Letter of Comment

My wife and I are pensioners living on a fixed income. A 40% increase in gas to service our home is totally unacceptable for us. It is unreasonable to give any monopoly such an outlandish increase. No individual gets this amount of increase ever no matter what the circumstances. The 40% increase is also subject to taxes and the increase will also impact all products produced in this Province. Therefore the cost increase will not be 40% which is in itself ridiculous but will result in substantially greater increase in costs to the public. The impact to us as pensioners and to anyone trying to make ends meet will be significant.

Your agency is the sole judge with regard to these increases and even if it is temporary, which I doubt, once an increase is in place it is difficult to roll it back. We plead with you to consider the impact on the citizens of this Province and not just the bottom line to Enbridge. Enbridge has made substantial amounts as a result of the harsh winter we have all had to endure. Everyones heating costs have gone up greatly even without the increase in rates. Enough is enough. Next winter will probably be milder and Enbridge will once again come out on top as a result of these massive increases.

Please do the responsible thing and roll back these increases to what is reasonable.

David and Sandra Dodwell
