of the LRAMVA must be made together with carrying charges, after the completion of the annual independent third party review.

GPI received the final evaluation report from the OPA of its 2011 CDM results in the Fall of 2012, and expects to receive the report for 2012 CDM results in the Fall of 2013. GPI

EB-2013-0132 Grimsby Power Inc. 2014 4th Generation Incentive Rate-setting Application August 15, 2013

Page 14 of 18

calculated the 1568 LRAMVA account for 2011, but has decided not to apply to dispose of the amount, which at \$34,500.29, was not deemed materially significant. An estimate of 2012 CDM savings was made at the end of the year and, as a result, \$15,958.84 was additionally booked in the LRAMVA account for 2012. However, CDM savings for 2012 have yet to be verified by the OPA and the LRAMVA account will be revised when final results are known. The account activity appears in the Continuity Schedule of the Rate Generator Model; however, the claim amount was manually set to zero. Bookings to the account are in

accordance with the July 2012 AFP-FAQ instructions (Question 5) pertaining to the LRAMVA

SHARED TAX SAVINGS

account.

GPI has completed the Board's 2014 Tax Sharing Model for IRM Applications to calculate if there are savings due to ratepayers as a result of corporate tax savings implemented since the 2013 IRM3 Decision (2013 IRM file number EB-2012-0127).

The shared tax savings model projects no incremental tax savings for 2014, and therefore no requirement for a tax sharing rider. As GPI's Regulatory Taxable Income does not meet the Ontario Small Business Threshold of \$500,000, no rate reduction will apply to 2014 Ontario income tax.

10. Specific Service Charge, Allowances and Loss Factors

GPI is applying to continue the current Specific Service Charges, Allowances and Loss Factors as approved by the Board (EB-2012-0127).

11. MICROFIT GENERATOR SERVICE CHARGE

GPI is applying to continue the current monthly service charge of \$5.40 as approved by the Board (EB-2012-0127).

12. CURRENT TARIFF SHEETS

GPI current tariff sheets are provided in Appendix 1.

13. PROPOSED TARIFF SHEETS

The proposed tariff sheets generated by the GPI 2014 IRM Rate Generator are provided in Appendix 2.

Expected bill impacts for each rate class and for select consumption levels are shown in Table 6. These were derived under a GPI proprietary model due to technical issues with the Rate Generator's Bill Impact worksheet.

Grimsby Power Inc. TARIFF OF RATES AND CHARGES

RESIDENTIAL Service Classification

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant. It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

The purpose of this sheet is to enter the Revenue Cost Ratios as determined from column G on Sheet "10. Proposed R C Ratio Adj" of the applicant's 2013 Revenue to Cost Ratio Adjustment Workform (V2.0) or 2013 COS Decision and Order.

Under the column labeled "Direction", the applicant can choose "No Change" (i.e: no change in that rate class ratio), "Change" (i.e: Board ordered change from COS decision) or "Rebalance" (i.e: to apply any offset adjustments required).

The purpose of this sheet is to remove the transformer allowance from volumetric rates. In Cell E47, enter your Transformer Allowance as per your 2013 Revenue to Cost Ratio Adjustment Workform (V2.0) or your last CoS Decision. Under the column labeled "Transformer Allowance in Rates" select "Yes" if included in that rate class or "No" if not included. Once selected, apply the update button to reveal input cells in which you can enter the number of kW's and the transfromer rate for each rate class.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Sheet "4. RRR Data". For Hydro One Sub-transmission Rates, if you are charged a *combined* Line and Transformer connection rate, please ensure that both the line connection and transformer connection columns are completed.

Please do not enter more than one "Service Charge" for each class for which a base monthly fixed charge applies.

Grimsby Power Inc. TARIFF OF RATES AND CHARGES

RESIDENTIAL Service Classification

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Grimsby Power Inc. TARIFF OF RATES AND CHARGES

Effective and Implementation Date January 01, 2014

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2013-0132

RESIDENTIAL SERVICE CLASSIFICATION

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES – Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, the Global Adjustment, the Ontario Clean Energy Benefit and the HST.
