Sir or madam, My name is Ernest Kobelka, I reside in Dryden On. And have for 29 years.

My concern is that no one can tell me why our hydro prices are so much higher than any where else in Canada, even though we produce more hydro than we should use. Now we are told that natural gas prices are about to skyrocket. I'm told that the Ontario Energy board, is the group charged with insuring reasonable and affordable service and pricing of natural gas and electricity in Ontario, and in fact that is your mission statement. I can't help but wonder why these essential services have been allowed to get so out of control.
