Re: Dufferin Wind Power Inc. ("DWPI")
Application for Authority to Expropriate Land to Construct, Operate and Maintain
Certain Transmission and Distribution Facilities
Board File No. EB-2013-0268

October 12, 2013

We are affected landowners. Our property is situated across the road from lands Owned by Mark Atkinson, which DWPI has applied to expropriate. DWPI plans to Construct a 230kv above ground power transmission line 100m from our house and 20m from our property line on the Mark Atkinson farm. This is totally unacceptable. The participants in the wind farm are not as close as this. There was no discussion with us, just plain disregard for us as to the location of the line. We are very concerned about these high voltage power lines being so close to our Residence. Studies have proven high levels of EMF from power lines have serious and harmful effects on human health.

We know our property value will drop considerably and our landscape will forever be changed with huge transmission power lines and turbines should this line go in.

The DWPI project is not wanted in this area. From Melancthon Township, to the Town of Shelburne and the County of Dufferin, all have expressed their opposition.

Thankyou for listening to our concerns, and we ask that the Ontario Energy Board deny DWPI permission to expropriate.

Sincerely,

Lyle and Judy Clayton
