Subject: Re: Comments re Board File EB-2013-0233

Sorry, I forgot to include my complete address information and am resending the complete email

Re: East Durham Wind Inc. - Notice of Application and Hearing for the Determination of Location of Distribution Facilities Within Road Allowances Owned by the Municipality of West Grey (Board File No. EB-2013-0233)

To: The Ontario Energy Board

Dear Sirs or Madames:

I am a resident of West Grey and reside within the East Durham Wind Project Study Area.

The Council of West Grey, in stating that West Grey is an Unwilling Host and in insisting that meet their requirements before entering discussions about the location of distribution facilities within road allowances, is simply doing its best to protect the welfare of this community. Few options or tools have been made available to our local representatives to ensure that a project of this magnitude is carried out in a manner that best protects the future of our neighbourhood.

I would ask the Ontario Energy Board to support our Elected Representatives and agree that the peer review of NextEra's proposal be carried out before NextEra receives any further approvals.

Regards,

Marian Ratcliffe
