March 28, 2007

Dear Ms. Walli,

RE: EB-2005-0356/EB-2007-0511  
2007 Electricity Distribution Rate Application for Burlington Hydro Inc.  
Request for Clarification

On March 28, 2007 Burlington Hydro Inc ("BHI") was contacted by the OEB case manager to request clarification on matters related to the BHI 2007 Distribution Rate Application. This clarification was related to the Primary Metering Allowance for transformer losses included on Sheet 3 of the model. The question as per the email, along with the BHI response is included below.

Question:

On Sheet 3 of your 2007 IRM Model, in Cell E448, you have entered the rate for the Primary Metering Allowance for transformer losses - applied to measured demand and energy as 1.00%. A review of your current Board approved Tariff of Rates and Charges shows that this rate as (1.00)% (i.e. a credit). There is no reference in your application as to why this rate was entered differently to what is on the Board approved tariff sheet. Please clarify whether this was a simple transcription error. If not, please provide a full and complete explanation of the basis for using this level of charge.

Response:

This discrepancy is due to a simple transcription error. BHI does not propose any changes to the primary metering allowance. Sheet 3 of the 2007 IRM Model, in Cell E448 should read (1.00).

As per the request, BHI is providing this response by e-mail to the Board Secretary's office, with one paper copy to follow by courier.

(2)

I can be reached at 905-332-2265 should anything further be required.

Yours truly,
