I signed a petition in London Ontario on March 25 2014 regarding the cost of Natural Gas increase.

Most citizens are paying enough now for living expenses and our wages don't increase to reflect your increase, so how are average people supposed to pay all these bills?

There is not enough money in the world to cover each Canadian when/if we are all forced to go on Welfare /unemployment due to job losses, and then on top of this we have to keep up with higher rates , that seem to face us each new day in some manner.

I oppose the increase of Gas costs.
