Subject: Enbridge's gas price increase

Good afternoon

I recently heard of the gas hike in the news and can tell you, every appliance in my home that can be gas is. This will certainly cost me more than \$400 more per year. Although I understand the need to for companies to increase costs, this amount is absolutely unacceptable. Based on cost of living and other increases that Ontarians have had to endure, this will mean many people will have less disposable income to put back into our economy. This will not help Ontario.

I have sent an email to my MPP and Premier Wynne to ensure they understand that my family will need to look at other parties in whom to place our trust in the next election.
