Board File number: EB-2011-0043
Regional Planning Standing Committee (“RPSC”)

Please accept this letter as an application to sit on the **Regional Planning Standing Committee (“RPSC”)** as an LDC representative.

Applicant:
Bruno Pereira, P. Eng, MBA
Director of Engineering
Milton Hydro Distribution Inc.

I have over 20 years of LDC sector experience that includes multiple stakeholder engagement initiatives with municipal, regional, and community representatives. I also have extensive experience with system planning processes at both the procedural and technical level including multiple joint planning efforts with Hydro One and the OPA.

As the Director of Engineering at Milton Hydro I am responsible for Milton Hydro’s system planning efforts including our participation in the ongoing GTA West Regional Planning Process (more specifically the GTA Northwest Sub-Region). I was also a member of both the **Process Planning Working Group** (responsible for producing the Regional Infrastructure Planning Process report) and the **Distribution Network Investment Planning Working Group**.

In addition to my involvement with the Renewed Regulatory Framework working groups I have been involved with other industry working groups such as the EDA’s Operations Council, Core Council and Advisory Committee and was a member of the ESA/Ministry working group that preceded Ontario Regulation 22/04. I have also been part of various community and industry presentations such the OEB’s webinar on the Regional Infrastructure Planning Process and community based presentations on issues ranging from infrastructure rebuilds to the responsibilities associated with private pole line ownership.

As a member of the Process Planning Working Group and the Distribution Network Investment Planning Working Group I was actively involved throughout the entire

process and contributed to both group's final product. As a member of the **Regional Planning Standing Committee** I can make a positive contribution to the committee's success by drawing on the knowledge and experience that allowed me to make a positive contribute to the two previous working groups. I can also deliver an understanding of the issues and discussions which led to the Regional Infrastructure Planning Process report and how current developments may impact the original report.

Sincerely,
Bruno Pereira, P. Eng, MBA
Director of Engineering
Milton Hydro Distribution Inc.
