I ask for the board to consider a two week extension for requests of intervenor status in this hearing for two reasons:

1. all the farmers affected by this substation and transmission line are currently in the fields harvesting corn and plowing. They do not have the time right now to put towards researching this issue and preparing the required documentation; and
2. the notice put out by NextEra went only to the London Free Press, which is primarily an urban newspaper for that particular demographic.
There are two local newspapers The Forest Standard and the Parkhill Gazette which rural residents subscribe to that were not used as a form of notification. As such, few residents knew of this hearing until just a few days ago giving us little time in which to prepare the required documentation.

Thank you for your consideration in this matter.
