Subject: EB-2013-0442 - Sumac Ridge

The Gray Road transmission line and a distribution line crossing Wild Turkey Road components of the Sumac Ridge project, will NOT ensure reliability and quality of electricity services and will also not meet high safety and environmental standards set under government policy. The applicant has indicated that the Sumac Ridge project might supply energy to meet the needs of 1800 residents.

Pontypool, Bethany and Janetville - total 2241 households, therefore this project will not meet their needs.

The majority of these residents are very much opposed to this project and we would therefore ask you to please refuse the abovementioned application.

Yours truly,
JIM NEWTON
