## **LETTER OF COMMENT**

### **Comments:**

How is the \$5.36 per month calculated?? Is there a transmission charge on top of this? Does the \$5.36 include the HST charge ?? If not, that would make the increase more like \$6.06 per month

I heat with hydro, does that make me a typical residential customer? We consume approx. 23,000 kwh per year.

Our local source is Algoma Power, they have already raised their rates not long ago, why do we get charged for nuclear and debt repayment when we are 1000 kms. away from the nearest nuclear plant and as a private enterprise it appears Algoma Power has managed their debt ratios.

Vladimir Putin would be envious of Ontario Hydro's monopoly.

How much Ontario power is exported to the US and at what rate?
