Subject: Gas hike of 40%

Hi,

I am deeply concerned about Enbridge wanting to raise gas rates by 40%. I am struggling right now to pay my hydro bills and when I read the article this morning about the possible gas hike, I started to cry. I honestly don't know how I will be able to afford that. I only keep the pilot light on when I work during the day and my place is freezing cold when I come home but doesn't take long to warm up once I turn up the heat on the gas fire place. I do EVERYTHING possible to conserve energy. The charges on my gas/hydro bills are so much higher than what I actually use.

Please, please, do not approve this gas hike. Many people are already struggling in this province. We need a break. Please do the right thing and do NOT approve this 40% increase.

Thank-you

Cheryl
