Dear Ms. Walli:

**Re: Enbridge Gas Distribution Inc. ("EGD" or the "Company")  
Draft Accounting Order – 2014 to 2018 Rate Proceeding EB-2012-0459**

Attached please find the Company's draft materials for inclusion in the Board's Accounting Order for 2014, which have been prepared subsequent to the Decision with Reasons issued by the Ontario Energy Board (the "Board") on July 17, 2014, in EGD's 2014-2018, 2<sup>nd</sup> generation Custom Incentive Regulation Rate Proceeding, docket EB-2012-0459.

While the Board's Decision approved the establishment of specific deferral and variance accounts for each of the years 2014 through 2018, this Draft Accounting Order has only included definitions, scope and indicative accounts and entries in relation to deferral and variance accounts approved for Fiscal 2014.

Enbridge will file an Accounting Order request for the deferral and variance accounts to be established for each of the Fiscal Years 2015 through 2018 following the completion of the Approved Rate Processes for each of those years.

The materials for inclusion in the Board's Draft Accounting Order for 2014 deferral and variance accounts include the following:

- Appendix "A" - Accounting treatment, scope and definition of all approved 2014 deferral and variance accounts.

**Board Determined Time Table:** Per the Board's Decision, the materials for the Draft Accounting Order have been circulated for review by all active participants in the EB-2012-0459 rate proceeding.

## APPENDIX "A"

### 2014 Deferral and Variance Accounts

ACCOUNTING TREATMENT FOR A  
PURCHASED GAS VARIANCE ACCOUNT  
("2014 PGVA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 PGVA is to record the effect of price variances between actual 2014 gas purchase prices and the forecast prices that underpin the revenue rates to be charged in 2014. Without this deferral account, the ratepayers and the Company are exposed to the risk of purchased gas price variances, which could unduly penalize or benefit one party at the benefit or expense of the other. Lower than forecast gas purchase prices would result in an over recovery from the customers and higher prices would result in an under recovery to the Company. This deferral account ensures that such effects are eliminated.

Methodology

The actual unit cost is determined by dividing the total commodity and transportation costs (less the demand charges related to unutilized TransCanada firm service transportation capacity, if any) plus any other costs associated with emerging gas pricing mechanisms incurred in the month by the actual volumes purchased in the month. The rate differential between the PGVA reference price and the actual unit cost of the purchases, multiplied by the actual volumes purchased, is recorded in the PGVA monthly.

The fixed cost component of the TransCanada firm service transportation costs (i.e., Transportation Demand Charge) is included in the determination of the reference price. However, any demand charges relating to unutilized transportation capacity, either forecast or actual, are excluded. This treatment of forecast and actual Transportation Demand Charges for unutilized transportation capacity is consistent with the Board's concerns that these amounts be excluded from the PGVA.

Since all transportation costs on volumes purchased by the Company related to forecast utilized capacity are included in the determination of the PGVA reference price, any changes in the TransCanada tolls will be recorded in the PGVA. Any toll changes related to the cost of forecast unutilized capacity will not be recorded in the PGVA and therefore, requires separate adjustment. The inclusion of changes in TransCanada tolls in the PGVA is consistent with past practice.

Since the transportation tolls for the Alliance and Vector pipelines that were used in the determination of the PGVA reference price were based upon an estimate, any variation between the actual transportation costs (including associated fuel costs) and the estimated transportation costs will be recorded in the PGVA.

Since transportation costs related to the transport of Western Canada Bundled T-service volumes are not included in the derivation of the PGVA reference price, changes in TransCanada tolls will be recorded in the PGVA as a separate adjustment.

For the period January 1, 2014 to December 31, 2014 expenditures related to TransCanada's Storage Transportation Services, including balancing fees related to TransCanada's Limited Balancing Agreement, will be recorded in the 2014 PGVA. The 2014 PGVA will also record amounts related to a Limited Balancing Agreement with Union Gas.

The PGVA will record adjustments related to transactional services activities which are designed to record the impact of direct and avoided costs between the PGVA and the TSDA. These adjustments are required to ensure appropriate allocation of costs and benefits to the underlying transactions and appropriate recording of amounts in the 2014 PGVA and 2014 TSDA for purposes of deferral account dispositions.

In addition, the 2014 PGVA will record the amounts related to unforecast penalty revenues received from interruptible customers who do not comply with the Company's curtailment requirements, unauthorized overrun gas revenues, the use of electronic bulletin boards, and the unforecast Unabsorbed Demand Charge ("UDC") that arises as a consequence of the Company voluntarily leaving transportation capacity unutilized in order to gain a net benefit for the customer by purchasing lower priced unforecast discretionary delivered supplies.

The 2014 PGVA will also record an inventory valuation adjustment every time a recalculated "Utility Price" or PGVA Reference Price comes into effect at the beginning of a quarter. The adjustment consists of the storage inventory valuation adjustment necessary to price actual opening inventory volumes at a rate equal to the Board approved quarterly PGVA reference price.

The 2014 PGVA will also record any refund/collection associated with Board approved Gas Cost Adjustment Riders.

The Company will record, at the time a Banked Gas Account Balance is purchased from a customer, the difference in the amount payable to the customer and the amount included in the PGVA (Transportation Service Rider A). This amount would be credited to a sub-account of the PGVA. In the event the Company incurs unforecast UDC costs as a result of having to purchase Banked Gas Account Balances then the amount in such sub-account will be used to offset corresponding UDC costs. All amounts remaining in this sub-account, after offsetting these UDC costs, will be rolled up into the PGVA.

The commodity sale price on the disposition of Banked Gas Account Balances, the incentive sale price, is set at 120% of an average Empress price over the 12 months of the contractual year. Any amount in excess of 100% of the gas supply charge stated in the applicable rate schedule, net of the commodity related bad debt, will be included in the PGVA.

Simple interest is to be calculated on the opening monthly balance of the 2014 PGVA using the Board Approved EB-2006-0117 interest rate methodology. The balance of the 2014 PGVA, together with carrying charges, will be disposed of in a manner designated by the Board in a future rate hearing.

ACCOUNTING TREATMENT FOR A  
TRANSACTIONAL SERVICES DEFERRAL ACCOUNT  
("2014 TSDA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 TSDA is to record the incremental ratepayer share of net revenue from transportation and storage related transactional services, to be shared 90/10 between EGD's ratepayers and shareholders.

In the event that the ratepayer share of 2014 TS net revenues exceeds \$12 million, then such amounts over \$12 million will be credited to the TSDA. In the event that the ratepayer share of 2014 TS net revenues is less than \$12 million, then Enbridge will be credited with the difference between the actual ratepayer share of 2014 TS net revenues and \$12 million, which would be reflected as a debit in the TSDA.

Net revenue is defined as gross revenues for providing these services less any direct incremental costs incurred, plus, any avoided costs. Direct incremental costs represent those direct costs incurred as a result of a transactional service activity and avoided costs are those costs that have been avoided as a result of a transactional service activity. Typical direct incremental costs and avoided costs would include transportation costs, fuel costs, charges for name changes, re-direct charges, etc.

Simple interest is to be calculated on the opening monthly balance of the 2014 TSDA using the Board Approved EB-2006-0117 interest rate methodology. The balance of the 2014 TSDA, together with carrying charges, will be disposed of in a manner designated by the Board in a future rate hearing.

Accounting Entries

1. To record incremental Transactional Services revenues and costs:

Debit:	Other Income	(Account 319. 010)

Debit/Credit:	2014 TSDA	(Account 179. 804)

To record either the incremental ratepayer portion of net revenues generated from transactional services activities in excess of the \$12 million included in rates or the recognition of amounts recoverable by EGD where net TS revenue is less than \$12 million.

2. Allocation of costs and benefits to Transactional Services activities:

Debit/Credit:	2014 TSDA	(Account 179. 804)

ACCOUNTING TREATMENT FOR AN  
UNACCOUNTED FOR GAS VARIANCE ACCOUNT  
("2014 UAFVA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 UAFVA is to record the cost of gas that is associated with volumetric variances between the actual volume of unaccounted for gas ("UAF") and the 2014 Board approved UAF volumetric forecast.

The gas costs associated with the UAF variance account will be calculated at the end of calendar 2014 based on the estimated volumetric variance between the 2014 Board approved level and the estimate of the 2014 actual UAF. An adjustment will be made to the UAFVA in the subsequent year to record any differences between the estimated UAF and actual UAF.

The UAF annual variance will be allocated on a monthly basis in proportion to actual sales and costed at the monthly PGVA reference price.

Carrying costs for the UAFVA will be calculated using the Board Approved EB-2006-0117 interest rate methodology. The balance of the UAFVA, together with the carrying charges, will be disposed of in a manner designated by the Board in a future rate hearing.

Accounting Entries

1. To record the estimated volumetric variance between the December 31, 2014 actual UAF and the Board Approved level:

Debit/Credit:	2014 UAFVA	(Account 179. 864)

Credit/Debit:	Interest expense	(Account 323. 000)

To record simple interest on the opening monthly balance of the 2014 UAFVA using the Board Approved EB-2006-0117 interest rate methodology.

# ACCOUNTING TREATMENT FOR A STORAGE AND TRANSPORTATION DEFERRAL ACCOUNT ("2014 S&TDA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 S&TDA is to record the difference between the forecast of Storage and Transportation rates (both cost of service and market based pricing) included in the Company's approved rates and the final Storage and Transportation rates (both cost of service and market based pricing) incurred by the company. It will also be used to record variances between the forecast Storage and Transportation rebate programs and the final rebates received by the company. The accounting treatment for the S&TDA is in line with that established for the 2008 S&TDA, which recognized that storage and transportation services may be provided to the Company by suppliers other than Union Gas and at market based rates.

The 2014 S&TDA will also record the variance between the forecast Storage and Transportation demand levels and the actual Storage and Transportation demand levels. In addition, this account will be used to record amounts related to deferral account dispositions received or invoiced from Storage and Transportation suppliers.

The 2014 S&TDA will also record the variance between the forecasted commodity cost for fuel and the updated QRAM Reference Price.

Simple interest is to be calculated on the opening monthly balance of the 2014 S&TDA using the Board Approved EB-2006-0117 interest rate methodology. The balance of this account, together with carrying charges, will be disposed of in a manner designated by the Board in a future rate hearing.

ACCOUNTING TREATMENT FOR A  
DESIGN DAY CRITERIA TRANSPORTATION DEFERRAL ACCOUNT  
("2014 DDCTDA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 DDCTDA is to record the actual cost consequences of unutilized transportation capacity contracted by the Company to meet increased requirements resulting from the Peak Gas Design Day Criteria ("PGDDC"). EGD updated its PGDDC in 2013 and 2014 to meet a 1 in 5 recurrence interval. The impact of this update was phased in equally over the two years. For 2013, EGD updated its heating degree days used within its design day criteria for 2013 to represent an increase from 39.5 to 40.4 for Central Region, an increase from 45.1 to 46.7 for Eastern Region, and an increase from 36.3 to 37.6 for Niagara Region.

For 2014, EGD updated its heating degree days used within its design day criteria for 2014 to represent an increase from 40.4 to 41.4 for Central Region, an increase from 46.7 to 48.2 for Eastern Region, and an increase from 37.6 to 38.8 for Niagara Region.

The Company estimates that the cost consequences of unutilized transportation capacity will be approximately \$41.4 million in the 2014 DDCTDA. Where a less expensive firm pipeline alternative(s) is utilized and or the Company still incurs unutilized costs, then only those incremental costs actually incurred will be recorded in the account and will be eligible for collection. The intent is that if less expensive options arise they can be pursued along with lower impacts within the DDCTDA. The Company also committed, to the extent possible, to mitigate any unutilized transport and to record in the DDCTDA any revenues associated with that mitigation.

Simple interest is to be calculated on the opening monthly balance of this account using the Board approved EB-2006-0117 interest rate methodology. The balance of this account, together with carrying charges, will be disposed of in a manner to be designated by the Board in a future rate hearing.

ACCOUNTING TREATMENT FOR AN  
UNABSORBED DEMAND COST DEFERRAL ACCOUNT  
("2014 UDCDA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 UDCDA is to record the actual cost consequences of unutilized transportation capacity contracted by the Company to meet increased requirements resulting from the Peak Gas Design Day Criteria ("PGDDC"). EGD updated its PGDDC in 2013 and 2014 to meet a 1 in 5 recurrence interval. The impact of this update was phased in equally over the two years. The 2014 UDCDA is intended to capture the cost consequences of unutilized transportation capacity above the amount associated with the 2014 DDCTDA.

The Company estimates that the cost consequences of unutilized transportation capacity will be approximately \$62.8 million in the 2014 UDCDA. Where a less expensive firm pipeline alternative(s) is utilized and or the Company still incurs unutilized costs, then only those incremental costs actually incurred will be recorded in the account and will be eligible for collection. The intent is that if less expensive options arise they can be pursued along with lower impacts within the UDCDA. The Company also committed, to the extent possible, to mitigate any unutilized transport and to record in the UDCDA any revenues associated with that mitigation.

Simple interest is to be calculated on the opening monthly balance of this account using the Board approved EB-2006-0117 interest rate methodology. The balance of this account, together with carrying charges, will be disposed of in a manner to be designated by the Board in a future rate hearing.

("2014 GGEIDA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 GGEIDA is to record any impacts to EGD resulting from federal and or provincial regulations related to greenhouse gas emission requirements, along with the impacts resulting from the sale of, or other dealings in earned carbon dioxide offset credits.

Simple interest is to be calculated on the opening monthly balance of this account using the Board approved EB-2006-0117 interest rate methodology. The balance of this account, together with carrying charges, will be disposed of in a manner designated by the Board in a future rate hearing.

ACCOUNTING TREATMENT FOR A  
CUSTOMER CARE CIS RATE SMOOTHING DEFERRAL ACCOUNT  
("2014 CCCISRSDA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 CCCISRSDA is to capture the difference between the forecast customer care and CIS costs versus the amount to be collected in revenues as approved by the Board in the EB-2011-0226 CIS Customer Care Settlement Agreement and proceeding. The amount to be debited or credited to the deferral account, for each of 2013 through 2018 years, will be calculated by multiplying the difference in cost per customer and smoothed cost per customer by the updated customer forecast for that year. The balances in the account will not be cleared during the 2013 through 2018 period. The cumulative balance will build up during the years 2013 to 2015 when the cost per customer exceeds the smoothed cost per customer being collected in rates, and then will be drawn down during the years 2016 to 2018 when the cost per customer is lower than the smoothed cost per customer being collected in rates. After 2018, any remaining balance in the account it is to be cleared along with the clearance of other deferral and variance accounts.

Interest is to be calculated on the opening monthly balance of this account at a fixed annual rate of 1.47%, and will not change during the period the deferral account is allowed to continue through 2018. The interest carrying charges will be disposed of annually at the same time of clearance of all other deferral and variance accounts.

CUSTOMER CARE SERVICES PROCUREMENT DEFERRAL ACCOUNT  
("2014 CCSPDA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 CCSPDA is to capture the costs associated with the benchmarking, tendering and potential transition of customer care services to a new service provider(s). The majority of EGD's 2013 through 2018 customer care costs were established and approved for recovery in the EB-2011-0226 proceeding, including services provided by two major outsourced customer care agreements which expire on December 31, 2017, subject to extension rights available to the Company. However, the costs related to the process of benchmarking and tendering for services provided by these agreements, to confirm the validity of pricing and quality for such services, and where appropriate identify new service provider(s), were not included, nor were any potential transition costs to new providers. The Ontario Energy Board's EB-2012-0459 Decision approves the continuation of this account through 2016, but limits the total amount recordable in the account to \$5 million.

Simple interest is to be calculated on the opening monthly balance of the 2014 CCSPDA using the Board approved EB-2006-0117 interest rate methodology. The balance of this account, together with carrying charges, will be disposed of in a manner designated by the Board in a future rate hearing.

ACCOUNTING TREATMENT FOR AN  
AVERAGE USE TRUE-UP VARIANCE ACCOUNT  
("2014 AUTUVA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 AUTUVA is to record ("true-up") the revenue impact, exclusive of gas costs, of the difference between the forecast of average use per customer, for general service rate classes (Rate 1 and Rate 6), embedded in the volume forecast that underpins Rates 1 and 6 and the actual weather normalized average use experienced during the year. The calculation of the volume variance between forecast average use and actual normalized average use will exclude the volumetric impact of Demand Side Management programs in that year. The revenue impact will be calculated using a unit rate determined in the same manner as for the derivation of the Lost Revenue Adjustment Mechanism (LRAM), extended by the average use volume variance per customer and the number of customers.

Simple interest is to be calculated on the opening monthly balance of this account using the Board approved EB-2006-0117 interest rate methodology. The balance of this account, together with carrying charges, will be disposed of in a manner to be designated by the Board in a future rate hearing.

POST-RETIREMENT TRUE-UP VARIANCE ACCOUNT  
("2014 PTUVA")

For the 2014 Fiscal Year  
January 1, 2014 to December 31, 2014)

The purpose of the Post-Retirement True-Up Variance Account (PTUVA) is to record the differences between the 2014 forecast pension and post-employment benefit expenses of \$37.2 million and the actual pension and post-employment benefit expenses (both determined on an accrual basis). The 2014 PTUVA will be cleared in a manner that will allow for all variances between \$37.2 million and actual pension and OPEBs expenses to be recorded and cleared, subject to the condition that any amounts in excess of \$5 million (credit or debit) will be transferred into a next year's account, so that large variances can be cleared over time (smoothed). Under this approach, the maximum amount (debit or credit) that will be cleared from the 2014 PTUVA will be \$5 million, and any remaining amounts will be transferred to the 2015 PTUVA for future clearance.

Simple interest is to be calculated on the opening monthly balance of this account using the Board approved EB-2006-0117 interest rate methodology. The balance of this account, together with carrying charges, will be disposed of in a manner designated by the Board in a future rate hearing.

TRANSITION IMPACT OF ACCOUNTING CHANGE DEFERRAL ACCOUNT  
("2014 TIACDA")

For the 2014 Fiscal Year  
January 1, 2014 to December 31, 2014)

The purpose of the 2014 Transition Impact Accounting Change Deferral Account (TIACDA) is to track and roll forward un-cleared amounts recorded in the 2013 TIACDA. In EB-2011-0354, the Board approved the recovery of Other Post Employment Benefit (OPEB) costs, forecast to be \$90 million at the end of 2012, over a 20 year period, commencing in 2013. The OPEB costs needed to be recognized as a result of Enbridge having to account for post-employment expenses on an accrual basis, upon transition to USGAAP for corporate reporting purposes in 2012. The use of USGAAP for regulatory purposes was approved within the 2013 rate proceeding, EB-2011-0354. The final estimate of OPEB costs to be recovered over 20 years, which was recorded in the TIACDA at the end of 2012, was \$88.7 million. The first installment of \$4.4 million (1/20 of \$88.7 million) was approved for recovery in EB-2013-0046. The balance in the account will continue to be drawn down and cleared to ratepayers by \$4.4 million annually, with the un-cleared balance to be rolled forward to the subsequent year's TIACDA until clearance is complete.

(January 1, 2014 to December 31, 2014)

The purpose of the 2014 OBRVA is to track and record the ratepayer portion of net revenue for Open Bill Services. The account allows for net annual revenue amounts in excess of \$7.389 million to be shared 50/50 with ratepayers, and allows for a credit to Enbridge in the event that net annual revenues are less than \$4.889 million, equal to the shortfall between actual net revenues and \$4.889 million. The net revenue amounts will be determined in accordance with the EB-2009-0043 Board Approved Open Bill Access Settlement Proposal dated October 15, 2009, with updated Fees and Costs as determined in the EB-2013-0099 proceeding.

EARNINGS SHARING MECHANISM DEFERRAL ACCOUNT  
("2014 ESM DA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 ESM DA is to record the ratepayer share of utility earnings that result from the application of the earnings sharing mechanism. If the 2014 actual utility return on equity, calculated on a weather normalized basis, exceeds the Board's approved formula ROE, which was utilized in determining 2014 allowed revenues, the resultant amount will be shared equally (i.e., 50/50) between the Company's ratepayers and shareholders. The calculation of a utility return for earnings sharing determination purposes, will include all revenues that would otherwise be included in earnings and only those expenses (whether operating or capital) that would otherwise be allowable deductions from earnings as within a cost of service application. In addition, the following are examples of shareholder incentives and other amounts which are outside of the ambit of the earnings sharing mechanism: amounts related to Demand Side Management incentives ("DSM DA") and Lost Revenue Adjustment Mechanism ("LRAM"), amounts related to Transactional Services incentives, amounts related to Open Bill program incentives, and amounts related to Electric Program Earnings Sharing incentives ("EPESDA").

ACCOUNTING TREATMENT FOR A  
CONSTANT DOLLAR NET SALVAGE ADJUSTMENT DEFERRAL ACCOUNT  
("2014 CDNSADA")

For the 2014 Fiscal Year  
(January 1, 2014 to December 31, 2014)

The purpose of the 2014 CDNSADA is to record and clear the 2014 credit to ratepayers that results from the adoption of the Constant Dollar Net Salvage (CDNS) approach for determining the net salvage percentages to be included within EGD's depreciation rates. As a result of the adoption of the CDNS approach, the Company has an estimated excess net salvage reserve when compared to the reserve which accumulated while the Company employed the Traditional Method for determining net salvage percentages. The net salvage reserve is recorded within a liability account which, for utility rate base determination purposes, is accounted for as an offset against specific property, plant and equipment asset category accumulated depreciation balances. Within EGD's EB-2012-0459 decision (2014 – 2018 Rate Application), the Board ordered the refund to ratepayers of \$379.8 million in net salvage reserve over the 2014 – 2018 period, through rate rider D. The annual refund amounts are: 2014 - \$96.8 million, 2015 - \$90.4 million, 2016 - \$83.9 million, 2017 - \$77.5 million, and 2018 - \$31.1 million.

On a monthly basis each year, the net salvage liability (or accumulated depreciation for utility rate base purposes) will be debited by the forecast monthly rider amount, with a corresponding credit recorded in the CDNSADA. Within the same month, the CDNSADA will be debited, with a corresponding credit to accounts receivable, for the actual amount refunded to customers through rate rider D.

In each year, the final balance in the account will be the cumulative variance between the amounts proposed for clearance and the actual amounts cleared. The balance will be transferred to the following year's CDNSADA, and at the end of 2018 any residual balance will be cleared in a post 2018 true up, ensuring the actual amount cleared is equivalent to the required \$379.8 million.

No interest is to be calculated on the balance in this account.
