**Subject:** Letter of Comment regarding Enbridge application E-2014-0039

To the Ontario Energy Board,

This is a Letter of Comments regarding Enbridge application E-2014-0039 for a natural gas rate increase of 40%.

As a gas consumer, I see no justification for this increase nor understand how the board has approved this request.

The Natural gas spot market price did not increase by 40% but is stable and going down as you see in the graph below (see link).

Enbridge request has no basis for justification and I strongly encourage the board to revise its position
