Subject: stray voltage

To Ontario Energy Board

I am a dairy farmer in Lambton Shores and am very concerned about stray voltage with the proposed Jericho Wind energy Project. I do not feel enough has been done to protect the dairy cows from potential stray voltage with the underground lines that are to be placed near to our dairy facility. We as dairy producers need to see that measures have been made to prevent the voltage from affecting our cows health. Nextera has not answered our questions and concerns when we asked them at their open houses.

Sincerely
Jeff Stewardson
