## **LETTER OF COMMENT**

### **Comments:**

In regards to the proposal of Union Gas Limited application to change its natural gas rates effective January 1, 2014, I have the following main concern: again, in Ontario, it seems that some portions of the province are required to subsidize other portions for no specific reason. I did attempt to review the over 900 page submission; however, it was overly onerous and convoluted. Finding specific reasons and explanation was not to be reasonably found.

As with other services such as hydroelectricity, municipalities located outside of the Greater Golden Horseshoe and beyond are responsible for subsidizing the cost of electricity, mostly for peak times.

My concern is that, once again, residents who choose to live outside of specific geographic areas of the province are penalized.

Please provide notification of any further ination, hearing proceedings, or documents in regards to this application (EB-2013-0365).

Yours truly,  
T. Givens
