Regarding: EB-2013-0122-2014 Cost of Service Application

Amendments to Draft Rate Order filed on January 20th, 2014

Dear Ms. Walli,

Please find attached a list of minor amendment to the draft rate order filed on January 20th, 2014. The amendments listed below relate to low voltage charges, recovery period and calculation of stranded meter rate rider, loss factor, updated tariffs and Appendix 2-P_Cost_Allocation.

- With respect to the recovery of low voltage charges, the class specific low voltage rates changed as a result of an update to the load forecast. Although this change flowed through to the revised appendices and rate design, it did not carry through to the draft tariffs sheet. The tariff sheet filed in conjunction with these amendments reflects the correct low voltage rates.
- With respect to the recovery of CHEI's proposed stranded meter rate rider, CHEI calculated its stranded meter rate rider using a two-year disposition period as opposed to a one year disposition. CHEI's revised appendices also showed the stranded meter rate rider as a fixed rate rider, however, it is included in the draft tariffs as a volumetric rate rider. The attached tariff sheet reflects the corrected stranded meter rate rider.
- Although CHEI used the correct loss factor of 1.0663 in its rate design and tariff sheet, the bill impacts provided by CHEI used 1.0662. The corrected bill impacts can be found in the appendices filed in conjunctions with these amendments.

- On worksheet "App. 2-P_Cost_Allocation", a cell (D109) was referencing an incorrect cell from the 'Cost Allocation & RevAllocation' sheet. This error did not affect rates or tariff sheet however, the corrected worksheet can be found in the appendices filed in conjunctions with these amendments.

A revised set of Appendices and tariff sheet is being filed as part of this amendment.

Should there be any questions, please do not hesitate to contact Mr Benoit Lamarche at the contact information provided below.

Yours truly,
