Subject: Rising Gas Costs

Good day,

I am writing this email as the news has just released the information to the public that there will be a 40% rise in gas costs. First Hydro One and all the problems associated with them and now this. Did your wage increase by 40% to cover these costs because I know mine sure didn't. I am so sick and tired of these rising costs. Something MUST be done as people are near poverty level while companies line their own pockets.

How is my 21 year old son supposed to move out and start his life when he can't afford to live because his wage didn't increase to cover these rising costs. I get that you run a business and I certainly understand increases, but come on 40%? That is just unbelievable.

I have written to our politicians and our Ombudsman in an effort to voice my one small opinion. The people of this province need to come together and begin protesting. Enough is enough!!!
