**Subject:** Hearing for file EB-2013-0246

Hearing: EB-2013-0246

With regard to the above hearing for Niagara Region Wind Corporation's application, this should be an oral hearing to allow discussion on this project by the residents of West Lincoln. As a senior on a fixed income ( as most seniors), I will be forced into helping pay for this project which we do not want or need. The benefits will be non-existent and the costs ongoing. If you approve this project to upgrade the electricity transmission line to produce hydro we can't even use, you will be hurting not only seniors, but the vulnerable poor of our community . We will be paying to give the excess hydro away produced by this project.
