**Subject:** Outrageous Natural Gas Rate Hike

Dear Chair person,

It was first reported last week on the Ottawa CTV network, that Enbridge Gas had made a request to the Ontario Energy Board for a rate increase of 40%. To-day, I am hearing that this request has been granted. This is a totally outrageous and egregious abuse of your authority.

There would not be a single resident of Ontario, that would have thought for a second, that this massive increase would be granted.

As late as this summer, Enbridge had been aggressively selling Natural Gas, as an inexpensive fuel option, with massive reserves. You have to know this.

Exactly who does the Ontario Energy Board represent? What exactly are the affiliations of the Board Members?

I am calling for the Board's resignation. Please advise me how this option can be exercised by Ontario citizens.

Incompetence in motion.

Truly

Robert Russell
