Subject: Gas increases

Hello,

I would like to lodge a complaint about the proposed increase in our gas bill. It is unbelievable that a 40% increase would be allowed, in a day where raise are non existent except in the public sector. We the residents of Ontario are being gouged, while 1.1 billions dollars were wasted on the gas plant, executive salaries are unfathomable and the average citizen in Ontario has not seen a raise or are below the poverty line. I have senior parents that live on a set pension and is finding it hard enough with everything increasing exorbitant amounts now add another 40% for gas, 30% for hydro. There is such a disconnect with the citizens of Ontario and our government, large corporation like enbridge and hydro. We can not afford to pay for all your high end salaries and wastes of our hard earned money. Be prepared for people leaving Ontario, the money pit.
