Procedural Order No. 1 EB-2013-0203

The Walker Road Landowners wish to respond to the preliminary issues raised in procedural order No.1 EB-2013, specifically related to the form of agreement offered to affected landowners.

Whereas the Walker Road Landowners have been granted intervenor status, and the Board has noted that the intervenors "*have been identified by the Applicant as individuals who would be required to be offered a form of agreement.*"

and also,

"the Applicant has sought approval for two forms of agreement under section 97: an "Exclusive Option for Substation" and a "Land Use Agreement (Transmission)". "

The Walker Road Landowners note that these two agreements do not address all the landowners affected by the transmission route identified by the Applicant and noted by the Board allowed as intervenors.

DH
RFSD

RFSD

RFSD

WSE

We submit to the Board that the application is incomplete and that either the existing two agreements need to be amended to include all Landowners or a third agreement needs to be drafted for approval.

Sincerely,

Walker Road Landowners:
