Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
2300 Yonge St, Suite 2701
Toronto ON M4P 1E4

Dear Ms. Walli:

**Board File No. EB-2014-0134 Ontario Energy Board Consultation
New Demand Side Management Framework for Natural Gas Distributors
Energy Probe – Notice of Interest in Participation**

Pursuant to the letter from the Board on April 10, 2014 outlining the consultation process by which the Board will develop a new Demand Side Management (DSM) Framework for rate-regulated natural gas distributors for the period January 2015 to December 2020, Energy Probe Research Foundation (Energy Probe) is hereby providing its Notice of Interest in Participation in the EB-2014-0134 proceeding for the Board's consideration.

Energy Probe apologizes for filing its Notice of Interest in Participation past the due date. Energy Probe has become aware of a number of issues it wishes to pursue in this Matter and has therefore availed itself of expert support. A request for cost eligibility with respect to participation by Energy Probe is enclosed.

Should you require additional information, please do not hesitate to contact me.

Yours truly,

David S. MacIntosh
Case Manager

Board's Proposed Consultation Process – Request for Funding

i) Statement of Interest

Energy Probe Research Foundation (Energy Probe) is a non-profit environmental and consumer organization which promotes economic efficiency in the use of resources. Energy Probe will be representing its residential customer supporters in Ontario, which we have some number of thousands, and also representing a broader concern with respect to the overall financial health and operational integrity of our utilities.

The Foundation, one of Canada's largest environmental policy organizations and Canada's largest energy policy organization, has over 30,000 supporters, half of them in Ontario, of which most have tangibly expressed interest in energy issues. Energy Probe also has a strong consumer focus and is frequently acknowledged in the media as a consumer watchdog. Energy Probe participates in conferences and regulatory forums on energy issues which it believes to be in the consumer interest. In this instance, Energy Probe submits that it has met the Board's cost eligibility criteria under section 3.03 (a) of the *Practice Direction on Cost Awards*.

Many Energy Probe supporters receive information updates. Energy Probe frequently has direct communication with the public through interviews with the media, communications on the Internet, public speaking, and direct mail communication with its supporters.

Energy Probe has a history of representing the interests of many Ontarians who are not financial supporters, and receives active feedback on its initiatives through public and media interaction.

Energy Probe has appeared before the Board for over 30 years, during which time it has been noted for its cooperative spirit, its often-unique perspective, and its contribution to the development of fair and reasonable rates for both individual consumers and commercial/industrial purchasers of natural gas and electricity. Its approach has been to look beyond annual cost minimization to consider what would be best for the marketplace in the long term.

Energy Probe then, is a non-profit organization which relies on individual donations to help protect consumers' interest. Without the prospect of funding assistance, its participation in the consultation initiatives of the Ontario Energy Board, and its ability to produce policy position papers, would be quite limited as well.

Members of Energy Probe's team regularly attend meetings of its Board of Directors, making presentations, providing written summaries of activities, answering the questions of Board Members, and receiving their input.

In addition, Energy Probe reports its regulatory priorities to supporters by direct mail and receives both financial support and comments in response from those supporters.

Energy Probe has a long and unique record of advocating measures designed to lower utility risk, specifically for the purpose of reducing the cost of capital over the long term. Measures of this kind that Energy Probe has pursued include rate rebalancing to stabilize utility income expectations, even in the event of declining volumes, and also measures that reduce utility risk related to commodity costs.

ii) Energy Probe's Participation

Energy Probe intends to fully participate in all of the phases of the discussions, including but not limited to attendance at consultation meetings and the submission of written comments as requested by the Board.

Energy Probe would like to remind the Board that in prior Board processes in which it has expressed its interest, it has participated well beyond minimum requirements.

iii) Other Sources of Funding

Energy Probe will access funding from general donations from its supporters to make up any shortfall should it exceed the cost allowances of the Board. Energy Probe relies on volunteers to be able to support its regulatory and other work, including a volunteer Board of Directors.

iv) Energy Probe's Advisory Team

Energy Probe will be assisted by the following advisory team, to whom communications concerning this process should be directed:

Roger Higgin
Sustainable Planning Associates Inc.
15 Malabar Place
Toronto ON M5B 1A4
Tel: 416 391-0738
Email: Roger Higgin <spainc@rogers.com>

AND

David MacIntosh
