BOARD STAFF INTERROGATORIES ON INTERVENOR EVIDENCE

Interrogatory #1

Preamble:

TransCanada Energy Limited ("TCE") filed evidence which set out suggested alternative penalty charges to be levied on Union's customers that did not meet their contractual obligations during the months of February and March 2014. TCE calculated these alternative penalty charges based on Enbridge's methodology for calculating Unauthorized Supply Overrun charges for Rate 125 customers.

Questions:

- a) Please provide the daily prices (150% of highest Dawn price) that support the graphs on page 4 of TCE's evidence.
- b) Please clarify whether TCE is suggesting that Enbridge's Rate 125 Unauthorized Supply Overrun methodology be used to calculate the penalty charge for the Southern Bundled T-Service customers that did not meet their winter checkpoint balancing obligations in February 2014.
- c) If TCE is suggesting that Enbridge's Rate 125 Unauthorized Supply Overrun methodology also be used to calculate the penalty charge for the Southern Bundled T-Service customers that did not meet their winter checkpoint balancing obligations in February 2014, please specify which daily price would be used to calculate the penalty charge for these customers.
