LETTER OF COMMENT

Comments:

I notice there are a lot of applications for rate increases and I realize some are necessary, but it seems easier for power companys to get more money from the general public, then to create cut backs across the board within them selves. It is very upsetting to go to work every day and see missuse of public money, Like 6 hydro trucks sitting at the local Breakfast restaurant getting Paid to have Breakfast, What happens for lunch, Maybe travel time from the field to the nearest restaurant.

What ever happened to bag lunch let alone Breakfast. You can only squeeze so much out of a public that deals with cut backs everyday.

You've just about saturated the increases.

Please do not reply with (our people work hard in a dangerous environment) We also work hard in even more dangerous environments.

Cheers raveondave.
