Re: St Thomas Energy Inc. EB-2014-0113 **2015 Cost of Service Electricity Distribution Rate Application Responses to Interrogatories**

Dear Ms. Walli:

In accordance with PO1, please find accompanying this letter, STEI's responses to interrogatories submitted by Board staff and intervenors. An electronic copy of these responses has been filed via the Board's Regulatory Electronic Submission System.

Please contact the undersigned if you have any questions with regard to STEI's submission.

Yours Truly, St. Thomas Energy Inc.

Robert Kent, CPA, CGA Director, Finance and Regulatory Affairs rkent@sttenergy.com (519) 631- 5550 x 5258

File Number:EB-2014-0113Tab:2Schedule:1Page:1 of 10Date Eilerte2 and 2 and 2

Date Filed: September 9, 2014 1-Staff-1 Ref: Ex. 1/T. 5/Sch. 3/Att. 2, 2012 Audited Financial Statements Per note 17 of the financial statements, it appears that STEI has assumed net liabilities of \$1,149,191 from Ascent Energy Services Inc. a) Please explain why STEI chose to restructure to assume a net liability from Ascent Energy Services Inc. b) Please explain how STEI decided which assets and liabilities to assume from Ascent Energy Services Inc. c) Please explain how the restructuring is in the best interest of STEI's rate payers. d) In note 17: The net liabilities are offset against the related party receivable. Please explain i. whether this was a receivable to STEI or Ascent Energy Services. If it was a receivable to STEI, please explain why the net liabilities are reduced by a receivable to STEI. ii. Please clarify what the line "excess of fair market value of equipment transferred over net book value of \$(586,061)" means. Response Introduction In order to properly respond to each part of the question above, STEI feels it is prudent to review the transaction identified in Note 17. STEI did not assume the net liability because it was paid a fair value amount to take the net liability. Upon reorganization on January 1, 2012, financial consideration was provided to St. Thomas Energy Inc. ("STEI") for the net liabilities assumed. In other words, Ascent Energy Services Inc. ("AESI") paid STEI to assume the liabilities at fair market value. That way, STEI was effectively "kept whole" on reorganization.

- 28 Specifically,
- 29 Book Value of Net Liabilities \$1,149,191
- 30 Less: Fair Market Value of Assets
- 31 over Net Book Value (\$586,061)
- 32 AESI Payment* <u>\$563,130</u>

File Number:	EB-2014-0113
Tab: Schedule: Page:	2 1 2 of 10
Date Filed:	September 9, 2014

33	* At the time of the trai	nsaction in early January, STEI owed AESI \$2,079,203 (as per note 15 for			
34	the December 31, 2011 balance). Since the amount payable to STEI for the transaction was				
35	less than amount owe	ed by STEI, the intercompany amount was reduced. This is why AESI			
36	payment is referred in	note 17 as "Reductions in Related Party Receivable".			
37					
38	The Fair Market Value	of Assets over the Book Market Value was derived from:			
39	Rolling Stock	\$315,014			
40	Equipment	\$271,047			
41		<u>\$586,061</u>			
42					
43	The fair market value	is supported by third party valuations less net book value for Property			
44	Plant and Equipment of	of \$1,121,485.			
45					
46	In response to each pa	art question:			
47					
48	a) As indicated, S	TEI did not assume a net liability but was held "neutral" on a fair market			
49	value basis afte	er the completion of the transaction. The fair market value increment only			
50	related to the	Rolling Stock and Equipment that was transferred. In respect to the			
51	remaining item	s, the value for book was equivalent to the value for fair market value			
52	purposes.				
53					
54	All items transferred	were required in STEI to effectively operate as a stand-alone electrical			
55	distribution business.				
56					
57	b) Almost all of th	ne assets and staff of AESI were located in the STEI building before the			
58	reorganization.	As part of the reorganization, staff, inventory, equipment and rolling			
59	stock were ider	ntified that were <u>not</u> part of STEI were transferred out of the STEI building.			
60					
61	The process for mak	ing the determination was done based on identifying the parts of the			
62	operations of AESI th	at were not part of the STEI business. Through the review, three staff			
63	people were not trar	sferred to STEI. In respect to the assets, three vehicles were not			

File Number:	EB-2014-0113
Tab: Schedule: Page:	2 1 3 of 10
Date Filed:	September 9, 2014

transferred to STEI (which aligned with the three staff). In addition, assets that were 100%
unrelated to the STEI business (such as the water heater rental) were not transferred

66

67 c) STEI as a Virtual Utility

68

When St. Thomas Energy Inc. ("STEI") was originally corporatized (i.e. converted from a municipal electric utility), the assets transferred into STEI were all distribution assets, land, buildings and all directly related working capital (such as customer accounts, deposits, unbilled revenue, power payable, regulatory accounts unbilled revenue and related prepaid expenses). The remaining assets, such as rolling stock, office equipment and staff were transferred to St. Thomas Energy Services Inc. ("STESI").

75

76 STEI operated as a virtual utility, purchasing management services and capital from STESI 77 pursuant to a master services agreement (the "MSA"). Under the MSA, STESI charged STEI 78 based on a fixed fee per customer for services covered by the MSA. The fee did not increase by 79 inflation from year-to-year, and had a built-in efficiency factor. Therefore, the fee under the MSA 80 was reduced each year during the operation of the MSA. STEI estimated in its last cost of 81 service proceeding (EB-2010-0141) that it enjoyed a savings in 2011 of approximately 82 \$1,004,000 (approx. \$644,000 from inflation and \$360,000 based on the MSA efficiency factor) 83 relative to the scenario of if it had been a stand-alone distributor. This savings was, in effect, a 84 subsidy provided by STESI to STEI and, while beneficial to STEI, was financially unsustainable 85 for STESI. STESI experienced a loss in fiscal 2011 which was due to other profits generated by 86 STESI not being greater than the losses sustained as a result of the MSA between STESI and 87 STEI.

This unsustainable financial arrangement, as well as the following circumstances, caused STEI
to consider switching from a virtual utility to a stand-alone utility:

90

91 i. Difficulty in defending transfer pricing costs:

92 Under STEI's virtual utility model, transfer pricing was complicated and created a great deal of 93 confusion in STEI's last cost of service proceeding. This was apparent from the discussions in 94 the June 1, 2011 technical conference. In fact, as part of settlement agreement in STEI's last 95 cost of service proceeding, STEI agreed that it would "develop and implement a more

File Number:	EB-2014-0113
Tab: Schedule: Page:	2 1 4 of 10
Date Filed:	September 9, 2014

96 formalized and transparent procedure for its affiliate transfer pricing as soon as practical, but no

97 later than the filing of its next cost of service rate application." Clearly, STEI's transfer pricing

- 98 was a cause of consternation for Board staff and the intervenors. STEI wanted to avoid such
- 99 confusion in its next cost of service proceeding.
- 100

101 <u>ii. Affiliate Relationships Code ("ARC") compliance:</u>

102 STEI had been notified in a March 17, 2006 letter from the OEB's Chief Compliance Officer that 103 STEI was not in compliance with ARC in regard to: a) distributor management and control; b) 104 physical separation; and c) transfer pricing. STEI had responded to this letter in which it outlined 105 its case to the Board in an attempt to review the arrangement and to seek approval for the 106 virtual utility structure established. No further response was received and the issue was left 107 unresolved. As a result, while STEI had tried to argue that the structure was in the best interest 108 of the rate payer, nothing was definitively resolved going forward. Restructuring to a stand-alone 109 utility resolved the outstanding ARC issues.

110

111 *iii. 2011 Cost of Service Settlement:*

During the last cost of service application, STEI experienced difficulty demonstrating the case that rates paid to the affiliate company, STESI, were fair. During the technical conference, STEI communicated that STESI was expecting a loss for 2011 and the loss was related to insufficient compensation associated with the services provided to STEI.

116

In addition, STEI was requested to strengthen or modify the intercompany pricing strategy
during the period prior to the 2015 Cost of Service Application. The pricing would need to be
well documented and supportable during the review.

120

121 Upon reviewing the intercompany process and the potential evidence requirements for the 2015 122 application, STEI believed that it would be much more economical to undergo the reorganization 123 rather than proceed with the potential work of reviewing the process and building the evidence.

124

STEI also did not want to make the investment in time and money to modify the intercompany process, build up the evidence, and then, in the end, not receive sufficient compensation in rates during the application to offset the costs.

File Number:	EB-2014-0113
Tab: Schedule: Page:	2 1 5 of 10
Date Filed:	September 9, 2014

Given all of these conditions, it was determined during the latter part of 2011 that STESI should "unwind" the shared service concept and to move STEI from a virtual to a stand-alone utility with a dedicated staff. It was believe that this would result in the enhanced transparency for the 2015 cost of service application, by effectively reducing the services subject to transfer pricing to a far lower level then in the past.

133

To support the remaining shared corporate and governance services, STEI engaged
PriceWaterhouseCoopers ("PWC") to prepare a Cost Driver Study to analyze the transfer
pricing between STEI (regulated) and its affiliates. PWC's study is at E4/T1/S5 attachment 1

137

138 Benefits to Rate Payer

STEI believe that the restructuring has benefited the rate payer by effectively reducing the overall risk of losing a dedicated service provider. As well, the staff within STEI are motivated to enhance the performance for STEI and not the service company.

142

STEI believes that the restructuring also helps to enhance the four areas of the BoardsBalanced Score Card:

- 145
- 146 *i. Customer Focus:*
- 147

STEI has made a focused effort to engage its customers in an effort to improve its services to align with customer expectations. STEI has been using a 3rd party customer engagement survey on a bi-annual basis. STEI developed an in-house survey and has launched a newer web portal product called "Customer Connect" which combined two web portal products into one allowing customers to easily access all information from one program.

153

As identified by Board staff, STEI had not historically achieved its capital distribution budget, however, since restructuring for the years 2012 and 2013 and the 2014 forecast is that STEI has and will met its planned capital distribution expenditures and in 2013 hired an additional lineman to ensure that the activities in STEI's DSP will be completed.

File Number:	EB-2014-0113
Tab: Schedule: Page:	2 1 6 of 10
Date Filed:	September 9, 2014

158 STEI recently hired a Conversation Officer, funded by the OPA, in an effort to not only achieve 159 the OPA conservation targets but to have an in-house resource that STEI customers can 160 contact and utilize in an effort to manage their electric utility costs.

- 161
- 162 *ii.* Operational Effectiveness:
- 163

164 STEI has been improving its operating and maintenance programs and enhancing its asset 165 management process through the use of a asset condition assessment and asset management 166 plan provided by a 3rd party consultant. The findings of these reports are important planning 167 tools in the development of STEI's long-term plan in establishing STEI's distribution capital and 168 maintenance requirements. STEI is implementing a geographical information system 169 ("GIS").STEI is also implementing new financial sub-systems such as job costing and work 170 order to interface with the GIS system and eventually the Customer Information System ("CIS"). 171 This will enable STEI to better manage the distribution assets and customer responsiveness 172 through new program initiatives such as an improved outage identification process and 173 customer outage communication.

174

As part of STEI's philosophy of continuous improvement and increased operational effectiveness, STEI reviewed its operating and maintenance practices, specifically substation maintenance, which resulted in a new maintenance program with half the stations being scheduled for maintenance on an annual rotating basis, STEI also, implemented the Paymentus Program, a user pay model for credit card payments and brought bank deposit deliveries inhouse resulting in customer service savings.

181

Board staff has on a number of occasions informally reminded STEI management of its history
of late filing with regard to various regulatory reporting requirements. STEI submits that there
has been a noticeable improvement in this area since the restructuring.

185

186 From a customer cost perspective STEI submits that its customers have not been harmed from187 an OM&A per customer basis, following are two tables to support this.

Tab:

Page:

216 iv. Financial Performance:

217

218 STEI's goal is to achieve sustainable shareholder returns while providing sustainable operating

- 219 efficiencies, optimizing service levels and cost reductions to mitigate customer rate impacts.
- 220

221 STEI has historically underperformed on an ROE basis as compared to the deemed ROE, other

222 than 2013 which is an anomaly. As provided in the OM&A per customer tables, STEI has been

223 able to manage operating costs but historically unable to complete its capital program.

224

225 The following table provides a comparison of STEI's 2012 distribution revenue on a per 226 customer basis, excluding connections. 2012 data was chooses as it reflects the first full year 227 after STEI's last Board Approved 2011 COS Rate Application

STEI believes that by aligning its COS application with a transparent operating utility that recognizes the continued efforts of achieving the four stated goals will provide STEI with the financial and physical resources to achieve the four Balance Score Card outcomes, achieve it long-term DSP and provide reasonable returns to its shareholder. All of which is in the best interest of the customer.

238

244

248

239 d) Per note 17

- 240a. As identified above, at December 31, 2011 STEI owed \$2,079,203 (as per note24115) to AESI. The reorganization occurred during the first business day following242December 31, 2011 and, as such, the amount was deducted from the \$2,079,203243owed to AESI.
- b. As noted above, the \$586,061 represents the difference between fair market
 value of the rolling stock over AESI's Net Book Value for assets transferred to
 STEI. The reason for the use of the fair market value was:
- i. To demonstrate that transaction was done at FMV which was believed tobe fairest approach in this case.
- ii. If STEI were forced to purchase its own equipment and rolling stock, it
 would have likely paid more because it would have had to pay
 replacement value to purchase new, or would have taken a very long time
 to amass an equivalent fleet which would have resulted in service
 interruption. Overall, it is a reasonable cost for the rate payers to
 assume.
 - iii. Additionally, the transaction aligned with the PIL's impact of the transaction. The UCC pools for PIL's purposes reflect the higher market value

2 Ref: Ex. 1/Tab 5/Sch. 17/Att. 2.1

3

4 In Table 1-17, STEI indicates there's a \$459,496 difference between its audited financial 5 statements and the OEB trial balance. STEI used net book value of the assets in its audited 6 financial statements but used the fair market value, which was a higher PP&E amount for 7 regulatory purposes.

- 8
- 9 a) Please provide a table listing the assets transferred from the affiliate company, 10 comparing the net book value as recorded in STEI's audited financial statements to the 11 fair market value as included in the PP&E of the rate application.
- 12 b) Please explain why STEI has recorded the transferred assets from its affiliate company 13 at fair market value in the rate application.
- 14 c) To Board Staff's knowledge, past Board practice (including Decision with Reasons RP-15 1999-0034 page 24 and Report of the Board Transition to International Financial 16 Reporting Standards EB-20008-0408 page 14) requires rate base assets to be valued at 17 net book value. Please provide any references indicating that the regulatory treatment of 18 PP&E transferred in from affiliates should be recorded at fair value.
- 19

20 **Response:**

- 21
- 22 In response to each part question:
- 23

24 a) Please see Attachment1 and Attachment2 to this response for the summary 25 tables. The fair market value increment was on the rolling stock and tools found 26 on the trucks. The fair market value assessment of the rolling stock was 27 completed by:

- **RBS Fleet Services Inc.** 28
- 29 **RR#3**
- 30 Port Rowan, ON, NOE 1M0
- (R. B. Sipley, President) 31

Tab: Schedule: Page: EB-2014-0113 2

2 2 of 5

Date Filed: September 9, 2014

32		The tools fair market value assessment w	as completed by:
33		Landace Hydraulics	
34		4376 Elgin Rd Rr 1	
35		Mossley, ON, N0L 1V0	
36		(Loydd Lawrence, Proprietor)	
37			
38		Summary of Fair Market Value increment	after reorganization:
39		Tools (per Exhibit 1)	\$ 271,047
40		Rolling Stock (per Exhibit 2)	<u>\$315,014</u>
41			<u>\$586,061</u>
42		All numbers were audited and there were	no issues identified.
43			
44		As noted on Note 6 in the 2013 audited	financial statements, the net "fair market value"
45		remaining in STEI is \$366,464 as of Dece	ember 31, 2013.
46			
47	b)	STEI believed that using the fair marke	t value for the rolling stock and tools was the
48		fairest approach for the ratepayers, STEI	, AESI and the shareholder. If the transfer was
49		done at book value, then the transaction	on would not be fair for shareholder or AESI
50		because AESI and the shareholder w	ould be subsidizing the ratepayers of STEI.
51		Alternatively, what would have been in the	he best interest of the shareholder, and not the
52		rate payer, would have been for STEI to	p purchase its own rolling stock and equipment
53		on the open market and AESI would sel	I the rolling stock and equipment at fair market
54		value to a third party. This option would	d have benefited the ultimate shareholder the
55		most because:	
56		• The fair market value would have	e been realized by AESI thereby generating a
57		gain on disposition. These earnin	gs would be realized by the shareholder
58		• The equipment and rolling stock	would be purchased by STEI either in new or
59		used condition. Quite likely, beca	ause of availability, STEI would have paid more
60		for the rolling stock and tools.	ince STEI purchases would be at higher cost,
61		this would benefit the sharehold	der of STEI because there would be strong
62		probability of a higher rate base (assuming approved) thereby generating higher

File Number:	EB-2014-0113
Tab: Schedule: Page:	2 2 3 of 5

63	revenues from the	e rate payers.

- If STEI were to have purchased all rolling stock and equipment from a third party. 64 • STEI would have avoided having to defend the decision ultimately made by STEI 65 and AESI 66
- Overall, STEI believe that the approach of using the fair market value for the rolling stock 68 69 and tools was the most reasonable for all parties involved.
- 71 c) Overall STEI believes that the approach used was the most objective and the 72 fairest to all parties. Further, the transaction was reviewed by STEI's auditors 73 and no issues were identified.
- 75 For income tax purposes, the transaction was made at Fair Market value which was the 76 most supportable approach as outlined by the CRA.
- 78 Finally, if AESI had made the transition to IFRS, it would not be eligible to select the Net 79 Book Value for the assets on transition to IFRS from CGAAP. Instead, a fair market 80 value election made by AESI to establish the opening value on IFRS transition. If this were done prior to the reorganization, the fair market value would have been equal to 81 82 AESI's Net book value.
- 83

67

70

74

77

84 STEI does not believe that the references provided in the interrogatory are applicable to 85 this scenario. Please refer to paragraphs 2.3.6.3 and 2.3.6.4 of the Affiliate Relationships Code. 86

- 4 Applications, dated July 18, 2014
- 5

6 STEI has changed its capitalization and depreciation policies effective January 1, 2012.

7 It will adopt IFRS in 2015. As per the chapter 2, page 7 of the filing requirements, the applicant

8 must identify all material changes in the adoption of IFRS that impact its application. Please

9 confirm that no material changes were identified upon the adoption of IFRS that impact the

- 10 application. If material changes were identified, please explain the changes and the impact to
- 11 the application.
- 12

13 Response:

14

15 STEI confirms that new CGAAP policies (regarding capitalization and depreciation) have been

- 16 in place as at January 1, 2012 and that as a result, there are no material changes upon the
- 17 adoption of IFRS that will impact the application.

3 Ref: Ex 1/T6/S2 - Customer Engagement

4

5 Did STEI conduct any public events (such as a town hall meetings) where it solicited input from 6 its customers in relation to the DSP or the COS application as a whole? If it did, please provide 7 a summary of the comments that were received and explain how customer input was 8 incorporated in the DSP.

9

10 **Response:**

11

STEI did not specifically solicit input from its customers in relation to the DSP or COS
application as a whole. STEI's DSP is a continuation of the capital plan submitted in its 2011
COS application EB-2010-0141.

15

16 The Asset Management Plan provided a 5 year plan to 2015 as well as a 25 year capital17 replacement plan.

18

STEI generally engages it customers through its website, mail inserts, home shows and thirdparty questionnaires

- Ref: STEI Decision and Order EB-2012-0348 5
- 6
- 7 In STEI's smart meter decision EB-2012-0348 and as indicated in its 2013 audited financial
- 8 statements, STEI received approval for its smart meters effective January 1, 2013. In Appendix
- 9 2-BA, smart meters are added into Account 1860 in 2012 for a net amount of \$2,529,092
- 10 (\$3,100,869-\$571,777).
- a) Please explain why STEI added smart meters to Account 1860 in 2012 and not 2013 in 11
- 12 Appendix 2-BA.
- b) Per Exhibit 2, Tab 1, Schedule 6 and STEI's smart meter decision, the approved amount to 13
- 14 be transferred into rate base was \$3,267,776. Please reconcile this approved amount with the
- 15 \$2,529,092 included in Appendix 2-BA.
- 16

17 **Response:**

- 18
- 19 STEI recorded the transfer of smart meter assets in 2012 per discussion with STEI's external
- 20 auditors as part of the 2012 year-end audit. The transaction was recorded in 2012 in order to
- 21 facilitate a clean 2012 audit opinion as, it was determined that the materiality of the transaction
- 22 and the fact that the OEB decision and communication was received prior to December 31,
- 23 2012 that it should be included in the 2012 financial results.
- 24
- 25 The timing of the recognition of the smart meter assets, 2012 or 2013, does not have an impact 26 on the 2015TY rate base.

- 28 a) Per Exhibit 2, Tab 1, Schedule 6 and STEI's smart meter decision, the approved amount to be transferred into rate base was \$3,267,776. Please reconcile this 29 30 approved amount with the \$2,529,092 included in Appendix 2-BA.
- 31

1 2-Staff-6

2

3 Ref: Accounting Procedures Handbook, effective January 1, 2012

- 4
- 5 Per review of STEI's calculation of amortization as provided in STEI Amortization New

Policy_20140625, STEI has recalculated the opening net book value of assets in 2012and has
amortized opening net book value over the remaining service lives as at January 1, 2012. It
appears that no further recalculation was done in 2015. However, in Exhibit 2, STEI stated that
due to the transition of MIFRS, STEI will amortize the opening net book value of assets over

- 10 their remaining life.
- 11 a) Please confirm that no further recalculation was done in 2015.
- 12 b) If further recalculation was done in 2015:
- i. Please explain whether STEI has made further changes in depreciation policy in
 2015 to be in accordance with pages 4 and 5 of Article 320 of the APH that indicate
 that a change in estimate of useful lives is accounted for prospectively, with a
 recalculation of the average remaining useful life of the opening net book value.
 Please identify and explain what further changes to useful lives STEI has made in
 2015, why the changes were made and the nature of the changes.
- ii. If no further changes in useful lives were made in 2015, please explain why a
 recalculation was done in 2015.
- 21

22 Response:

- 23
- a) As at January 1, 2012 STEI recalculated the amortization based upon asset useful life
 expectancies consistent with MIFRS. STEI did not recalculate the amortization based
 upon NBV of the assets, rather it continued the current practice with contributed capital
 recorded as an amortization offset. The 2015 amortization was calculated on the same
 basis.
- 29
- 2015 amortization will actually be higher as contributed capital, under IFRS, is no longer
 considered an amortization offset but recorded as a deferred revenues and treated as a

File Number:	EB-2014-0113
Tab: Schedule: Page:	3 2 2 of 2
Date Filed:	September 9, 2014

- 32 revenue offset, and amortized over the same period as the assets the contributed capital33 pertains to.
- 34
- 35 STEI does not anticipate that this will cause a material change to its application.
- 36
- b) STEI did not make any further changes to its depreciation policy in 2015, other than the
 adoption of the ¹/₂ year rule.
- 2015 amortization was recalculated to record the impact of the adoption of the ½ year
 rule. The ½ year rule is being applied to 2015 capital additions to align STEI's
- 41 amortization policy with the Board's rate setting practice. Prior to 2015 STEI capitalized
- 42 assets on a full year basis. Please see Board staff IR 4-29 for additional information.

- 1 2-Staff-7
- 2 Ref: Ex. 2/T. 1/Sch. 6 - page 5

3 **Ref: Appendix 2-AB**

4

5 The table in Appendix 2-AB indicates that STEI spent less than it's budgeted capital 6 expenditures by 25.7% in 2010, 16.6% in 2011 and 27.9% in 2013. STEI spent at or above its 7 capital budget in 2012, based on the normalized capital expenditures for 2012 provided by STEI 8 at the above reference. The average capital spending from 2010-2013 was approximately 9 \$1,672,000 per year. STEI is forecasting capital spending of \$2,163,000 for the test year and 10 will average \$2 million per year over the forecast period (2015-2019).

- 11 a) Please explain the factors that have led to STEI's capital spending being consistently 12 below budgeted amounts in the years 2010-2013.
- 13 b) Please discuss how STEI will be able to manage the approximately 20% increase in 14 annual capital expenditures, given its relatively stable staffing levels.
- 15

16 **Response:**

- 17
- 18 a) Prior to restructuring in 2012, STEI experienced resource issues as it competed with the 19 affiliate companies for resources that prevented STEI from achieving the planned 2010 20 and 2011 distribution capital budget. Upon restructuring STEI has dedicated operations 21 and engineering departments committed to fulfillment of the capital plans.
- 22

23 The 2012 distribution system capital expenditures (excluding smart meter transfer) of 24 \$1,938,482 were \$408,583 or 26.75% greater than the budget amount of \$1,529,900. 25 Contributed capital of \$318,521 was \$88,021 or 38.2% greater than the budget amount 26 of \$230,500.

27

28 2013 distribution system capital expenditures of \$1,589,233 were \$42,810 or 2.8% 29 greater than the 2013 budget amount of \$1,546,423. Contributed capital of \$596,144 30 was \$285,144 or 91.7% greater than the budget amount of \$311,000. Contributed 31 capital is impacted by timing recognition.

File Number:	EB-2014-0113
Tab: Schedule: Page:	3 3 2 of 3
Date Filed:	September, 2014

2013 Administrative capital of \$538,637 was \$349,363 or 39.3% less than the budget
amount of \$888,000. The variance is mainly attributed to a new RBD truck that was
budgeted in 2013 but carried over into 2014 in the amount of \$263,850 and deferred GIS
costs of \$130,000.

37

b) STEI's capital program expenditures are allocated to two major functions, the first being
 distribution system capital expenditures that are internally constructed and the second
 being administrative capital expenditures that are primarily outsourced to third party
 contractors.

43 STEI will make use of outsourced opportunities where it makes good business and 44 financial sense to do so.

45

42

46 STEI's five year distribution capital plan is relatively constant throughout the planning 47 period as shown in the table provided below.

48

STEI Capital 2015 -2019					
	2015	2016	2017	2018	2019
Plant	1,750,000	1,790,000	1,730,000	1,720,000	1,760,000
CC	(100,000)	(100,000)	(100,000)	(100,000)	(100,000)
Net - Distribution	1,650,000	1,690,000	1,630,000	1,620,000	1,660,000
Administrative	513,000	436,000	458,000	265,000	222,000
Net Capital	2,163,000	2,126,000	2,088,000	1,885,000	1,882,000

49 50

51 In support of the capital program, a new lineman was hired in September of 2013. With 52 this additional resource STEI is able to allocate the required 12,581 labour hours from 53 the engineering and operations departments to underpin the proposed distribution 54 system capital spending. STEI is confident that the distribution capital plan will be 55 achieved.

56

57 The 20% increase referenced by Board staff is primarily related to the administrative 58 capital expenditures that include fleet, IT and other capital items.

File Number:	EB-2014-0113
Tab: Schedule: Page:	3 3 3 of 3
Date Filed:	September 9, 2014

59 The administrative capital budget will fluctuate based upon the specific assets that are 60 being replaced each year.

10		nece	ssary.
11	b)	If ST	EI is forecasting to spend \$50,000 on the GIS project in 2015, please describe the
12		work	that is planned to be undertaken in 2015 and the timelines for the key deliverables.
13	c)	STEI	is proposing to add \$150,000 in capital expenditures to the 2014 rate base. With
14		respe	ect to 2014:
15		i.	Please describe the work that is planned to be undertaken in 2014;
16		ii.	Please provide the timelines for the key deliverables;
17		iii.	Please confirm whether the GIS project is on track to be completed in
18			2014; and
19		iv.	Please state what is the expected actual 2014 capital expenditure, if different
20			from the budgeted \$150,000.
21			
22	Respo	onse:	
23			
24	a)	There	e is an error in Ex.2/T1/S6/p.9 for Table 2-20 as it should show a \$50,000 GIS
25		expe	nditure in 2015TY. A revised table is provided below. Similarly the commentary in
26		Ex.2/	T1/S6/p.10/line2 should note that the 2015TY expenditures are expected to be
27		\$100	,000 less than the 2014BY. The totals are unchanged and therefore there is no
28		impa	ct on rate base.
29

6

Date Filed: September 9, 2014

1 2-Staff-9

2 Ref: Ex. 2/T. 1/Sch. 11/App. 1 – Distribution System Plan ("DSP")

3

4 Throughout the DSP, STEI references its ongoing voltage conversion project to convert its 5 distribution infrastructure from 2.4kV to 27.6kV.

6 7

a) Please submit the business case for the Voltage Conversion Project.

8 b) The Voltage Conversion Project is a 10 year project and the largest in STEI's history.

9 Did STEI prepare a "project execution plan" at the start of the project that maps the roll 10 out of the full project? If such a plan was prepared, please submit the plan.

c) In the absence of a business case or a project execution plan, it is unclear from the
 evidence as to how much of the Voltage Conversion Project has been completed and
 how much of it still remains to be completed. If this information is not provided as part of
 the response to part (b) above, please indicate when is the project expected to be
 completed? Please also indicate when the 6 Municipal TSs will be removed from
 service.

17

18 Response:

- 19
- 20 a) STEI does not have a business case for the Voltage Conversion Project.

b) STEI did not prepare an initial project execution plan that maps out of the full project.
STEI identified the Voltage Conversion as a major capital initiative as far back as 15
years ago in which STEI has removed 9 substations from service. As part of the 2011
COS Rate Application STEI retained consultants to assist in developing a 10 year
execution plan that has been incorporated into the 2015 COS DSP. The 10 year plan
anticipates a 2020 completion date. The remaining five years of the 10 year execution
plan has been documented in Board Appendix 2-AA.

- c) STEI anticipates that the Voltage Conversion Project will be completed in 2020 at which
 time all 6 Municipal substations will be removed from service.

1 of 1

1 2-Staff-10 2 Ref: Ex. 2/T. 1/Sch. 6, Table Appendix 2AA - Capital Expenditures for the 3 **Connection of New Subdivisions** 4 5 a) STEI has budgeted \$200,000 in 2014 and 2015 respectively for the connection of new 6 subdivisions. For comparison purposes, please provide the actual expenditures related 7 to new subdivision connections for the years 2010-2013. 8 b) In preparing the 2015 TY capital expenditure estimates for this project, did STEI refer to 9 city planning documents or growth studies that identify the regions with STEI territory 10 where new subdivisions are planned? Please provide the studies/documents that were 11 used to support the proposed expenditures. 12 c) STEI is proposing to add \$200,000 to the 2014 rate base. Is STEI on track to expend the capital expenditures that are budgeted for 2014? If it is expected that the 2014 13 14 expenditures will be different from the budgeted amounts, please provide STEI's best 15 estimate for the 2014 expenditure 16 **Response:**

- 17
- 18
- a) The following table provides the 2010 to 2013 new subdivision connections
- 19 20

New subdivision	2010	2011	2012	2013
services	\$428,761	\$438,293	\$740,481	\$382,850

21

22 b) City planning documents or studies were not available to support proposed 23 expenditures. STEI engineering staff has regular meetings with the City and informal 24 discussions with local developers. The 2015TY capital expenditures were based upon 25 these conversations.

26

27 c) STEI is forecasting the 2015BY additions are forecasted to be on plan. This forecast 28 could be higher dependent upon a developer obtaining MOE approvals prior to 29 November for this project to occur in 2014.

8

1 2-Staff-11

2 Ref: Asset Condition Assessment ("ACA"), Table III-6, page 13

3

4 Table III-6 at the above reference provides an asset replacement strategy that was prepared by 5 Kinetrics as part of the ACA. This Table provides a replacement cycle over a 10 year period for 6 major asset classes. For example, in the case poles, the ACA recommends a replacement cycle 7 over a 10 year period, starting with 86 poles to be replaced in the first year, 76 in the second 8 and so on and reaching a maximum of 84 poles in year 10. This replacement cycle was based 9 on a condition assessment that 4% of poles were in "poor and very poor" condition. Further, at 10 page 11 of the section titled Asset Lifecycle Optimization Policies and Practices states "STEI 11 has taken a proactive approach to testing and replacing of wood poles...." However, staff 12 observes that in the current capital expenditure plan, STEI is proposing no expenditures for the 13 Pole Replacement Program in 2014, 2015 and through to the end of 2019.

14

15 a) Board Staff understands that the Voltage Conversion Project is intended to be the focus 16 of the DSP. However, given the findings of the ACA and STEI's evidence that poles are 17 replaced proactively, please explain the reason for not allocating any capital towards the 18 replacement of poles in 2014, 2015 and beyond.

- 19 b) Appendix 2-AA provides the capital expenditures for the Pole Replacement program for 20 the period 2010 to 2013. How many poles were replaced under this program in each of 21 the years respectively?
- 22 c) As part of the "Asset Lifecycle Optimization Policies and Practices" STEI provides its 23 inspection cycle for distribution assets. According to that cycle, poles are inspected on a 24 3 year cycle. How many poles were inspected in 2013 and what was STEI's assessment 25 of the condition of its poles based on this assessment.
- 26 d) The ACA estimates a replacement cost of \$10,000 per pole. What is STEI's average 27 cost per pole?
- 28

29 **Response:**

30

31 a) STEI recognizes that it provided a high-level capital overview as noted in E42/T1/S6 32 page 3 lines 1 -7.

File Number:	EB-2014-0113
Tab: Schedule: Page:	3 8 2 of 2
Date Filed:	September 9, 2014

- Embedded within the Voltage Conversion Plan is the replacement of poles. The actual
 asset components within the capital projects are broken out at year-end.
- 35 As shown in the following table in response to question b) the majority of the poles are
- 36 replaced as a component of the Voltage Conversion Plan.
 - b) The following table provides the poles replaced from the 2010 to 2013 period.
- 37 38

Poles Replaced	2010	2011	2012	2013
Under voltage conversion	53	210	67	81
Outside of voltage conversion	23	4	2	3
Total	76	214	69	84

- 40 c) STEI inspect approximately 200 poles in 2012 in the North half of the City and no41 problems were identified.
- 42
- d) STEI's average cost per pole is \$8,700, which is less than the \$10,000 provided in the
- 44 ACA study. The ACA study was performed when STEI was operating as a virtual utility
- 45 operating under a MSA in which the costs exceed the internal actual cost per pole.

File Number: EB-2014-0113 Tab: 3 Schedule: q Page: 1 of 2 Date Filed: September, 2014

1 2-Staff-12

2 Ref: Asset Condition Assessment Report ("ACA"), Table III-6, page 13

3

4 Table III-6 at the above reference provides an asset replacement strategy for PoleMounted 5 Transformers, Pad Mounted Transformers and Overhead Switches. It appears to staff that the 6 current capital expenditure budget does not allocate any funds for the replacement of the noted 7 transformers or switches.

- 8
- 9 a) Board staff understands that Voltage Conversion Project is the focus of the DSP. 10 However, given the findings of the ACA please explain the reason for such an approach.
- 11 b) The ACA was prepared in 2011-2012. The ACA recommends that in year one, STEI 12 replace the following assets: 13 Pole Mounted Transformers, 2 Pad Mounted 13 Transformers and 1 Overhead Switch. How many of these assets were replaced in the 14 first year (i.e. 2013)?
- 15 c) For the period of 2010 to 2013 how many defects were reported in relation to each of 16 these asset classes? Please provide the information on a yearly basis if it is available.
- 17
- 18 **Response:**
- 19
- 20 a) STEI recognizes that it provided a high-level capital overview as noted in E42/T1/S6 21 page 3 lines 1 -7.

22

23 Embedded within the Voltage Conversion Plan is the replacement of various assets 24 identified within the ACA. The ACA report, Table III-5 identifies the Replacement 25 Strategy for these items are reactive and as such STEI has not budgeted capital 26 expenditures for these items.

1 2-Staff-15

2 Ref: Ex. 2/T. 1/Sch. 11/Att. 1 - DSP, Section 1.3, pages 8-10

3

The table provided on page 8 of section 1.3 of the DSP, shows that the SAIFI, SAIDI and CAIDI
metrics are generally higher in 2009-2013 than they were in the preceding five year period (i.e.
2004-2009).

7

Additionally, the numbers of unplanned and momentary outages for 2010-2013 are shown in the
tables on pages 9 and 10. Other than spikes in 2011, these tables indicate a downward trend in

10 the number of unplanned and momentary outages over that period.

11

a) Similar to the tables on pages 9 and 10, please provide the number of unplanned and momentary outages for the years 2004-2009, if available.

- b) Please reconcile the general trend of increases in the SAIFI and SAIDI metrics from
 2009-2013 with the downward trend shown in the table on pages 9 and 10.
- c) Please provide a brief summary of the circumstances that may have contributed to the
 moderate spikes in the number of unplanned and momentary outages in 2011.
- 18

19 Response:

a) The number of planned and unplanned outages for the years 2004 to 2009 isprovided in the following table.

22

Year	Unplanned	Momentary
	Outages	Interruptions
2004	Not Available	10
2005	59	21
2006	32	14
2007	30	11
2008	36	17
2009	32	18

28

31

35

September 9, 2014

b) Despite the fact that the number of incidents have decreased, the outage statistics are
impacted by two factors, 1) number of customers impacted and 2) length of the customer
outages. The decreased outage have impacted a greater number of customer for a
longer period of time typically on the 27.6 kV system

29 STEI has provided the background for some of the interruptions for the years 2009 to 30 2013 in the following commentary.

- In 2009 two incidents of the 32 for the year (loss of supply and Overhead contact)
 account for 61% of our total planned and unplanned Customer-Hours of Interruption
 for the year.
 - In 2010 two incidents of the 36 for the year (tree and OH contact) account for 65% of our total planned and unplanned Customer-Hours of Interruption for the year.
 - In 2011 four incidents of the 51 for the year (blown arrester, loss of supply, tree contact) account for 92% of our total planned and unplanned Customer-Hours of Interruption for the year.
- In 2012 our reliability stats improved compared to 2010, 2011 & 2013 even though
 the number of unplanned outages are consistent with years 2006 to 2010.
- In 2013 three incidents of the 23 for the year (tree contact and loss of supply)
 account for 92% of our total planned and unplanned Customer-Hours of Interruption
 for the year.

4		
5	At the	above reference, Elenchus states that the forecast for the GS < 50 kW class was
6	estima	ted using 60 observations, as opposed to the 100 observations used for the Residential
7	class.	Elenchus stated that this was due to an "apparent structural shift" in the class that
8	occurr	ed in 2009.
9		
10	Elench	nus used a similar approach for the GS > 50 kW class.
11	a)	Were any regressions attempted using a variable to reflect the "structural shift" that
12		allowed the use of a larger sample size of observations? If yes, what were the results
13		and why was such an approach ultimately rejected?
14	b)	The regression for the GS > 50 kW class did not yield R-squared values that indicated
15		as strong a fit as the regression performed for the GS < 50kW class.
16		Please identify any other approaches to the regression for the GS < 50 kW that were
17		attempted, if any, and explain why such approaches were ultimately rejected.
18	_	
19 00	Respo	onse:
20		
21	a)	A recession variable was attempted, however all attempted time periods resulted in a
22		substantially lower R-squared and substantially more variability on the regression
23 24		variables. The recession of 2008/2009 resulted in the loss of manufacturing as well as
24 25		manufacturing dependant employment, and that the remaining customers as well as new load may have different sensitivity to weather and employment than did the old customer
25 26		base.
20 27		
28	b)	In addition to the final metrics selected, local and provincial employment metrics were
29	0)	attempted and rejected. However, the model did not respond robustly to either metric.
30		The use of a regression was retained however as the model does exhibit weather
00		The dee of a regression was retained however as the model does exhibit wedther

31 sensitivity, and does appear to more accurately predict load than more basic methods such as a trendline or most recent historical year. 32

2015 Cost of Service St. Thomas Energy Inc. Response to Interrogatories

3

4 At the above reference Elenchus states that it "has determined that it would be appropriate to 5 use 50% of the residential Geomean to fairly estimate the forecast customer counts" for the GS 6 < 50 kW class. In comparing the annual percent change in Residential customer connections 7 (shown in Table 2.7 of the above reference) to the annual percent change in the GS < 50 kW 8 class (shown in Table 3.5), it does not appear that such a trend has occurred in the past. Please 9 provide the basis and rationale for this determination.

10

11 **Response:**

12

13 In the past, reclassifications into the GS < 50 class inflated the growth in the customer count of 14 this class. In more recent years, with the exception of 2013, the Residential class has exhibited 15 more growth than the GS < 50 class. 50% of the Residential class was selected on the basis 16 that the GS < 50 customer count cannot be relied on for the purpose of determining a trend. 17 Reasonable alternatives might be to consider no change in customer count, or that the 18 customer count would follow that of Residential. Over the past 4 years, the GS < 50 class has 19 averaged 0.65% growth, and would be negative if not for the outlier, 2013. In light of all of this, 20 a growth rate of 0.49%, or half the Residential Geomean seems appropriate.

1 3-Staff-19

2 Ref: Ex. 3/T. 1/Sch. 3/Att.1 – Sch. 3, page 6

3

Table 3.6 at the above reference shows the predicted normalized annual kWh for the GS < 50 kW class. Elenchus' forecast shows an increase in annual kWh of 4.7% for 2014 and 1.7% for 2015. At pages 5 and 6, Elenchus notes that the GS < 50 kW class was subject to customer reclassification in 2013 and that 58 connections were added to the class in that year. Elenchus is only forecasting an additional 8 customers in 2014.

- 9
- a) Given the historical trend of decreased consumption for the class that began in 2009,
 please explain what factors lead STEI to believe that such an increase in consumption
 would be reasonable in 2014 and 2015.
- 13

14

- b) How does the consumption for the class, to date, in 2014 match with the forecast provided by Elenchus?
- 15 16

17 Response:

- 18
- a) The coefficient for the GSItCust variable (the GS less than 50 customer count) is
 greater than the consumption of the average customer. Elenchus attempted to
 add other explanatory variables such as a trend variable or an economic
 indicator, but neither were significantly correlated to usage. In the case of the
 customer count variable, the t-ratio of 9.4 indicates a very strong correlation to
 usage, and makes this variable difficult to dismiss. However, the variable also
 necessitates caution around projected customer count increases.
- 26
- b) The July 31, 2014 GS < 50 kW consumption is 23,921,603 kWh's which is
 approximately 59% of the 2014BY forecast of 40,662,591 kWh's.

2	Ref: Ex. 3/T. 1/Sch. 3/Att.1 – Sch. 4, page 1
3	
4	At the above reference, Elenchus discusses the treatment of the announcement of the closure
5	of a plant in the GS > 50 kW class. Elenchus states:
6	
7	Since May, consumption at the site has averaged about 130,000 kWh/month and 360 kW. This
8	amount has been added back to the class forecast period to account for basic upkeep at the
9	site.
10	
11	a) Please explain the above statement and clarify the date of closure for the customer.
12	b) Additionally, please clarify for which year the month of May is referenced in the above.
13	
14	Response:
15	
16	a) In 2012 the company announced its closure and the demand had been declining since
17	December 2012.
18	
19	In May 2013, the plant ceased operating in its productive capacity with demand at 1% of
20	the 2013 average. Since that time its consumption has averaged 130,000 kWh/month
21	and 360 kW. This usage is associated with basic site maintenance, such as cleaning
22	staff.
23	
24	The Load forecast adjusted for the change in consumption with this customer in that the
25	historical load was removed and the current load added back to the data.
26	
27	b) Please see response above.

1	4-Staff-21
2	Ref: Ex. 4/T. 1/Sch. 1, page 14
3	Ref: Appendix 2-JB - Recoverable OM&A Cost Driver Table
4	
5	On page 14, of Ex. 4/T. 1/Sch. 1, STEI states that it has incurred greater bad debt expenses as
6	a result of the current economic conditions. In Appendix 2-JB, STEI indicates that bad debt
7	costs decreased by \$80,913 in 2012, \$44,270 in 2013 and is showing a projected increase in
8	bad debt costs of \$19,000 for 2014.
9	
10	a) Please reconcile the statement on page 14 with the data provided in Appendix 2 JB.
11	b) Please explain why STEI is forecasting an increase in bad debt costs for 2014 when it
12	has shown a trend of decreases in 2012 and 2013.
13	
14	Response:
15	
16	a) As highlighted in the table below, the bad debts that STEI has experienced have
17	increased in relation to the 2011 COS approved amount. This is due to the impact on
18	residential customer with regards to the closure of the Ford and Timken plants.
19	Additionally, STEI has experienced increased small commercial bad debts.

20

2011	2011	2012	2013	2014	2014	2015
COS	Actual	Actual	Actual	Forecast	BY	TY
81,000) 181,401	144,856	100,586	136,000	120,000	122,500
Year over year change	100,401	44,455	(44,270)	35,414	19,414	2,500
3 yr average			142,281			
4 yr average				140,711		

21 22

STEI bad debts as of July 31, 2014 are \$79,215 and are forecasted to be approximately
\$136,000 for 2014. Based upon the table provided above the bad debt amount included
in the 2015 TY may be too low as the four-year trend from 2011 actual to 2014 forecast
averages \$140,711.

1 4-Staff-22

2 Ref: Ex. 4/T. 1/Sch. 2, page 12

3

At the above reference, STEI states that it "is no longer budgeting for community relations expenditure" and that "this activity is being recorded by its affiliate AGI." STEI notes that approximately \$22,000 in community relations costs are included in the AGI annual fee. Please explain how outsourcing the community relations activities to STEI's affiliate will affect STEI's level of customer engagement. Please describe the nature of the activities that will be provided by AGI and, to what extent, STEI will be involved in the planned activities.

10

11 Response:

12

Transferring the community relations activities to AGI will not affect STEI's level of customer engagement. The total amount of \$22,000 represents the budget for the entire enterprise (Ascent Group Inc. and all of its subsidiaries). In addition, there is some additional budgeted funds of \$5,000 in support of the programs that will be in partnership with the shareholder, the City of St. Thomas. In total there is \$27,000 budgeted for 2014. Of this amount, \$6,000 has been earmarked for communities outside of St. Thomas.

19

The remaining \$21,000 is dedicated to St. Thomas and is focused on community activities, events and a local college campus (\$2.5K scholarship). Almost all community event support is "co-sponsored" with St. Thomas Energy and are events that were supported by St. Thomas Energy historically. Staff and Sr. Mgmt. of STEI have direct input into the program.

24

In summary, STEI believe that it has a great influence on the programs supported with the funds
either through direct identification or in conjunction with its Shareholder/parent Company.

File Number:	EB-2014-0113
Tab: Schedule: Page:	5 3 1 of 3
Date Filed:	September 9, 2014

1 4-Staff-23

2 Ref: Ex. 4/T. 1/Sch. 2, page 13

Table 4-6 at the above reference indicates that STEI spent \$330,625 (22%) in Administration
and General expenses above what was approved in its 2011 cost of service application.
Additionally, STEI states that the administrative costs for 2013-2015 include \$450k for
administration and governance costs allocated from its parent company AGI.

- a) Please provide an explanation for the increase in 2011 actual spending over the
 Board approved amount.
- b) In the row labeled "Change for 2011 approved" STEI shows that Administration
 and General expenses for the 2015 test year are \$851k above amounts
 approved in its last cost of service application. STEI has already stated that.
- 12

13 Response:

14

15 a) It is important to note that the Board 2011 COS Decision and Order EB-2010-041 16 for rates effective May 1, 2011 was issued June 28, 2011. Included in that Decision was the results of the June 17, 2011 Proposed Settlement Agreement 17 18 in which STEI's OM&A was reduced by \$303,642 from the original application. Given the date of the Decision and Order STEI was not able to achieve the 19 20 imposed decrease in its 2011 cost structure within the 2011 time frame which 21 impacted shareholder returns. The table below provides the actual variance by 22 administrative account:

File Number:	EB-2014-0113

2 Ref: Appendix 2-JC - OM&A Programs Table

3 The OM&A Programs Table shows a decrease in planned inspection expenditures from 4 \$259,540 in 2012 to \$107,462 in 2013. STEI is forecasting \$126,035 in planned inspection 5 expenditures for the 2015 test year.

6 7

a) Please describe the factors that have led to a decrease in planned inspections.

- b) Given the recommendations provided in the Asset Condition Study in Exhibit 2, please
 comment on what effect the decrease in costs for planned inspections may have on
 STEI's reliability performance.
- 11

12 Response:

- 13
- a) The 2012 planned inspection amount of \$259,450 included \$138,000 of costs related to
 the smart meter transfer. When this amount is excluded, the 2012 actual planned
 inspection costs were \$126,450, \$4,585 less than the 2015 TY amount of \$126,035.
- 17

The \$138,000 smart meter adjustment is referenced in Exhibit 4, Tab 1, Schedule 2,
Page 10, table 4-3. The table does not indicate that the smart meter adjustment is
related to planned inspection work.

- 21
- b) Based upon the information provide in a) there is no impact on STEI's reliabilityperformance.

f) f) In STEI's Engineering services to Ascent and water and billing services to the City of
St. Thomas per Exhibit 4, Schedule 5, how does STEI price the services it provides to
affiliates? Do these costs include the appropriate amount of post-retirement benefits for
current service, actuarial losses, past service costs and interest costs?

File Number:	EB-2014-0113
Tab: Schedule: Page:	5 6 3 of 4
Date Filed:	September 8, 2014

1 Response:

- a) STEI confirms that it did not receive any past recoveries of Other Post-Employment
 Benefits in rates in its past rate applications.
- 4 b) N/A see response to a)
 - c)

- 6 i. STEI confirms that in conjunction with the restructuring \$1,213,561 of Employee
 7 Future Benefit Liabilities were transferred. The amount included in the 2015
 8 COS application per note 7 of the 2013 audited financial statements is
 9 \$1,081,373, \$132,188 less than the 2012 amount.
- 10In 2013, STEI had an actuarial valuation performed by Collins Barrow Toronto11Actuarial Services Inc. The latest valuation calculated an actuarial gain of12\$162,204, as STEI does not use the corridor method for recognizing actuarial13gains and losses. Under the corridor method a portion of the gains or losses is14recognized in earnings when the cumulative amounts of these gains or losses15exceed 10% of the benefit obligation. STEI recorded the entire actuarial gain of16\$162,204 in 2013 and no portion of the gain was allocated to an affiliate.
- 17 ii. The allocation was employee based, reviewed and approved by STEI's external18 Auditors.
- 19iii.The liability is associated with the future retirement of the employee and remains20with the employee until termination or retirement. STEI was fully compensated21for the entire liability from AESI through the restructuring transaction, per22response to question c) and the information provided in E4/T1/S4 page 5 in232013.
- In addition, STEI had an actuarial valuation performed by Collins Barrow Toronto
 Actuarial Services Inc. in 2013 that provided the future liability for the current
 employees of STEI...
- The results of this valuation have been included in the 2015TY and as STEI did not adopt the corridor method for recognizing actuarial gains and losses, STEI recognized an actuarial gain in 2013 of \$162,204. In light of the actuarial gain recognition, it may be considered that AESI over compensated STEI for the initial liability transfer.

File Number:	EB-2014-0113
Tab:	5
Schedule:	6
Page:	4 of 4

Date Filed: September 8, 2014

1		The Summary Actuarial Valuation is provided as Attachment 4 of the above
2		noted exhibit reference
3	d)	STEI is unable to calculate the table as requested by Board staff as the liability per
4		employee is not available.
5		
6		In 2012, 28 employees were transferred to STEI, all of which worked 100% on STEI
7		activities. Three of the staff that provided services on a pro-rated basis remained in
8		Ascent Energy Services Inc., (they were not transferred to STEI).
9		
10		As provided in response to question c) above the Employee Future Benefits included in
11		the 2015 COS application is based upon a current valuation performed in 2013 that
12		independently valued the liability. Additionally, the liability does not include amounts
13		attributed to the three staff that remained in AESI.
14	e)	AESI had 31 fulltime employees and two Co-op students. 28 fulltime employees were
15		transferred to STEI. Six of the employees work 35 hours per week and the remaining 22 $$
16		work 40 hours per week. The two Co-op students have not been replaced by STEI.
17	f)	The services provided to the City for water and sewer billing and collecting services were
18		priced based upon information provided in the $\ensuremath{PriceWaterhouseCoopers}$ (" \ensuremath{PWC} ") study.
19		The rate charged to affiliates is priced to include the recovery of all employee related
20		costs and includes a regulated rate of return. The transfer prices were reviewed as
21		reasonable by PWC.

- 2 Ref: Ex. 4/T. 1/Sch. 4, page 5
- 3 Ref: Ex. 4/T. 1/Sch. 4/Att. 4
- 4
- 5 With regards to actuarial valuations,
- 6
- a) STEI indicated that a new valuation report will be performed in conjunction with the
 transition to IFRS in 2015. Has the new valuation been performed yet? If yes, please
 provide the valuation report.
- b) Per Exhibit 4, STEI has budged post-employment benefit costs of \$10k for 2014 and
 2015. Please explain the rationale of how STEI came up with the \$10k budget for each
 of 2014 and 2015. Please correlate the budgeted amount to the actuarial valuation in
 attachment 4.
- 14

15 Response:

- a) STEI has budgeted for the new valuation to occur in 2015. It has not yet beenperformed.
- b) STEI estimated the 2015 post-employment benefits at \$10,000 based upon the results of
 the 2013 valuation as 2013 current service and interest costs exceeded benefits paid for
- 20 the year by \$8,629.

File Number:	EB-2014-0113
Tab: Schedule: Page:	5 8 1 of 1

Date Filed:

September 9, 2014

1 4-Staff-28

2 Ref: Ex. 4/T. 1/Sch. 5/Att. 1 - Cost Driver Study ("CDS"), pages 11-15

3 With regards to the analysis provided in the CDS,

- 4 a) Page 14 of the CDS states that PricewaterhouseCoopers ("PwC"), "obtaine pricing data from four sources for Water/Sewer Billing and Collection services from other Ontario 5 6 LDCs." Please clarify whether data from 4 LDCs was used for the comparison or 7 whether the data from four separate studies of multiple LDCs were used.
- 8 b) In the report, PwC states that the water/sewer billing and collections cost "should be 9 charged at STEI's incremental cost in providing such services."
- 10 Please explain the principle that was used to derive the \$75 hourly rate that will be 11 charged to STEI for locates, meter service layouts and meter technician services.
- 12

13 **Response:**

- 14
- 15 a) The data from 4 LDC's were used for comparative purposes.
- 16 b) The rate \$75 hourly charged to affiliates is priced to include the recovery of all employee
- 17 related costs and includes an appropriate rate of return. The engineering hourly rate
- 18 that STEI charges its affiliates is \$100.

File Number:	EB-2014-0113
Tab:	5
Schedule:	9
Page:	1 of 2

Date Filed: September , 2014

- 1 4-Staff-29
- 2 Ref: Ex. 4/T. 1/Sch. 11, page 8
- 3 Ref: Ex. 2/T. 1/Sch. 2, page 3
- 4

In Exhibit 2, STEI indicated that its 2011 cost of service application assumed the half year rule
for depreciation costs. In Exhibit 4, STEI indicated that its amortization policy has been to record
a full year's depreciation expense on capital additions during the year that the asset was placed
in service. STEI will be adopting the half year rule in2015.

- a) Please explain why STEI has been recording a full year's of depreciation from 2012 to
 2014, when the half year rule had been used in 2011, STEI's last cost of service rate
 application. Please explain why STEI has been inconsistent in applying its depreciation
 method to additions in the year of service.
- b) As a full year's depreciation is taken in each year of 2012-2014, the net book value of
 PP&E in 2015 will be lower than the net book value of PP&E had the half year rule been
 used in those years. In Exhibit 2, STEI indicated that its decision to not adopt the half
 year rule till 2015 did not impact the 2015 rate base. Please explain why this would be
 the case.

c) Please quantify the impact to depreciation expense and rate base using the half year

- 18
- 19
- 20

21 Response:

rule for 2012 to 2014.

- 22
- a) STEI accepted the Board's position of applying the ½ year rule for depreciation for the
 purposes of rate setting but applied the full year rule for financial reporting under
 CGAAP.
- STEI did not believe that this would result in any material differences and as a point of reference the amortization included in the 2011 COS application of \$1,356,340 was \$29,996 less than the 2011 actual amount of \$1,386,336.
- b) STEI did not believe that by not adopting the 1/2 year rule that there would be a material
 decrease in the amortization expense for 2015. Additionally the rate base for the 2015
 COS application would be materially less thereby resulting in a lower revenue
 requirement that benefitted the rate payer.

2015 Cost of Service St. Thomas Energy Inc. Response to Interrogatories

File Number:	EB-2014-0113
Tab: Schedule: Page:	5 9 2 of 2
Date Filed:	September 9, 2014

- c) STEI has recalculated the amortization using the ½ year rule for the years 2012 to 2014.
 For the period 2012 to 2015 accumulated amortization would be \$4,974,362 or \$153,676
 less than the 2012 to 2015 amortization recorded in this application of \$5,128,038. (The
 ½ year rule is not applied to transferred assets).
- 5

8

6 The 2015TY amortization of \$1,208,219 is reduced by \$332 under the ½ year rule to 7 \$1,207,886 for the 2015 TY.

9 STEI has recalculated the rate base in the following table, applying the ½ year rule from 10 2012 to 2015. Based upon the recalculated results STEI's rate base in the original filing 11 is \$153,510 less than what it would be had STEI applied the ½ year rule throughout the 12 period from 2012 to 2015.

2013 Tax Return

PERSONAL AND CONFIDENTIAL

Glen Farrow Chief Financial Officer St. Thomas Energy Inc. 135 Edward Street St. Thomas ON N5P 4A8

Mr. Farrow,

Corporate Tax Return Filing Instructions

GRAHAM SCOTT ENNS LLP

Code 1301

SCIENTIFIC RESEARCH AND EXPERIMENTAL DEVELOPMENT (SR&ED) EXPENDITURES CLAIM

Use this form:

- to provide technical information on your SR&ED projects;
- to calculate your SR&ED expenditures; and

Canada Revenue

Agency

• to calculate your qualified SR&ED expenditures for investment tax credits (ITC).

Agence du revenu

du Canada

To claim an ITC, use either:

- Schedule T2SCH31, Investment Tax Credit Corporations, or
- Form T2038(IND), Investment Tax Credit (Individuals).

The information requested in this form and documents supporting your expenditures are prescribed information.

Your SR&ED claim must be filed within 12 months of the filing due date of your income tax return.

To help you fill out this form, use the T4088, Guide to Form T661, which is available on our Web site: www.cra.gc.ca/sred.

Part 1 – General information

010 Name of claimant	Enter one of the following:
St. Thomas Energy Inc.	89052 2014 RC0001 Business number (BN)
Taxyear 2013-01-01 Year Month Day To: 2013-12-31 1	
Year Month Day	
050 Total number of projects you are claiming this tax year:	Social insurance number (SIN)
100 Contact person for the financial information	105 Telephone number/extension 110 Fax number
Glen Farrow	(519) 631-5550
115 Contact person for the technical information	120 Telephone number/extension 125 Fax number
Richard McDonald KPMG LLP	(519) 660-2136 (519) 672-5684

151 If this claim is filed for	or a partnership, was Form T5013 filed?		Yes 2 No
If you answered no to line	e 151, complete lines 153, 156 and 157.

Part 2 - Project information

CRA internal form identifier 060 Code 1301

Complete a separate Part 2 for each project claimed this year.

Section A - Project identification

200 Project title (and identification code if applicable)

See schedule

Part 3 – Calculation of SR&ED expenditures

What did you spend on your SR&ED projects?	
Section A – Select the method to calculate the SR&ED expenditures	
I elect (choose) to use the following method to calculate my SR&ED expenditures and related investment tax credits (ITC) for this tax year. I understand that my election is irrevocable (cannot be changed) for this tax year.	
160 X I elect to use the proxy method (Enter "0" on line 360. Complete Part 5 and you do not need to track any expenditure incurred for overhead)	
162 I choose to use the traditional method (Enter "0" on line 355. Complete line 360, and track any expenditure incurred for overhead)	
Section B – Calculation of allowable SR&ED expenditures (to the nearest dollar)	
SR&ED portion of salary or wages of employees directly engaged in the SR&ED:	
a) Employees other than specified employees for work performed in Canada	19,113
b) Specified employees for work performed in Canada	
Subtotal (add lines 300 and 305)	19,113
c) Employees other than specified employees for work performed outside Canada (subject to limitations – see guide) 307 +	
d) Specified employees for work performed outside Canada (subject to limitations – see guide)	
• Salary or wages identified on line 315 in prior years that were paid in this tax year	
Salary or wages incurred in the year but not paid within 180 days of the tax year end	
Cost of materials consumed in performing SR&ED	
Cost of materials transformed in performing SR&ED	
Contract expenditures for SR&ED performed on your behalf:	
a) Arm's length contracts (see note 1)	61,474
b) Non-arm's length contracts (see note 1)	
Lease costs of equipment used before 2014:	
a) All or substantially all (90% of the time or more) for SR&ED	
b) Primarily (more than 50% of the time but less than 90%) for SR&ED. (Enter 50% of lease costs if you use the proxy method or enter "0" if you use the traditional method)	
Overhead and other expenditures (enter "0" if you use the proxy method)	
Third-party payments (see note 2) (complete Form T1263*)	
Total current SR&ED expenditures (add lines 306 to 370; do not add line 315)	80,587
Capital expenditures for depreciable property available for use before 2014	
(Do not include these capital expenditures on schedule T2SCH8)	
Total allowable SR&ED expenditures (add lines 380 and 390)	80,587
Section C – Calculation of pool of deductible SR&ED expenditures (to the nearest dollar)	
Amount from line 400	80,587
	00,001
Deduct	2 072
provincial government assistance for expenditures included on line 400 other government assistance for expenditures included on line 400 data =	3,073
	21,454
	21,434
	56.040
Subtotal (line 420 minus lines 429 to 440)	56,060

Add 445 • repayments of government and non-government assistance that previously reduced the SR&ED expenditure pool 450 • prior year's pool balance of deductible SR&ED expenditures (from line 470 of prior year T661) 452 • SR&ED expenditure pool transfer from amalgamation or wind-up 453 • amount of SR&ED ITC recaptured in the prior year 56,060 455 Amount available for deduction (add lines 442 to 453) (enter positive amount only, include negative amount in income) 460 -56,060 • Deduction claimed in the year (Corporations should enter this amount on line 411 of schedule T2SCH1) Pool balance of deductible SR&ED expenditures to be carried forward to future years (line 455 minus 460)

* Form T1263, Third-Party Payments for Scientific Research and Experimental Development (SR&ED)

Note 1 - For contract expenditures made after 2013, no amounts for purchasing or leasing capital property can be included.

Note 2 - For third-party payments made after 2013, no amounts for purchasing or leasing capital property can be included.

Part 4 – Calculation of qualified SR&ED expenditures for investment tax credit (ITC) purposes

The resulting amount is used to calculate your refundable and/or non refundable ITC.		
	ırrent nditures	Capital Expenditures
Total expenditures for SR&ED (from lines 380 and 390)	80,587 496	
Add		
payment of prior years' unpaid amounts (other than salary or wages)		
 prescribed proxy amount (complete Part 5) 		
(Enter "0" if you use the traditional method)	11,305	
expenditures on shared-use equipment for property acquired before 2014	504 +	
qualified expenditures transferred to you (see note 3) (complete Form T1146**) 508 +	510 +	
Subtotal (add lines 492 to 508, and add lines 496 to 510)	91,892 512 =	
Deduct (see note 4)		
provincial government assistance 513 -	3,582 514 -	
other government assistance	516 -	
non-government assistance and contract payments	518 -	
current expenditures (other than salary or wages) not paid within 180 days of the tax year end		
amounts paid in respect of an SR&ED contract to a person or partnership that is not a taxable supplier		
20% of expenditures included on lines 340 and 370 that were incurred after December 31, 2012	12,295	
prescribed expenditures not allowed by regulations (see guide)	532 -	
other deductions (see guide)	535 -	
non-arm's length transactions		
– assistance allocated to you (complete Form T1145*)	540 -	
 expenditures for non-arm's length SR&ED contracts (from line 345) adjustments to purchases (limited to costs) of goods and services from non-arm's length suppliers (see guide) 	543 -	
- qualified expenditures you transferred (complete Form T1146**)	546 -	
Subtotal (line 511 minus lines 513 to 544 and line 512 minus lines 514 to 546)	76,015 558 =	
Qualified SR&ED expenditures (add lines 557 and 558)		76,015
Add		
repayments of assistance and contract payments made in the year	560 +	
Total qualified SR&ED expenditures for ITC purposes (add lines 559 and 560)		76,015

* Form T1145, Agreement to Allocate Assistance for SR&ED Between Persons Not Dealing at Arm's Length

** Form T1146, Agreement to Transfer Qualified Expenditures Incurred in Respect of SR&ED Contracts Between Persons Not Dealing at Arm's Length

Note 3 – On line 510 (capital) – Only include expenditures made before 2014 by the transferor (performer). Complete the latest version of Form T1146.

Note 4 - On lines 514, 516, 518, 532, 535, 540, 543 and 546 - Only include amounts related to expenditures of a capital nature made before 2014.

Part 5 – Calculation of prescribed proxy amount (PPA)

A notional amount representing your overhead and other expenditures.

This part calculates the PPA to enter on line 502 in Part 4. Do not complete this part if you have chosen to use the traditional method in Part 3 (line 162). You can only claim a PPA if you elected to use the proxy method for the year in Part 3 (line 160).

Special rules apply for specified employees. Calculate your salary base in Section A and the PPA in Section B.	
Section A – Salary base	
Salary or wages of employees other than specified employees (from lines 300 and 307)	19,113
Deduct	
Bonuses, remuneration based on profits, and taxable benefits that were included on line 810	271
Subtotal (line 810 minus 812)	18,842

Salary or wages of specified employees

	1
Enter 65% of the salary base (line 818) less 5% of the salary base for the number of 2013 calendar days in the tax year, and less 10% of the salary base for number of days after 2013 in the tax year (use the formula in the guide-line 820)	
Enter the amount from line 820 on line 502 in Part 4 unless the overall cap on PPA applies to you.	
(See the guide for explanation and example of the overall cap on PPA)	

Part 6 – Project costs

Information requested in this part must be provided for **all** SR&ED projects claimed in the year. Expenditures should be recorded and allocated on a project basis.

750	752	754	756
Project title or identification code	Salary or wages in the tax year	Cost of materials in the tax year	Contract expenditures for SR&ED performed on your behalf in the tax year

**** Form T1263, Third-Party Payments for Scientific Research and Experimental Development (SR&ED)

Part 9 – Claim preparer information

Information requested in this part must be provided for each claim preparer that has accepted consideration to prepare or assist in the preparation of this SR&ED claim. Certification is required on lines 935, 970, and 975.

A \$1000 penalty may be assessed if the information requested below about the claim preparer(s) and billing arrangement(s), is missing, incomplete, or inaccurate. Where a claim preparer has prepared or assisted in the preparation of this SR&ED form, the claimant and the claim preparer will be jointly and severally, or solidarily, liable for the penalty.

935 Was a claim preparer engaged in any aspect of the preparation of this SR&ED claim?

1. X Yes (complete the claim preparer information table and lines 970 and 975 below)

2. No (complete lines 970 and 975)

	242 What scientific or technological uncertainties did you attempt to overcome – uncertainties that could not be removed using standard practice? (Maximum 50 lines)		
1.	St Thomas Energy Inc. (the Company or At Thomas Energy) is an electricity		
2.	distribution company which delivers power to over 16,500 businesses and		
3.	residents in St. Thomas, Ontario. St Thomas Energy sought to develop		
4.	techniques that would enable the Company to efficiently control electric		
5.	distribution within a real-time spatial framework. However, attaining the		
6.	targeted capabilities could not be achieved by applying current engineering		
7.	concepts due to technological challenges, such as the requirement for high		
8.	data integrity and security, and the need to integrate a wide range of systems		
9.	with disparate interfaces. As such, St Thomas Energy had to overcome the		
10.	following obstacles in FY2013:		
11.			
12.	- St Thomas Energy sought to develop a generic geographical information		
13.	management architecture that can flexibly integrate and interact with		
14.	disparate legacy and future electrical and software sub-systems, such as		
15.	Outage Management System (OMS), smart meters, CIS, SCADA, etc. However, the		
16.	Company was uncertain about how to design a generic architecture capable of		
17.	integrating with legacy field devices, such as sectionalizers and solid-state		
18.	relays, and various software frameworks. In particular, straightforward		
19.	integration poses a technological challenge since these legacy field devices		
20.	either rely on proprietary communication protocols that were not designed to		
21.	allow continual refreshing and reporting of their states in real-time, or lack		
22.	an interface entirely which allows for seamless integration. Given the sheer		
23.	size of data (e.g., graphical entities) and complex inter-relationships		
24.	required to represent physical objects (e.g., feeders, transformers, etc.),		
25.	existing off-the-shelf solutions could not be identified to resolve these		
26.	challenges. For instance, no solution could reliably ensure that thousands of		
27.	end-devices are properly connected spatially (e.g., phasing properly shown		
28.	throughout the model) and that tracing carried out on various feeders can		
29.	reliably pick up the actual routing of these feeders in the field.		

244 What work did you perform in the tax year to overcome the scientific or technological uncertainties described in Line 242? (Summarize the systematic investigation or search) (*Maximum 100 lines*)

1.	In FY2013, St Thomas Energy sought to develop a generic geographical
2.	information management architecture that can flexibly integrate and interact
3.	with disparate legacy and future electrical and software sub-systems. To this
4.	end, the Company attempted to extend the hybrid mapping platform developed in
5.	the prior FY for integration with the smart metering network. The underlying

244	Vhat work did you perform in the tax year to overcome the scientific or technological uncertainties described in Line 242? Summarize the systematic investigation or search) (<i>Maximum 100 lines</i>)
6.	hypothesis was that flexibility and reliability could be achieved through the
7.	development of a consolidated reference framework. This framework would be the
8.	controller responsible for capturing data, representing target field devices
9.	and data querying among disparate sub-systems. In line with this approach, an
10.	interoperability layer was developed which provided for a generic interface to
11.	translate and disseminate field device events to existing and future sub-
12.	systems comprising the geo-referencing architecture. Furthermore, virtual
13.	control methodologies were developed to granularly monitor and update grid
14.	states and spatial events within topographic layers. However, in testing this
15.	approach, the Company observed inconsistencies between the layers comprising
16.	the architecture's electrical network schematics in comparison to those
17.	pertaining to geographic topography. In particular, trace algorithms to
18.	interpolate the routing of various feeders in the field were shown to be
19.	unreliable and could not accurately reflect field devices. Through further
20.	investigation, St Thomas Energy observed that these issues were attributed to
21.	changes occurring in the electrical network topology that could not be
22.	reliably detected by a strictly topographic model (e.g., circuit changes
23.	involving energized/non-energized states). To address this, the Company
24.	attempted to develop parametric extensions within the topographic layers to
25.	improve device state monitoring. In this case, the derivation of the
26.	underlying models involved consolidating data from disparate sources such as
27.	base-maps and component models, and the development of cross-referencing
28.	techniques to validate field device relationships while simultaneously
29.	eliminating redundancies. Further testing revealed, however, that this
30.	approach did not offer the reliability sought as tracing still could not be
31.	carried out accurately for all cases. Additionally, it was observed that the
32.	extensions for the topographic layers introduced overheads that degraded the
33.	architecture's performance to the order of minutes. Consequently, Ascent
34.	Energy concluded that the geographic topographical layers could not be used as
35.	a foundation to generically represent a power distribution network due to its
36.	inherent complexity. By the end of the FY, St Thomas Energy was attempting to
37.	re-design the geo-referencing architecture with a modular, state-based
38.	connectivity model not distinctively tied to the system's topographic layers.
39.	Additionally, in the upcoming FY, the Company plans to continue pursuing geo-
40.	coding techniques for reliable coordination between field entities such that
41.	accurate tracing could be achieved.

246 What scientific or technological advancements did you achieve as a result of the work described in Line 244? (Maximum 50 lines)

1.	The work performed for this project represents a technological advancement in
2.	the fields of Electrical Engineering. Specifically, the work performed in
3.	FY2013 resulted in the following advancement:
4.	
5.	- continued developing a generic geographical information management
6.	architecture that can flexibly integrate and interact with disparate legacy
7.	and future electrical and software sub-systems. In particular, a consolidated
8.	reference framework and interoperability layer were developed allowing for
9.	field device events to be translated and disseminated to existing and future
10.	sub-systems comprising the architecture. In addition, trace algorithms were
11.	developed to interpolate the routing of various feeders in the field. In
12.	failing to achieve reliable tracing, a re-design effort was undertaken towards
13.	the end of the FY for the development of a modular, state-based connectivity
14.	model independent of the architecture's topographic layers.

T2 Corporation Income Tax Return

This form serves as a federal, provincial, and territorial corporation income tax return, unless the corporation is located in Quebec or Alberta. If the corporation is located in one of these provinces, you have to file a separate provincial corporation return.

All legislative references on this return are to the federal *Income Tax Act*. This return may contain changes that had not yet become law at the time of publication.

Send one completed copy of this return, including schedules and the *General Index of Financial Information* (GIFI), to your tax centre or tax services office. You have to file the return within six months after the end of the corporation's tax year.

For more information see www.cra.gc.ca or Guide T4012, T2 Corporation – Income Tax Guide.

- Small business deduction
Canadian-controlled private corporations (CCPCs) throughout the tax year
Income from active business carried on in Canada from Schedule 7
Taxable income from line 360 on page 3, minus 100/28* 3.57143 of the amount on line 632** on page 7, minus 1/(0.38 - X***) 4 times the amount on line 636**** on page 7, and minus any amount that, because of federal law, is exempt from Part I tax
Business limit (see notes 1 and 2 below)
Notes:
1. For CCPCs that are not associated, enter \$ 500,000 on line 410. However, if the corporation's tax year is less than 51 weeks, prorate this amount by the number of days in the tax year divided by 365, and enter the result on line 410.
2. For associated CCPCs, use Schedule 23 to calculate the amount to be entered on line 410.
Business limit reduction:
Amount C 125,000 × 415 ***** 70,479 D =
11,250
Reduced business limit (amount C minus amount E) (if negative, enter "0")
Small business deduction
Amount A, B, C, or F, whichever is the least X 17 % =
Enter amount G on line 1 on page 7.
* 10/3 for tax years ending before November 1, 2011. The result of the multiplication by line 632 has to be pro-rated based on the number of days in the tax year that are in each period: before November 1, 2011, and after October 31, 2011.
** Calculate the amount of foreign non-business income tax credit deductible on line 632 without reference to the refundable tax on the CCPC's investment income (line 604) and without reference to the corporate tax reductions under section 123.4.
*** General rate reduction percentage for the tax year. It has to be pro-rated based on the number of days in the tax year that are in each calendar year. See page 5.
**** Calculate the amount of foreign business income tax credit deductible on line 636 without reference to the corporation tax reductions under section 123.4.
***** Large corporations
 If the corporation is not associated with any corporations in both the current and previous tax years, the amount to be entered on line 415 is: (total taxable capital employed in Canada for the prior year minus \$10,000,000) x 0.225%.
 If the corporation is not associated with any corporations in the current tax year, but was associated in the previous tax year, the amount to be entered on line 415 is: (total taxable capital employed in Canada for the current year minus \$10,000,000) x 0.225%.

• For corporations associated in the current tax year, see Schedule 23 for the special rules that apply.

 89052 2014 RC 0001

 Tax Year Start:
 2013-01-01

 Tax Year End:
 2013-12-31

1. BASIS OF ACCOUNTING

These financial statements have been prepared in accordance with Part V of the CICA Handbook which is the accounting framework that the financial statements were prepared in the prior year.

St. Thomas Energy Inc. is a rate regulated enterprise and as such is required to adopt international Financial Reporting Standards (IFRS). The Canadian Accounting Standards Board (AcSB) has permitted rate-regulated entities to defer their IFRS implementation until January 1, 2015.

2. NATURE OF BUSINESS

St. Thomas Energy Inc. (the Corporation) is incorporated under the Business Corporations Act (Ontario) on November 3, 2000 and is wholly owned by Ascent Group Inc.

The principal business of St. Thomas Energy Inc. is the transmission and distribution of electricity to customers within the St. Thomas area and the business is primarily regulated by the Ontario Energy Board (OEB).

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

In the opinion of management, the financial statements have been prepared within reasonable limits of materiality and within the framework of the accounting policies summarized below:

Accounting Estimates

Name: St. Thomas Energy Inc.

BN:89052 2014 RC 0001Tax Year Start:2013-01-01Tax Year End:2013-12-31

The preparation of these financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amount of revenues and expenses during the reporting period. Actual results could differ from estimates, in particular including changes as a result of future decisions made by the OEB. These estimates are reviewed periodically, and, as adjustments become necessary, they are reported in earnings in the period in which they become known.

In particular, the corporation uses estimates when accounting for certain items, including:

Allowance for doubtful accounts

Net realizable value of inventory

Useful lives of tangible assets

Useful lives of intangible assets

Unbilled revenue

Regulatory accounts

Future income taxes

Income taxes

Tax contingencies

Revenues

Employee compensation plans

Employee benefit plans

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Name: St. Thomas Energy Inc.

BN:89052 2014 RC 0001Tax Year Start:2013-01-01Tax Year End:2013-12-31

Water Accounts Receivable

Water and sewer accounts receivable are maintained by the corporation on behalf of the City of St. Thomas.

Inventories

Inventories are valued at the lower of cost and net realizable value. Cost is determined at laid down cost using an average cost basis.

Revenue Recognition

Hydro power revenue is recorded based on OEB-approved distribution rates and is recognized as electricity is delivered to customers, on the basis of cyclical billings. Unbilled revenue is based on estimates of customer usage from the last meter reading to the end of the year. The purchase of hydro power is recorded in the month to which it relates. Other revenues, which include revenues from electricity distribution related services are recognized as the services are performed.

Financial Instruments

At inception, all financial instruments which meet the definition of a financial asset or financial liability are recorded at fair market value, unless fair value cannot be reliably determined. Gains and losses related to the measurement of financial instruments are reported in statement of operations. Subsequent measurement of each financial instrument will depend on the balance sheet classification elected by the corporation. The fair

Name: St. Thomas Energy Inc.

 BN:
 89052 2014 RC 0001

 Tax Year Start:
 2013-01-01

 Tax Year End:
 2013-12-31

value of a financial instrument is the amount of consideration that would be agreed upon in an arm's length transaction between willing parties.

The following summarizes the accounting classification the corporation has elected to apply to each of its significant categories of financial instruments:

Cash Held for trading Due to related parties Loans and receivables Accounts receivable and unbilled revenue Loans and receivables Accounts payable and accrued liabilities Other financial liabilities Customer deposits Other financial liabilities Term loan and notes payable Other financial liabilities

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Regulatory Accounting

The distribution rates of the corporation are based on a revenue requirement that provides a regulated Maximum Allowable Return on Equity ("MARE") on the amount of the shareholder's equity supporting the business of the electricity distribution, which is also determined by regulation. The corporation files a rate application with the OEB annually. Rates are typically effective May 1 to April 30 of the following year. Accordingly, for the first four months of the year, distribution revenue is based on the rate approved from the previous year. Once every four years, the corporation files an Electricity Distribution Rate application ("EDR") where rates are rebased through a cost of service review.

Name: St. Thomas Energy Inc.

BN:89052 2014 RC 0001Tax Year Start:2013-01-01Tax Year End:2013-12-31

In the intervening years an Incentive Rate Mechanism application ("IRM") is filed. A cost of service EDR application is based on a forecast of the amount of operating and capital expenses, debt and shareholder's equity required to support the corporation's business. An IRM application results in a formula based adjustment to distribution rates to increase distribution rates for annual change in the GDP IPI-FDD net of a productivity factor and a "Stretch Factor" determined by the relative efficiency of an electricity distributor.

The corporation's last cost of service EDR application was made in 2011 and approved on July 28th with rates effective July 1, 2011. Such decision provided for service distribution revenue requirement and rate base of \$6,210,464 and \$23,877,673 respectively. The above amount does not include provision for the investment of the corporation in the Smart Meter Initiative. The corporation was given approval December 19th with an effective date of January 3, 2013 for the Smart Meter Initiative rate base inclusion.

The OEB has the general power to include or exclude costs, revenues, losses or gains in the rates of a specific period, resulting in a change in the timing of accounting recognition from that which would have applied in an unregulated corporation. Such change in timing involves the application of rate regulated accounting, giving rise to the recognition of regulatory assets and liabilities. The corporation's regulatory assets represent certain amounts receivable from future customers and costs that have been deferred for accounting purposes because it is probable that they will be recovered in future rates. In addition, the corporation has recorded regulatory liabilities which represent amounts for expenses incurred in different periods

Name: St. Thomas Energy Inc.

 BN:
 89052 2014 RC 0001

 Tax Year Start:
 2013-01-01

 Tax Year End:
 2013-12-31

than would be the case had the corporation been unregulated. The corporation continually assesses the likelihood of recovery of each of its regulatory assets and continues to believe that it is probable that the OEB will factor its regulatory assets and liabilities into the setting of future rates.

If, at some future date, the corporation judges that it is no longer probable that the OEB will include a regulatory asset or liability in future rates, the appropriate carrying amount will be reflected in results of operations in that period that the assessment is made. Specific regulatory assets and liabilities are disclosed in Note 5.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

On November 12, 2010, the OEB amended LDC licenses to include requirements for achieving certain CDM targets over a four year period commencing January 1, 2011. The corporation's CDM targets include a demand reduction target of 3.94 MW and a consumption reduction target of 14,920 MWh. LDCs must also comply with a new CDM Code of the OEB, which provides LDC requirements for the development and delivery of CDM Strategy to the OEB for the achievement of the LDC-specific CDM targets, annual accounting and reporting to the OEB, and eligibility criteria for performance incentive payments. The corporation has filed its CDM Strategy with the OEB.

Pension Agreements

The corporation makes contributions to the Ontario Municipal Employees Retirement System Pension Fund (OMERS), which is a multi-employer plan, on

Name: St. Thomas Energy Inc.

BN:89052 2014 RC 0001Tax Year Start:2013-01-01Tax Year End:2013-12-31

behalf of members of its staff. The plan is a contributory defined benefit plan which specifies the amount of the retirement benefit to be received by employees based on length of service and rates of pay.

Property, Plant & Equipment

Property, plant & equipment are stated at cost and are amortized on the straight-line basis over their estimated service lives. No amortization is provided for construction in progress or major spare parts.

The amortization rates are as follows:

Life Years Rate Buildings 60 1.7% Distribution system 40 - 60 1.7% - 2.5% Transformers 40 2.5% Meters 15 - 30 3.3% - 6.7% 40 - 45 2.2% - 2.5% Substations Graphical information system 15 6.7% 7.1% - 20.0% Rolling stock 5 - 14 Mobile substations 6.7% 15 Miscellaneous equipment 10.0% 10 Computer hardware and software 5 - 10 10.0% - 20.0%

When non-grouped capital assets are sold or otherwise disposed of, the related cost and accumulated amortization are removed from the respective accounts and any gain or loss on disposition is recognized in earnings. Grouped capital assets are, by their nature not readily identifiable as individual assets. The related cost and accumulated amortization is therefore removed from the

Name: St. Thomas Energy Inc.

BN:89052 2014 RC 0001Tax Year Start:2013-01-01Tax Year End:2013-12-31

respective accounts at the end of their estimated useful life regardless of actual service life. Any proceeds on disposition are recognized in earnings in the year of disposition.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Contributions to Property, Plant and Equipment

Contributions are received from developers and contractors for capital costs incurred by the corporation. These contributions are included as a reduction to the cost of the related property, plant or equipment when those assets are placed in service.

Corporate Income and Capital Taxes

Under the Electricity Act, 1998, St. Thomas Energy Inc. is required to make payments in lieu of corporate taxes to Ontario Electric Financial Corporation (OEFC). These payments are calculated in accordance with the rules for computing income and taxable capital and other relevant amounts contained in the Income Tax Act (Canada) and the Corporations Tax Act (Ontario) as modified by the Electricity Act, 1998, and related regulations.

Current Income Taxes

The provision for current taxes and the assets and liabilities recognized for the current and prior periods are measured at the amounts receivable or payable from/to the OEFC.

Name: St. Thomas Energy Inc.

BN:89052 2014 RC 0001Tax Year Start:2013-01-01Tax Year End:2013-12-31

Future Income Taxes

Future income taxes are provided for using the liability method and are recognized on temporary differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Future income tax liabilities are generally recognized on all taxable temporary differences and future tax assets are recognized to the extent that it is more likely than not that they be realized from taxable profits available against which deductible temporary differences can be utilized.

Future income taxes are calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realized, based on the tax rates (and tax laws) that have been enacted or substantively enacted by the balance sheet date. Future income taxes are charged or credited to the statement of operations.

The carrying amount of future income tax assets is reviewed at each balance sheet date and reduced to the extent that all or part of the future income tax assets have not met the more likely than not criterion. Previously unrecognized future income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become more likely than not of being recovered from future taxable profits.

Effective January 1, 2009, the corporation adopted the changes to CICA Handbook Section 3465 - Income Taxes, which states that, as a rate regulated entity, future income tax assets will be returned to customers as they are

Name: St. Thomas Energy Inc.

BN:89052 2014 RC 0001Tax Year Start:2013-01-01Tax Year End:2013-12-31

recovered. As a result, all increases and decreases in future income tax assets are offset by a regulatory liability.

Retail settlement variances represent amounts accumulated since January 1, 2011. These variances are comprised of variances between amounts charged by the Independent Electricity Market Operator and amounts billed to customers plus variances from settlement and transmission charges. In the absence of the rate regulation , these costs (revenues) would be charged to the period incurred.

The OEB approved a Rate Order on March 29, 2010, effective May 1, 2010. This Order included, in part, costs related to smart meters and Group 1 Deferral and Variance Accounts up to December 31, 2008.

Name: St. Thomas Energy Inc.

The OEB approved a Rate Order on July 28, 2011, effective July 1, 2011. This Order included, in part, costs related to Group 1 Deferral and Variance Accounts up to December 31, 2009.

5. REGULATORY ASSETS AND LIABILITIES (CONTINUED)

The OEB approved a Rate Order on April 19, 2012, effective May 1, 2012. This Order included, in part, costs related to Group 1 Deferral and Variance Accounts up to December 31, 2010.

Regulatory Future Income Tax Asset and Liability

Future income taxes are recognized on temporary differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. The corporation has recognized regulatory assets and liabilities which correspond to future income taxes that flow through the rate-making process. In the absence of rate regulated accounting, the corporation's provision for PILs would have been recognized using the liability method and there would be no regulatory accounts set up for taxes to be recovered through future rates.

9. BANK OF NOVA SCOTIA FACILITY

The corporation's banking facilities with the Bank of Nova Scotia are arranged through a credit facility for the corporation's sole shareholder, Ascent Group Inc., encompassing borrowing facilities for all its subsidiary corporations.

Under the facility, the corporation has access to the following available credit facilities:

 Operating line of \$11,000,000, by way of lines of credit, bearing interest at bank prime plus 0.25% (3.25% at December 31, 2013) or by way of bankers acceptances;

(2) 364 Revolving Term Facility of \$10,000,000, convertible to non-revolving 2 year term debt provided no event of default has occurred.
Interest is payable at bank prime plus 0.55% per annum (3.55% at December 31, 2013) or can be fixed at market rates. In addition, the interest rate on debt of up to \$7,000,000 (cumulative) can be fixed by way of interest rate swap at market rates;

(3) Scotia Lease of \$17,912

(4) Standby Letter of Credit facility (available only for the Independent Electricity System Operator commitment from St. Thomas Energy Inc.) (see note 15).

The corporation has provided to the Bank of Nova Scotia a limited guarantee, not to exceed 25% of the corporation's equity, towards the above facilities, secured by a general security agreement over all present and future personal

10. TERM LOAN 2013 2012 \$ \$

364 Day Term Loan - Bank of Nova Scotia 3,500,000 3,500,000

The above amounts were borrowed under the 364 Day Revolving Term Facility (note 9), and bear interest at bank prime (3.00% as at December 31, 2013) plus 0.55% per annum with interest payable monthly. The principal may be drawn, repaid and redrawn at any time until August 1, 2013. At that time the corporation may elect to convert the loan to 2 year non-revolving term debt. If the corporation does elect to convert the loan, principal repayment of \$197,400 will be due in 2013 and the remaining balance of \$3,302,600 will come due in 2014. Interest expense incurred on the term loan during 2013 was \$- (2012 -

\$145,301)

11. PROMISSORY NOTE PAYABLE TO CITY OF ST. THOMAS

- 2013 2012
- \$ \$

Promissory note payable 7,714,426 7,714,426

The promissory note is payable to the City of St. Thomas, bears interest at 9% per annum, and is unsecured. Interest is payable monthly. The principal balance is due on the earlier of November 15, 2015 (the maturity date) and the date which is 366 days from a written demand from the City for repayment.

The corporation was required under the terms of the note to pre-pay interest equal to 2.25% per annum in respect of each year of the term of the note.

In 2013 St. Thomas Energy Inc. paid the City of St. Thomas \$520,724 of interest costs. Total interest expense related to the promissory note payable in 2013 was \$727,407 which consisted of prepaid interest and financing costs expensed of \$206,683 in addition to the \$520,724 paid to the City of St. Thomas.

 2013-12-31

During the year, the corporation sold a vehicle to a related corporation. As this transaction was outside the normal course of operations, the gain on the sale of vehicle of \$30,400 has been recorded in retained earnings.

15. COMMITMENTS

Purchasers of electricity in Ontario, through the IESO, are required to provide security to mitigate the risk of their default based on their expected activity in the market. The IESO could draw on these guarantees if St. Thomas Energy Inc. fails to make a payment required by a default notice issued by the IMO. As at December 31, 2013, the Corporation provided prudential support of \$2,112,910.

16. CONTINGENT LIABILITIES

The corporation has made guarantees on the corporate group's lending facilities. See note 9.

17. PROVISION FOR PAYMENT IN LIEU OF TAXES 2013 2012 \$ \$

Income before provision for PIL's 1,718,504 292,365 Combined rate of federal and provincial income tax 26.50% 26.50%

Provision for PIL's at statutory rate 455,404 77,477

18. SMART METER COMMITMENT

On July 16, 2004, the Minister of Energy asked the Ontario Energy Board (OEB) to develop an implementation plan to achieve the Government of Ontario s smart meter targets for electricity: 800,000 smart meters installed by December 31, 2007 and installation of smart meters for all Ontario customers by December 31, 2010. Smart meters will provide customers with consumption information that will allow them to manage their demand for electricity. This is expected to result in more efficient use of Ontario s existing supply of electricity and reduce reliance on external sources.

18. SMART METER COMMITMENT (CONTINUED)

St .Thomas Energy Inc. has installed smart meters for all of its customers. The corporation received approval for inclusion of the smart meters in the rate base on December 13, 2012 with an effective date of January 1, 2013. The corporation has moved the smart meter costs from the regulator accounts to the capital accounts as at December 31, 2012 in preparation for the January 1 implementation date even though the official rate order was dated January 3, 2013 with an effective date of January 1.

55,400 3,495,400

20. CAPITAL DISCLOSURES

The corporation's objectives when managing capital are to safeguard the corporation's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. The corporation's capital is comprised of payable to related parties, common shares and retained earnings.

The corporation manages it capital and makes adjustments to it in light of economic conditions. The corporation will balance its overall capital structure through the payment of dividends, the repayment of debt or by undertaking other activities as deemed appropriate under specific circumstances.

The corporation's borrowing are undertaken through a banking facility in place for its parent corporation Ascent Group Inc. That facility is subject to a number of financial covenant restrictions typically associated with long-term debt, which are based on the consolidated financial results of Ascent Group Inc. As at December 31, 2013, Ascent Group Inc. is in compliance with all of its financial covenants and limitations. TO CONFIRM!

Name: St. Thomas Energy Inc.

BN:89052 2014 RC 0001Tax Year Start:2013-01-01Tax Year End:2013-12-31

21. NEW ACCOUNTING PRONOUNCEMENTS

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the corporation, are as follows:

International Financial Reporting Standards

St. Thomas Energy Inc. is a rate regulated enterprise and as such is required to adopt International Financial Reporting Standards (IFRS). The Canadian Accounting Standards Board (AcSB) has permitted organizations with rate regulated activities (RRA) to defer their adoption of IFRS up until fiscal periods beginning on or after January 1, 2015.

As such, the corporation will apply IFRS to its financial statements ending December 31, 2015 with restatement of the amounts recorded on the opening IFRS balance sheet as at January 1, 2014, for comparative purposes. The corporation continues to assess the impact of conversion to IFRS on its results of operations. The effect on the corporation's future financial position and results of operations are not estimable at this time.

22. FINANCIAL INSTRUMENTS

As a rate-regulated entity, the nature of the corporation's operations are defined and restricted by regulation. Financial operations and risks are also substantially influenced by regulation, limiting the necessity to engage in

Name: St. Thomas Energy Inc.

 BN:
 89052 2014 RC 0001

 Tax Year Start:
 2013-01-01

 Tax Year End:
 2013-12-31

risk mitigation strategies involving the use of derivatives or hedges, and the corporation did not engage in those activities during the year.

The corporation has adopted CICA Handbook Section 3861 - Financial Instruments for disclosure purposes as the Corporation's financial instruments are not subject to disclosure requirements under Section 3862 or 3863 of the CICA Handbook.

Credit risk

By regulation, the corporation is responsible for collecting both distribution and energy portions of the electricity bill. In general terms, the energy portion of the bill is four to five times larger than the distribution portion. Unless the retailer elects to bill the customer directly for the energy portion of the bill, the corporation is exposed to a credit risk substantially greater then their portion of the electricity bill.

Mitigation of substantial losses is provided through the opportunity to apply for recovery for those losses through distribution rate adjustments in future years, if approved by the regulator.

The corporation does not have any significant exposure to any individual customer. The corporation may require payment guarantees, such as a letter of credit or customer deposits. Due to a large number of customers, the corporation does not believe that it is subject to any significant concentration of credit risk.

22. FINANCIAL INSTRUMENTS (CONTINUED)

Name: St. Thomas Energy Inc.

BN:89052 2014 RC 0001Tax Year Start:2013-01-01Tax Year End:2013-12-31

Fair value

The carrying value of accounts receivable, prepaids, and accounts payable approximate their fair values due to the near-term maturity of these instruments. The carrying value of amounts due to related parties may not approximate fair value as there are no specific terms of repayment.

Interest rate risk

The corporation is exposed to interest rate risk for certain of its financial assets and liabilities, including its term loan, promissory note and operating loan (Note 10 and 11). These borrowings may expose the corporation to fluctuations in short-term interest rates, borrowings in the form of prime rate loans in Canadian dollars, bankers' acceptances and letter of credit.

23. COMPARATIVE FIGURES

Certain comparative figures presented in the financial statements have been reclassified to conform to the presentation adopted in the current year.

Inducement

This form is used to calculate inducements that a corporation must add to its income under paragraph 12(1)(x) of the ITA. If an amount reduces the capital cost of a property, this amount will be indicated in Part "Tax credits whose amount should reduce the capital cost of property."

If you want to transfer an amount to Schedule 1 and include it in the corporation's income for tax purposes, select the corresponding check box in column A. You can also select the option **Select this check box to add all the amounts to income calculated in Schedule 1** to transfer all the amounts to Schedule 1. In either case, the column A check box will be selected for that amount and it will therefore be updated to Schedule 1.

Tax credits whose amount should be added to income

Schedule 4

Corporation Loss Continuity and Application

Corporation's name	Business number	Tax year-end Year Month Day
St. Thomas Energy Inc.	89052 2014 RC0001	2013-12-31

- Use this form to determine the continuity and use of available losses; to determine a current-year non-capital loss, farm loss, restricted farm loss, or limited partnership loss; to determine the amount of restricted farm loss and limited partnership loss that can be applied in a year; and to ask for a loss carryback to previous years.
- A corporation can choose whether or not to deduct an available loss from income in a tax year. The corporation can deduct losses in any order. However, for each type of loss, deduct the oldest loss first.
- According to subsection 111(4) of the *Income Tax Act*, when control has been acquired, no amount of capital loss incurred for a tax year ending before that time is deductible in computing taxable income in a tax year ending after that time. Also, no amount of capital loss incurred in a tax year ending after that time is deductible in computing taxable income of a tax year ending before that time.
- When control has been acquired, subsection 111(5) provides for similar treatment of non-capital and farm losses, except as listed in paragraphs 111(5)(a) and (b).
- For information on these losses, see the T2 Corporation Income Tax Guide.

. . .

- File one completed copy of this schedule with the T2 return, or send the schedule by itself to the tax centre where the return is filed.
- All legislative references are to the federal Income Tax Act.

Part 1 – Non-capital losses -

Part 8 – Election under paragraph 88(1.1)(f) 190 Yes If you are making an election under paragraph 88(1.1)(f), check the box Further to a winding-up of a subsidiary, the portion of a non-capital loss, restricted farm loss, farm loss, or limited partnership loss from a wholly-owned subsidiary is deemed to be the loss of a parent from its tax year starting after the commencement of the winding-up. Note This election applies only for wind-ups under subsection 88(1) that are reported on Schedule 24, *First-Time Filer after Incorporation, Amalgamation, or Winding-up of a Subsidiary into a Parent*, and the deemed provision is only for tax years that begin after the start of the wind-up.

TAX CALCULATION SUPPLEMENTARY – CORPORATIONS

Corporation's name	Business Number	Tax year-end Year Month Day
St. Thomas Energy Inc.	89052 2014 RC0001	2013-12-31

Use this schedule if, during the tax year, the corporation:

had a permanent establishment in more than one jurisdiction

(corporations that have no taxable income should only complete columns A, B and D in Part 1);

- is claiming provincial or territorial tax credits or rebates (see Part 2); or

- has to pay taxes, other than income tax, for Newfoundland and Labrador, or Ontario (see Part 2).

- Regulations mentioned in this schedule are from the Income Tax Regulations.
- For more information, see the T2 Corporation Income Tax Guide.
- Enter the regulation number in field 100 of Part 1.

Part 1 – Allocation of taxable income

400

100				Enter the Regulation that applies (402 to 413).			
A Jurisdictio Tick yes if the co had a perma establishment jurisdiction during th	rporation nent in the	B Total salaries and wages paid in jurisdiction	C (B x taxable income**) / G	D Gross revenue	E (D x taxable income**) / H	F Allocation of taxable income (C + E) x 1/2*** (where either G or H is nil, do not multiply by 1/2)	
Newfoundland and Labrador	003 1 Yes	103		143			
Newfoundland and Labrador offshore	004 1 Yes	104		144			
Prince Edward Island	005 1 Yes	105		145			
Nova Scotia	007 1 Yes	107		147			
Nova Scotia offshore	008 1 Yes	108		148			
New Brunswick	009 1 Yes	109		149			
Quebec	011 1 Yes	111		151			
Ontario	013 1 Yes	113		153			
Manitoba	015 1 Yes	115		155			
Saskatchewan	017 1 Yes	117		157			
Alberta	019 1 Yes	119		159			
British Columbia	021 1 Yes	121		161			
Yukon	023 1 Yes	123		163			
Northwest Territories	025 1 Yes	125		165			
Nunavut	026 1 Yes	126		166			
Outside Canada	027 1 Yes	127		167			
Total		129 G		169 H			

* "Permanent establishment" is defined in Regulation 400(2).

** If the corporation has income or loss from an international banking centre: the taxable income is the amount on line 360 or line Z of the T2 return plus the total amount not required to be included, or minus the total amount not allowed to be deducted, in calculating the corporation's income under section 33.1 of the federal Income Tax Act. This does not apply to tax years starting after March 20, 2013.

*** For corporations other than those described under Regulation 402, use the appropriate calculation described in the Regulations to allocate taxable income.

Notes:

After determining the allocation of taxable income, you have to calculate the corporation's provincial or territorial tax payable. For more information on how 1.

to calculate the tax for each province or territory, see the instructions for Schedule 5 in the T2 Corporation - Income Tax Guide.

2. If the corporation has provincial or territorial tax payable, complete Part 2.

Note: Class numbers followed by a letter indicate the basic rate of the class taking into account the additional deduction allowed. Class 1a: 4% + 6% = 10% (class 1 to 10%), class 1b: 4% + 2% = 6% (class 1 to 6%).

* Include any property acquired in previous years that has now become available for use. This property would have been previously excluded from column 3. List separately any acquisitions that are not subject to the 50% rule, see Regulation 1100(2) and (2.2).

- ** Include amounts transferred under section 85, or on amalgamation and winding-up of a subsidiary. See the T2 Corporation Income Tax Guide for other examples of adjustments to include in column 4.
- *** The net cost of acquisitions is the cost of acquisitions (column 3) **plus** or **minus** certain adjustments from column 4. For exceptions to the 50% rule, see Interpretation Bulletin IT-285, *Capital Cost Allowance General Comments*.
- **** Enter a rate only, if you are using the declining balance method. For any other method (for example the straignt-line method, where calculations are always based on the cost of acquisitions), enter N/A. Then enter the amount you are claiming in column 11.
- ***** If the tax year is shorter than 365 days, prorate the CCA claim. Some classes of property do not have to be prorated. See the T2 Corporation Income Tax Guide for more information.

T2 data connection

When you select this check box, a link creation will automatically be prompted for all new copies. Furthermore, for existing copies, the **Always keep** the link and offer to restore it when in error check box will be activated by default.

Note: This option applies to the active file only. To modify this option for all clients use the Preparer Profiles template.

There are three main functionalities for the T2 Data Connection. Depending on your situation, it may not be practical or even necessary to use all of these features. To determine which features might be applicable to you and find out the suggested methodology, press F1.

Here are the main functionalities:

1) Data transfer from one client file to an R&A workchart (see the Create Links help topic).

- 2) Tables allowing you to visualise the result of allocation scenarios (see the Calculate Allocation Scenarios help topic).
- Importing data found in the R&A workcharts, including links to other returns (if any) and allocations, from one return to another (see the Import Data from Other Group Returns help topic).

- General information – Filing corporation

This workchart allows the tax preparer to input common information for the filing corporation on one screen. Right click to view a list of forms on this workchart. Press "F1" for further information on each schedule.

SCHEDULE 23

AGREEMENT AMONG ASSOCIATED CANADIAN-CONTROLLED PRIVATE CORPORATIONS TO ALLOCATE THE BUSINESS LIMIT

- For use by a Canadian-controlled private corporation (CCPC) to identify all associated corporations and to assign a percentage for each associated corporation. This percentage will be used to allocate the business limit for purposes of the small business deduction. Information from this schedule will also be used to determine the date the balance of tax is due and to calculate the reduction to the business limit.
- An associated CCPC that has more than one tax year ending in a calendar year, is required to file an agreement for each tax year ending in that calendar year.
 - Column 1: Enter the legal name of each of the corporations in the associated group. Include non-CCPCs and CCPCs that have filed an election under subsection 256(2) of the *Income Tax Act* (ITA) not to be associated for purposes of the small business deduction.
 - Column 2: Provide the Business Number for each corporation (if a corporation is not registered, enter "NR").
 - **Column 3:** Enter the association code that applies to each corporation:
 - 1 Associated for purposes of allocating the business limit (unless code 5 applies)
 - 2 CCPC that is a "third corporation" that has elected under subsection 256(2) not to be associated for purposes of the small business deduction
 - 3 Non-CCPC that is a "third corporation" as defined in subsection 256(2)
 - 4 Associated non-CCPC
 - 5 Associated CCPC to which code 1 does not apply because of a subsection 256(2) election made by a "third corporation"
 - Column 4: Enter the business limit for the year of each corporation in the associated group. The business limit is computed at line 4 on page 4 of each respective corporation's T2 return.
 - **Column 5:** Assign a percentage to allocate the business limit to each corporation that has an association code 1 in column 3. The total of all percentages in column 5 cannot exceed 100%.
 - **Column 6:** Enter the business limit allocated to each corporation by multiplying the amount in column 4 by the percentage in column 5. Add all business limits allocated in column 6 and enter the total at line A. Ensure that the total at line A falls within the range for the calendar year to which the agreement applies:

Calendar year	Acceptable range		Calendaryear	Acceptable range
2006	maximum \$300,000		2008	maximum \$400,000
2007	\$300,001 to \$400,000		2009	\$400,001 to \$500,000

If the calendar year to which this agreement applies is after 2009, ensure that the total at line A does not exceed \$500,000.

Allocating the business limit ————

Date filed (do not use this area)						Year Month Day
Is this	the calendar year to which the agreement applies . an amended agreement for the above-noted calendar year by any of the associated corporations listed below?	ar that is intended to replace a	0	. ,	050	Year 2013 1 Yes 2 No X

				Total	100.0000	500,000

Business limit reduction under subsection 125(5.1) of the ITA

The business limit reduction is calculated in the small business deduction area of the T2 return. One of the factors used in this calculation is the "Large corporation amount" at line 415 of the T2 return. If the corporation is a member of an associated group** of corporations in the current tax year, the amount at line 415 of the T2 return is equal to 0.225% x (A - \$10,000,000) where, "A" is the total of taxable capital employed in Canada*** of each corporation in the associated group for its last tax year ending in the preceding calendar year.

* Each corporation will enter on line 410 of the T2 return, the amount allocated to it in column 6. However, if the corporation's tax year is less than 51 weeks, prorate the amount in column 6 by the number of days in the tax year divided by 365, and enter the result on line 410 of the T2 return.

Special rules apply if a CCPC has more than one tax year ending in a calendar year and is associated in more than one of those years with another CCPC that has a tax year ending in the same calendar year. If the tax year straddles January 1, 2009, the business limit for the second (or subsequent) tax year(s) will be equal to the lesser of the business limit that would have been determined for the first tax year ending in the calendar year, if \$500,000 was used in allocating the amounts among associated corporations and the business limit determined for the second (or subsequent) tax year(s) ending in the same calendar year. Otherwise, the business limit for the second (or subsequent) tax year(s) will be equal to the lesser of the business limit determined for the first tax year ending in the calendar year and the business limit determined for the second (or subsequent) tax year(s) ending in the same calendar year and the business limit determined for the second (or subsequent) tax year(s) ending in the same calendar year ending in the calendar year and the business limit determined for the second (or subsequent) tax year(s) ending in the same calendar year.

** The associated group includes the corporation filing this schedule and each corporation that has an "association code" of 1 or 4 in column 3.

*** "Taxable capital employed in Canada" has the meaning assigned by subsection 181.2(1) or 181.3(1) or section 181.4 of the ITA.

Investment Tax Credit – Corporations

- General information

Agency

Canada Revenue

- Use this schedule:
 - to calculate an investment tax credit (ITC) earned during the tax year;

Agence du revenu

dŭ Canada

- to claim a deduction against Part I tax payable;
- to claim a refund of credit earned during the current tax year;
- to claim a carryforward of credit from previous tax years;
- to transfer a credit following an amalgamation or wind-up of a subsidiary, as described under subsections 87(1) and 88(1) of the federal *Income Tax Act*,
- to request a credit carryback to one or more previous years; or
- if you are subject to a recapture of ITC.
- The ITC is eligible for a three-year carryback (if not deductible in the year earned). It is also eligible for a twenty-year carryforward.
- All legislative references are to the federal Income Tax Act and Income Tax Regulations.
- Investments or expenditures, described in subsection 127(9) of the Act and Part XLVI of the Regulations, that earn an ITC are:
 - qualified property and qualified resource property (Parts 4 to 7 of this schedule);
 - expenditures that are part of the SR&ED qualified expenditure pool (Parts 8 to 17). File Form T661, Scientific Research and Experimental Development (SR&ED) Expenditures Claim;
 - pre-production mining expenditures (Parts 18 to 20);
 - apprenticeship job creation expenditures (Parts 21 to 23); and
 - child care spaces expenditures (Parts 24 to 28).
- Include a completed copy of this schedule with the T2 Corporation Income Tax Return. If you need more space, attach additional schedules.
- For more information on ITCs, see "Investment Tax Credit" in Guide T4012, T2 Corporation Income Tax Guide, Information Circular IC 78-4, Investment Tax Credit Rates, and its related Special Release.
- For more information on SR&ED, see Brochure RC4472, Overview of the Scientific Research and Experimental Development Program (SR&ED) Tax Incentive Program; Brochure RC4467, Support for your R&D in Canada, and T4088, Guide to Form T661 Scientific Research and Experimental Development (SR&ED) Expenditures Claim. Also see the Eligibility of Work for SR&ED Investment Tax Credits Policy at www.cra.gc.ca/txcrdt/sred-rsde/clmng/lgbltywrkfrsrdnvstmnttxcrdts-eng.html.

- Detailed information -

- For the purpose of this schedule, **investment** means the capital cost of the property (excluding amounts added by an election under section 21 of the Act), determined without reference to subsections 13(7.1) and 13(7.4), minus the amount of any government or non-government assistance that the corporation has received, is entitled to receive, or can reasonably be expected to receive for that property when it files the income tax return for the year in which the property was acquired.
- An ITC deducted or refunded in a tax year for a depreciable property, other than a depreciable property deductible under paragraph 37(1)(b), reduces
 the capital cost of that property in the next tax year. It also reduces the undepreciated capital cost of that class in the next tax year. An ITC for SR&ED
 deducted or refunded in a tax year will reduce the balance in the pool of deductible SR&ED expenditures and the adjusted cost base (ACB) of an
 interest in a partnership in the next tax year. An ITC from pre-production mining expenditures deducted in a tax year reduces the balance in the pool of
 deductible cumulative Canadian exploration expenses in the next tax year.
- Property acquired has to be available for use before a claim for an ITC can be made. See subsections 127(11.2) and 248(19) for more information.
- Expenditures for SR&ED and capital costs for a property qualifying for an ITC must be identified by the claimant on Form T661 and Schedule 31 no later than 12 months after the claimant's income tax return is due for the tax year in which it incurred the expenditures or capital costs.
- Partnership allocations Subsection 127(8) provides for the allocation of the amount that may reasonably be considered to be a partner's share of the
 ITCs of the partnership at the end of the fiscal period of the partnership. An allocation of ITCs is generally considered to be the partner's reasonable
 share of the ITCs if it is made in the same proportion in which the partners have agreed to share any income or loss and if section 103 is not
 applicable for the agreement to share any income or loss. Special rules apply to specified and limited partners. For more information, see
 Guide T4068, Guide for the Partnership Information Return.
- For SR&ED expenditures, the expression in Canada includes the "exclusive economic zone" (as defined in the Oceans Act to generally consist of an area that is within 200 nautical miles from the Canadian coastline), including the airspace, seabed and subsoil for that zone.
- For the purpose of this schedule, the expression Atlantic Canada includes the Gaspé Peninsula and the provinces of Newfoundland and Labrador, Prince Edward Island, Nova Scotia, and New Brunswick, as well as their respective offshore regions (prescribed in Regulation 4609).
- For the purpose of this schedule, **qualified property** means property in Atlantic Canada that is used primarily for manufacturing and processing, farming or fishing, logging, storing grain, or harvesting peat. Property in Atlantic Canada that is used primarily for oil and gas, and mining activities is considered qualified property only if acquired by the taxpayer **before** March 29, 2012. Qualified property includes new buildings and new machinery and equipment (prescribed in Regulation 4600), and if acquired by the taxpayer **after** March 28, 2012, new energy generation and conservation property (prescribed in Regulation 4600). Qualified property can also be used primarily to produce or process electrical energy or steam in a prescribed area (as described in Regulation 4610). See the definition of **qualified property** in subsection 127(9) of the Act for more information.
- For the purpose of this schedule, **qualified resource property** means property in Atlantic Canada that is used primarily for oil and gas, and mining activities, if acquired by the taxpayer **after** March 28, 2012, and **before** January 1, 2016. Qualified resource property includes new buildings and new machinery and equipment (prescribed in Regulation 4600). See the definition of **qualified resource property** in subsection 127(9) of the Act for more information.

– Detailed information (continued) -

- For the purpose of this schedule, **pre-production mining exploration expenditures** are pre-production mining expenditures incurred **after** March 28, 2012, by the taxpayer to determine the existence, location, extent, or quality of certain mineral resources in Canada, excluding expenses incurred in the exploration of an oil or gas well. See subparagraph (a)(i) of the definition of **pre-production mining expenditure** in subsection 127(9) for more information.
- For the purpose of this schedule, **pre-production mining development expenditures** are pre-production mining expenditures incurred **after** March 28, 2012, by the taxpayer to bring a new mineral resource mine in Canada into production, excluding expenses in the development of a bituminous sands deposit or an oil shale deposit. See subparagraph (a)(ii) of the definition of **pre-production mining expenditure** in subsection 127(9) for more information.

- Part 1 - Investments, expenditures, and percentages -

Investments	Specified percentage
Qualified property acquired primarily for use in Atlantic Canada	10 %
Qualified resource property acquired primarily for use in Atlantic Canada and acquired:	
- after March 28, 2012, and before 2014	10 %
- after 2013 and before 2016	5 %
– after 2015*	0 %
Expenditures	
If you are a Canadian-controlled private corporation (CCPC), this percentage may apply to the portion that you claim of the SR&ED qualified expenditure pool that does not exceed your expenditure limit (see Part 10)	35 %
Note: If your current year's qualified expenditures are more than the corporation's expenditure limit (see Part 10), the excess is eligible for an ITC calculated at the 20 % rate**.	
If you are a corporation that is not a CCPC and have incurred qualified expenditures for SR&ED in any area in Canada:	
— before 2014**	20 %
– after 2013**	15 %
If you are a taxable Canadian corporation that incurred pre-production mining expenditures before March 29, 2012	10 %
If you are a taxable Canadian corporation that incurred pre-production mining exploration expenditures***:	
- after March 28, 2012, and before 2013	10 %
- in 2013	5 %
- after 2013***	0 %
	0 70
If you are a taxable Canadian corporation that incurred pre-production mining development expenditures****:	
- after March 28, 2012, and before 2014****	10 %
- in 2014	7 %
— in 2015	4 %
- after 2015****	0 %
If you paid salary and wages to apprentices in the first 24 months of their apprenticeship contract for employment	10 %
If you incurred eligible expenditures after March 18, 2007, for the creation of licensed child care spaces for the	
children of your employees and, potentially, for other children	25 %
* A transitional relief rate of 10% may apply to property acquired after 2013 and before 2017, if the property is acquired under a written agreement e into before March 29, 2012, or the property is acquired as part of a phase of a project where the construction or the engineering and design work construction started before March 29, 2012. See paragraph (a.1) of the definition of specified percentage in subsection 127(9) for more information of the definition of the defini	for the
** The reduction of the rate from 20% to 15% applies to 2014 and later tax years, except that, for 2014 tax years that start before 2014, the reduction pro-rated based on the number of days in the tax year that are after 2013.	n is
*** Pre-production mining exploration expenditures are described in subparagraph (a)(i) of the definition of pre-production mining expenditure in subsection 127(9).	

**** A transitional relief rate of 10% may apply to expenditures incurred after 2013 and before 2016, if the expenditure is incurred under a written agreement entered into before March 29, 2012, or the expenditure is incurred as part of the development of a new mine where the construction or the engineering and design work for the construction of the new mine started before March 29, 2012. See subparagraph (k)(ii) of the definition of specified percentage in subsection 127(9) for more information. Pre-production mining development expenditures are described in subparagraph (a)(ii) of the definition of pre-production mining expenditure in subsection 127(9).

Recapture – SR&ED

– Part 16 – Recapture of ITC for corporations and corporate partnerships – SR&ED.

You will have a recapture of ITC in a year when **all** of the following conditions are met:

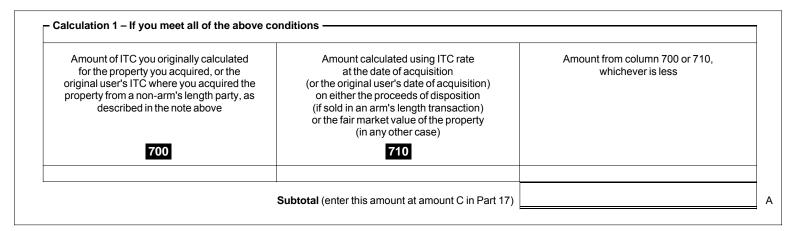

- you acquired a particular property in the current year or in any of the 20 previous tax years, if the credit was earned in a tax year ending after 1997 and did not expire before 2008;
- you claimed the cost of the property as a qualified expenditure for SR&ED on Form T661;
- the cost of the property was included in calculating your ITC or was the subject of an agreement made under subsection 127(13) to transfer qualified expenditures; and
- you disposed of the property or converted it to commercial use after February 23, 1998. This condition is also met if you disposed of or converted to commercial use a property that incorporates the particular property previously referred to.

Note:

The recapture **does not apply** if you disposed of the property to a non-arm's-length purchaser who intended to use it all or substantially all for SR&ED. When the non-arm's-length purchaser later sells or converts the property to commercial use, the recapture rules will apply to the purchaser based on the historical ITC rate of the original user.

You will report a recapture on the T2 return for the year in which you disposed of the property or converted it to commercial use. In the following tax year, add the amount of the ITC recapture to the SR&ED expenditure pool.

If you have more than one disposition for calculations 1 and 2, complete the columns for each disposition for which a recapture applies, using the calculation formats below.

Α	В	с
Rate that the transferee used in determining its ITC for qualified expenditures under a subsection 127(13) agreement	Proceeds of disposition of the property if you dispose of it to an arm's length person; or, in any other case, enter the fair market value of the property at conversion or disposition	Amount, if any, already provided for in Calculation 1 (This allows for the situation where only part of the cost of a property is transferred under a subsection 127(13) agreement.)
. , , , ,	730 erred all or a part of the qualified expenditure to ection 127(13); otherwise, enter nil in amount B I

alculation 2 (continued) – Only if you transf described in subs	erred all or a part of the qualified expenditure to ection 127(13); otherwise, enter nil in amount B l	below.

Calculation 3 As a member of the partnership, you will report your share of the SR&ED ITC of the partnership after the SR&ED ITC has been reduced by the amount of the recapture. If this amount is a positive amount, you will report it on line 550 in Part 12. However, if the partnership does not have enough ITC otherwise available to offset the recapture, then the amount by which reductions to ITC exceed additions (the excess) will be determined and reported on line 760 below.	
Corporate partner's share of the excess of SR&ED ITC (amount to be reported at amount E in Part 17) 760

Pre-Production Mining

Part 18 – Pre-production mining expenditures -

Exploration information

A mineral resource that qualifies for the credit means a mineral deposit from which the principal mineral to be extracted is diamond, a base or precious metal deposit, or a mineral deposit from which the principal mineral to be extracted is an industrial mineral that, when refined, results in a base or precious metal.

In column 800, list all minerals for which pre-production mining expenditures have taken place in the tax year.

For each of the minerals reported in column 800, identify each project (in column 805), mineral title (in column 806), and mining division (in column 807) where title is registered. If there is no mineral title, identify only the project and mining division.

Recapture – Child Care Spaces

Part 28 – Recapture of ITC for corporations and corporate partnerships – Child care spaces	
The ITC will be recovered against the taxpayer's tax otherwise payable under Part I of the Act if, at any time within 60 months of the day on which the taxpayer acquired the property:	
the new child care space is no longer available; or	
• property that was an eligible expenditure for the child care space is:	
 disposed of or leased to a lessee; or 	
- converted to another use.	
If the property disposed of is a child care space, the amount that can reasonably be considered to have been included in the original ITC (paragraph 127(27.12)(a))	
In the case of eligible expenditures (paragraph 127(27.12)(b)), the lesser of:	
The amount that can reasonably be considered to have been included in the original ITC 795	
25% of either the proceeds of disposition (if sold in an arm's length transaction) or the fair market value (in any other case) of the property	
Amount from line 795 or line 797, whichever is less	A
Corporate partnerships	
As a member of the partnership, you will report your share of the child care spaces ITC of the partnership after the child care spaces ITC has been reduced by the amount of the recapture. If this amount is a positive amount, you will report it on line 782 in Part 26. However, if the partnership does not have enough ITC otherwise available to offset the recapture, then the amount by which reductions to ITC exceed additions (the excess) will be determined and reported on line 799 below.

SCHEDULE 53

GENERAL RATE INCOME POOL (GRIP) CALCULATION

Name of corporation	Business Number	Tax year-end Year Month Day
St. Thomas Energy Inc.	89052 2014 RC0001	2013-12-31

On: 2013-12-31

- If you are a Canadian-controlled private corporation (CCPC) or a deposit insurance corporation (DIC), use this schedule to determine the general rate income pool (GRIP).
- When an eligible dividend was paid in the tax year, file a completed copy of this schedule with your T2 Corporation Income Tax Return. Do not send your worksheets with your return, but keep them in your records in case we ask to see them later.
- Subsections referred to in this schedule are from the Income Tax Act.
- Subsection 89(1) defines the terms eligible dividend, excessive eligible dividend designation, general rate income pool, and low rate income pool.

Eligibility for the various additions Answer the following questions to determine the corporation's eligibility for the various additions: 2006 addition Yes X No 1. Is this the corporation's first taxation year that includes January 1, 2006? 2. If not, what is the date of the taxation year end of the corporation's first year that includes January 1, 2006? 2006-12-31 Enter the date and go directly to question 4 3. During that first year, was the corporation a CCPC or would it have been a CCPC if not for the election X Yes of subsection 89(11) ITA? No If the answer to question 3 is yes, complete Part "GRIP addition for 2006". Change in the type of corporation X Yes 4. Was the corporation a CCPC during its preceding taxation year? No XNo 5. Corporations that become a CCPC or a DIC Yes . . . If the answer to question 5 is yes, complete Part 4. Amalgamation (first year of filing after amalgamation) XNo 6. Corporations that were formed as a result of an amalgamation Yes If the answer to question 6 is yes, answer questions 7 and 8. If the answer is no, go to question 9. 7. Was one or more of the predecessor corporations neither a CCPC nor a DIC? No Yes If the answer to question 7 is yes, complete Part 4. 8. Was one or more of the predecessor corporation a CCPC or a DIC during the taxation year that ended immediately before amalgamation? Yes No If the answer to question 8 is yes, complete Part 3. Winding-up XINO Yes 9. Has the corporation wound-up a subsidiary in the preceding taxation year? If the answer to question 9 is yes, answer questions 10 and 11. If the answer is no, go to Part 1. 10. Was the subsidiary neither a CCPC nor a DIC during its last taxation year? No If the answer to question 10 is yes, complete Part 4. 11. Was the subsidiary a CCPC or a DIC during its last taxation year? Yes No If the answer to question 11 is yes, complete Part 3.

Total GRIP adjustment for specified future tax consequences to previous tax years (amount W from Part 2)	
GRIP at the end of the tax year (line 490 minus line 560) 590 Enter this amount on line 160 of Schedule 55.	7,586,182
* For lines 110, 120, 130, and 140, the income amount is the amount before considering specified future tax consequences. This phrase is defined in subsection 248(1). It includes the deduction of a loss carryback from subsequent tax years, a reduction of Canadian exploration expenses and Canadian development expenses that were renounced in subsequent tax years (e.g., flow-through share renunciations), reversals of income inclusions where an option is exercised in subsequent tax years, and the effect of certain foreign tax credit adjustments.	
** The general rate factor for a tax year is 0.68 for any portion of the tax year that falls before 2010, 0.69 for any portion of the tax year that falls in 2010, 0.70 for any portion of the tax year that falls in 2011, and 0.72 for any portion of the tax year that falls after 2011. Calculate the general rate factor in Part 5 for tax years that straddle these dates.	
Part 2 – GRIP adjustment for specified future tax consequences to previous tax years	
Complete this part if the corporation's taxable income of any of the previous three tax years took into account the specified future tax consequences defined in subsection 248(1) from the current tax year. Otherwise, enter "0" on line 560.

Schedule 500

Ontario Corporation Tax Calculation

Corporation's name	Business number	Tax year-end Year Month Day
St. Thomas Energy Inc.	89052 2014 RC0001	2013-12-31

• Use this schedule if the corporation had a permanent establishment (as defined in section 400 of the federal Income Tax Regulations) in Ontario at any time in the tax year and had Ontario taxable income in the year.

• All legislative references are to the federal Income Tax Act and Income Tax Regulations.

• This schedule is a worksheet only. You do not have to file it with your T2 Corporation Income Tax Return.

Number of days in the before July 1, 2			x	12.00 %	=	% A1	
Number of days in the	e tax year	365					
Number of days in the ta June 30, 201		365	x	11.50 %	=	11.50000 %_ A2	
Number of days in the	e tax year	365					
	Ontario bas	ic rate of tax	for the y	vear (rate A1 pl	us A2)	11.50000	11.50000 %A3

SCHEDULE 508

ONTARIO RESEARCH AND DEVELOPMENT TAX CREDIT

Name of corporation	Business Number	Tax year-end Year Month Day
St. Thomas Energy Inc.	89052 2014 RC0001	2013-12-31

Use this schedule to:

Agency

- calculate an Ontario research and development tax credit (ORDTC);
- claim an ORDTC earned in the tax year or carried forward from any of the 20 previous tax years that are a tax year ending after December 31, 2008, to reduce Ontario corporate income tax payable in the current tax year;
- carry back an ORDTC to reduce Ontario corporate income tax payable in any of the three previous tax years, but not to a tax year that ends before January 1, 2009;
- add an ORDTC that was allocated to the corporation by a partnership of which it was a member;
- transfer an ORDTC after an amalgamation or windup; or
- calculate a recapture of the ORDTC.
- The ORDTC is a 4.5% non-refundable tax credit on eligible expenditures incurred by a corporation in a tax year that ends after December 31, 2008.
- An eligible expenditure is an expenditure for a permanent establishment in Ontario of a corporation, that is a qualified expenditure for the purposes of section 127 of the federal Income Tax Act for scientific research and experimental development (SR&ED) carried on in Ontario.
- Only corporations that are not exempt from Ontario corporate income tax and none of whose income is exempt income can claim the ORDTC.
- Attach a completed copy of this schedule to the T2 Corporation Income Tax Return.

Part 1 – Ontario SR&ED expenditure pool

Total eligible expenditures incurred by the corporation in Ontario in the tax year	A
Deduct: Government assistance, non-government assistance, or a contract payment for eligible expenditures 105	В

2000-12-31			2	2010-12-3	31	
2001-12-31			2	2011-12-3	31	
2002-12-31			2	2012-12-3	31	246
		Current tax year	2	2013-12-3	31	3,582

Total (equals line 325 in Part 3)

The amount available from the 20th preceding tax year will expire after this year. When you file your return for the next year, you will enter the expired amount on line 300 of Schedule 508 for that year.

- Part 6 – Calculation of a recapture of ORDTC -

You will have a recapture of ORDTC in a tax year when you meet all of the following conditions:

- you acquired a particular property in the current year or in any of the 20 previous tax years if the ORDTC was earned in a tax year ending after 2008;
- you claimed the cost of the property as an eligible expenditure for the ORDTC;
- the cost of the property was included in computing your ORDTC or was subject to an agreement made under subsection 127(13) of the federal Act to transfer qualified expenditures and section 42 of the *Taxation Act, 2007* (Ontario) applied; and
- you disposed of the property or converted it to commercial use in a tax year ending after December 31, 2008. You also meet this condition if you disposed of or converted to commercial use a property which incorporates the particular property previously referred to.

Note: The recapture **does not apply** if you disposed of the property to a non-arm's length purchaser who intended to use it all or substantially all for SR&ED in Ontario. When the non-arm's length purchaser later sells or converts the property to commercial use, the recapture rules will apply to the purchaser based on the historical federal investment tax credit (ITC) rate * of the original user in Calculation 1 below.

You have to report the recapture on Schedule 5 for the year in which you disposed of the property or converted it to commercial use. If the corporation is a member of a partnership, report its share of the recapture.

If you have more than one disposition for calculations 1 and 2, complete the columns for each disposition for which a recapture applies, using the calculation formats below.

* Federal ITC in calculations 1 and 2 should be determined without reference to paragraph (e) of the definition **investment tax credit** in subsection 127(9) of the federal Act.

Calculation 1 - If you meet all of the above conditions

	Y	Z	AA
	Amount of federal ITC you originally calculated for the property you acquired, or the original user's federal ITC where you acquired the property from a non-arm's length party, as described in the note above	Amount calculated using the federal ITC rate at the date of acquisition (or the original user's date of acquisition) on either the proceeds of disposition (if sold in an arm's length transaction) or the fair market value of the property (in any other case)	Amount from column 700 or 710, whichever is less
1	700	710	
		Subtotal (enter amount BB, on line KK in Part 7)	

Calculation 2 – If the corporation is deemed by subsection 42(1) of the *Taxation Act, 2007* (Ontario) to have transferred all or part of the eligible expenditure to another corporation as a consequence of an agreement described in subsection 127(13) of the federal Act complete Calculation 2. Otherwise, enter nil on line II.

				_
	СС	DD	EE	1
	The rate percentage that the transferee used to determine its federal ITC for a qualified expenditure that was transferred under an agreement under subsection 127(13) of the federal Act	The proceeds of disposition of the property if you dispose of it to a person at arm's length; or, in any other case, the fair market value of the property at conversion or disposition	The amount, if any, already provided for in Calculation 1 (this allows for the situation where only part of the cost of a property is transferred for an agreement under subsection 127(13) of the federal Act)	
	720	730	740

Schedule A - Worksheet for eligible expenditures incurred by the corporation in Ontario for the current taxation year

This worksheet allows you to report the amount of eligible expenditures entered on Form T661, *Scientific Research and Experimental Development (SR&ED) Expenditures Claim* which represents eligible expenditures as defined in section 127 of the *Income Tax Act* (ITA) with regard to scientific research and experimental development (SR&ED) carried on in Ontario and attributable to a permanent establishment in Ontario of a corporation.

Data on the worksheet is calculated based on the amounts on Form T661, but will have to be adjusted according to the rules of Ontario, if applicable, in particular when the corporation has had a permanent establishment in more than one jurisdiction. This data will be used when calculating Schedule 508 and Schedule 566.

Enter the breakdown between current and capital expenditures

SCHEDULE 546

CORPORATIONS INFORMATION ACT ANNUAL RETURN FOR ONTARIO CORPORATIONS

Name of corporation	Business Number	Tax year-end Year Month Day
St. Thomas Energy Inc.	89052 2014 RC0001	2013-12-31

- This schedule should be completed by a corporation that is incorporated, continued, or amalgamated in Ontario and subject to the Ontario Business Corporations Act (BCA) or Ontario Corporations Act (CA), except for registered charities under the federal Income Tax Act. This completed schedule serves as a Corporations Information Act Annual Return under the Ontario Corporations Information Act.
- Complete parts 1 to 4. Complete parts 5 to 7 only to report change(s) in the information recorded on the Ontario Ministry of Government Services (MGS) public record.
- This schedule must set out the required information for the corporation as of the date of delivery of this schedule.
- A completed Ontario *Corporations Information Act* Annual Return must be delivered within six months after the end of the corporation's tax year-end. The MGS considers this return to be delivered on the date that it is filed with the Canada Revenue Agency (CRA) together with the corporation's income tax return.
- It is the corporation's responsibility to ensure that the information shown on the MGS public record is accurate and up-to-date. To review the information shown for the corporation on the public record maintained by the MGS, obtain a Corporation Profile Report. Visit **www.ServiceOntario.ca** for more information.
- This schedule contains non-tax information collected under the authority of the Ontario *Corporations Information Act*. This information will be sent to the MGS for the purposes of recording the information on the public record maintained by the MGS.

Part 1 – Identification

SCHEDULE 552

ONTARIO APPRENTICESHIP TRAINING TAX CREDIT

Name of corporation	Business Number	Tax year-end Year Month Day
St. Thomas Energy Inc.	89052 2014 RC0001	2013-12-31

- Use this schedule to claim an Ontario apprenticeship training tax credit (ATTC) under section 89 of the Taxation Act, 2007 (Ontario).
- The ATTC is a refundable tax credit that is equal to a specified percentage (25% to 45%) of the eligible expenditures incurred by a corporation for a qualifying apprenticeship. Before March 27, 2009, the maximum credit for each apprentice is \$5,000 per year to a maximum credit of \$15,000 over the first 36-month period of the qualifying apprenticeship. After March 26, 2009, the maximum credit for each apprentice is \$10,000 per year to a maximum credit of \$40,000 over the first 48-month period of the qualifying apprenticeship. The maximum credit amount is prorated for an employment period of an apprentice that straddles March 26, 2009.
- Eligible expenditures are salaries and wages (including taxable benefits) paid to an apprentice in a qualifying apprenticeship or fees paid to an
 employment agency for the provision of services performed by the apprentice in a qualifying apprenticeship. These expenditures must be:

 paid on account of employment or services, as applicable, at a permanent establishment of the corporation in Ontario;
 - for services provided by the apprentice during the first 36 months of the apprenticeship program, if incurred before March 27, 2009; and
 - for services provided by the apprentice during the first 48 months of the apprenticeship program, if incurred after March 26, 2009.
- An expenditure is not eligible for an ATTC if:
 - the same expenditure was used, or will be used, to claim a co-operative education tax credit; or
 - it is more than an amount that would be paid to an arm's length apprentice.
- An apprenticeship must meet the following conditions to be a qualifying apprenticeship:
 - the apprenticeship is in a qualifying skilled trade approved by the Ministry of Training, Colleges and Universities (Ontario); and
 - the corporation and the apprentice must be participating in an apprenticeship program in which the training agreement has been
 registered under the Ontario College of Trades and Apprenticeship Act, 2009 or the Apprenticeship and Certification Act, 1998 or in
 which the contract of apprenticeship has been registered under the Trades Qualification and Apprenticeship Act.
- Make sure you keep a copy of the training agreement or contract of apprenticeship to support your claim. Do not submit the training agreement or contract of apprenticeship with your T2 Corporation Income Tax Return.
- File this schedule with your T2 Corporation Income Tax Return.

Note 5:	Column K = (J1 x line 310) + (J2 x line 312) ote 5: Include the amount of government assistance repaid in the tax year multiplied by the specified percentage for the tax year in which the government assistance was received, to the extent that the government assistance reduced the ATTC in that tax year. Complete a separate entry for each repayment of government assistance.					

File Number:	EB-2014-0113
Tab: Schedule: Page:	5 11 1 of 2
Date Filed:	September 9, 2014

1 4-Staff-31

2 Ref: Ex. 4/T. 1/Sch. 12/Att. 3, PILs model

3 In the test year, STEI used 1/5 of the 2014 non-capital loss of \$211,350. Past Board practice is

4 to include the full non-capital loss in the next year. Please revise 2015 PILS to reflect the usage

- 5 of the full 2014 non-capital loss in the 2015 test year.
- 6

7 **Response:**

8

9 STEI does not believe that this would be a fair representation of the test year to use the full 10 \$211,350 loss carry forward. This is because it is believed that the test year is supposed to be

- 11 representative of the 2015 to 2019 period and not include any one time costs or recoveries.
- 12

13 To include the full amount for the purposes of setting the rates would have the same impact as 14 recognizing 100% of the cost of the rate application in 2015. The impact over the following five 15 years would be higher than should be.

16

17 In reviewing the impact on a financial basis, Exhibit 1 (attached) shows the detail of the impact 18 on STEI.

19

As noted in the first net present value ("NPV") calculation, the cumulative effect of the loss 20 21 spread equally over five years (as presented) represents a positive impact of \$48,033 (per A. in 22 Exhibit 1).

23

24 If the full amount was recognized in 2015 only, the NPV would be higher at \$53,164 (per B. in 25 Exhibit 1). The negative impact is that if the rates are based off of the loss carry forward used 26 100% in the test year, and then STEI will not be compensated for the period 2016 to 2019. The 27 impact would be a negative result of \$187,001 (per C. in Exhibit 1).

28

29 Therefore, STEI believes that the fairest approach to recognizing the loss carry forward is to 30 recognize the loss in the test year on a 1/5 basis (as filed). If not, the STEI would be penalized 31 \$130,993 in value over the period.

--------------	---	------------

- 2 Ref: Ex. 9/T. 1/Sch. 5, page 2, Appendix 2-ED
- 3 Ref: Ex. 1/T. 5/Sch. 17/Att. 2.1
- 4 Ref: Accounting Procedures Handbook ("APH") FAQ July 2012, Appendix A
- 5

Per APH FAQ July 2012, Appendix A, Account 1576 is to record the financial differences arising
as a result of accounting changes to depreciation expense and capitalization policies permitted
by the Board under Canadian GAAP in 2012 or as mandated by the Board in 2013

- a) Per Exhibit 1, capital assets had been constructed by STEI's affiliate AESI and had been
 treated as purchased asset acquisitions from the related party. This indicates that STEI
 did not capitalize any overheads on self-constructed assets in the past. Starting January
 1, 2012, STEI indicated that it will only capitalize directly attributable costs in the cost of
 self-constructed assets. As such, there is no accounting difference in the capitalization
 policy.
- i. In comparison to the 2012 to 2014 additions in PP&E under revised CGAAP,
 please explain how STEI estimated the 2012 to 2014 additions in PP&E values
 under former CGAAP of Appendix 2-ED.
- ii. Please recalculate Account 1576 assuming only depreciation changes and nocapitalization changes.
- 20 b) Please explain how STEI recorded costs incurred from its Master Service
- Agreement with affiliate companies prior to the restructuring in 2012 (i.e. what costs were capitalized or expensed and on what basis).
- 23
- 24 Response:

a)

- 25
- 26

i. STEI considered it fair and prudent to include the impact of restructuring in
 determining account 1576 changes. In other words, it is believed that the underlying
 intention of this account was to estimate the overall substance of the difference
 between the previous CGAAP full cost approach to capital and the related
 depreciation measurement. To attempt to isolate the one piece without the other

File Number:	EB-2014-0113
Tab: Schedule: Page:	8 3 2 of 3
Date Filed:	September 9, 2014

because of the overall "form" of the process would unfairly impact either the LDC or the rate payer in this case.

The impact of restructuring resulted in a significant reduction in the cost of capital additions that formed the basis of the 2011 COS Decision, with the elimination of the MSA. STEI is of the view that this is a unique situation and that these additions cannot be considered as "typical" third party additions as STEI was cognizant of the fact the restructuring would result in lower capital additions thereby reducing the value of the rate base.

11 As shown in the table below, STEI re-calculated the capital additions in accordance 12 with the former MSA versus the actual costs, which results in a \$2,982,232 The capital administration amount of \$464,449 reflects additional 13 difference. 14 changes to policy, however in an effort to be conservative, limit the impact on 15 customers and to "reset" the variance to a 2011 COS Board Approved comparative, 16 STEI reduced the MSA difference by this amount resulting in a net increase of 17 \$2,517,783. However, this amount could in fact be added back resulting in a before 18 amortization difference of \$3,446,681 and a variance of \$1,013,917 versus the 19 \$85,019 provided in Appendix 2-EB.

ii. STEI wants to emphasize that the restructuring resulted in a significant reduction to the capital costs on which the 2011 COS Decision was based upon. Therefore this change needs to be considered with the account 1576 changes and that by only showing the changes in amortization in Appendix 2-ED is misleading and therefore

1STEI has not provided the table. The components of the account have been2provided in the above table.

3 b) STEI recorded costs on an activity basis, that being, all costs associated with capital

4 activities were capitalized and all activities relating to operating, maintenance and 5 administrative costs were expensed.

1 9-Staff-38

- 2 Ref: Ex. 9/T. 1/Sch. 6, page 1
- 3 STEI stated that it has not been tracking the incremental costs for providing retail services per
- 4 Article 490, but will endeavor to quantify the variance. Please quantify the amounts for Account
- 5 1518 RCVA Retail and Account 1548 RCVA STR from January 1,
- 6 2010, after STEI's last Group 2 DVA disposition in its 2011 cost of service rate application.
- 7

8 Response:

- 9
- 10 STEI does not have the current resources or information available at this time to be able to
- 11 calculate the variance from January 1, 2010.

2 Ref: Ex. 9/T. 1/Sch. 7/Att. 1, EDDVAR Continuity Schedule

- 3 In the EDDVAR continuity schedule for Account 1595 (2012),
- 4 a) In 2012, please confirm that the (\$49,929) in the Transactions Debit/(Credit) during 2012 5 column represents the net amount transferred to the account as per STEI's 2012 IRM 6 decision and the rate riders collected in 2012. If not, please explain what the balance is 7 comprised of.
- 8 b) In 2012, please confirm that the (\$4,508) in the Interest Jan-1 to Dec-31-12 column 9 represents the net amount transferred to the account as per STEI's 2012 IRM decision 10 and the carrying charges calculated on the balance in 2012. If not please explain what 11 the balance is comprised of.
- 12 c) In 2013, please explain what the (\$278,574) in the Other Adjustments during Q2 2013 13 column is.
- 14

15 **Response:**

- 16
- 17 a) STEI confirms that amount represents the net amount transferred to the account as per 18 STEI's 2012 IRM decision and the rate riders collected in 2012.
- 19 b) STEI confirms that amount represents the net amount transferred to the account as per 20 STEI's 2012 IRM decision and the carrying charges calculated on the balance in 2012.
- 21 c) The (\$278,574) represents the disposition of account 1562 Deferred Payments in Lieu of
- 22 Taxes that was refunded to rate payers per EB-2011-0196.

3	Ref: E	x. 9/T. 1/Sch. 7/Att. 1, EDDVAR Continuity Schedule
4		
5	For Ac	count 1595 (2011),
6	a)	Please confirm that the balance for Account 1595 (2011) is actually Account 1595
7		(2014), relating to amounts approved for disposition in STEI's 2014 IRM Decision (EB-
8		2013-0171).
9	b)	If it is not actually Account 1595 (2014), please explain what the account is for as STEI's
10		Group 1 balance as at December 31, 2012 was already approved for disposition in
11		STEI's 2014 IRM.
12	c)	Please update the evidence as appropriate.
13		
14	Respo	onse:
15		
16	a)	STEI confirms that Account 1595 (2011) is related to the approved disposition in STEI's
17		2014 IRM Decision (EB-2013-0171). The 1595 (2011) recovery is the amount remaining
18		from the 2011 RSVA disposition.
19	b)	No response required see a)
20	c)	No update required see a)

- 4 Ref: Decision and Order EB-2012-0100/EB-2012-0211
- 5

6 In STEI's 2013 IRM Decision, the Smart Metering Entity charge was referenced as a charge

7 effective May 1, 2013 for distributors in the Board's annual Yearbook of Electricity Distributors.

8 Per Decision and Order EB-2012-0100/EB-2012-0211, distributors are to use Account 1551

9 Smart Metering Entity Charge Variance Account.

10 This account is classified as a Group 1 account. STEI has not requested this account for 11 disposition in Table 9-4. Please quantify the amount in the account and explain why it is not

- 12 requested for disposition. Please update the evidence as necessary.
- 13

14 **Response:**

15

16 Account 1581, Smart Meter Entity Charge was not included in the EDVAR Continuity Schedule 17 and as such the amount was overlooked.

18

19 The table on the following page provides the estimated SME variance of \$19,740. STEI does 20 not feel that this amount warrants changing the RSVA disposition at this time, but is willing to 21 update as necessary prior to a settlement hearing.

3	
4	STEI states that it "is unable to calculate the specific recovery of the NBV by class and as such
5	is seeking a Residential and GS<50 kW recovery based upon 2015TY customer count."
6	
7	a) What were the installation costs for each of the meter types of the removed stranded
8	meters for each class?
9	d) How many meters of each type were removed from service for each class?
10	e) Using the responses to a) and b) please provide an allocation of the remaining net
11	book value of stranded meter costs for each class using a weighted average of the
12	installation costs for the associated meters. Please provide updated calculations of the
13	Stranded Meter Rate Rider using this allocation.
14	
15	Response:
16	
17	a) Based upon information extracted from the EB-2010-0141 cost allocation model,
18	residential meter install costs were \$50.00 and GS < 50 kW meter installed costs
19 20	averaged \$107.26.
20 21	d) As shown in the Board Smart Meter model provided in EB-2012-0348, 14,632 residential meters and 1,655 GS < 50 kW meters were removed.
22	e) STEI has calculated the weighted average of the installed meter costs based upon the
22	number of meters removed per the Board Smart Meter model included in Board Decision
24	and Order EB-2012-0348 and the average installed metered costs based upon the cost
25	allocation model included in EB-2010-0141.
26	As provided in the following table, 80.5% of the stranded meter costs would be
27	recovered from the residential customer class and 19.5% from the GS < 50 kW customer
28	class.
29	

File Number:	EB-2014-0113
Tab: Schedule: Page:	8 8 2 of 3
Date Filed:	September, 2014

from Service 14.632	installed costs 50.00	Total	Average
14,632	50.00	721 600	
	50.00	731,600	80.5%
1,655	107.26	177,515	19.5%
16,287		909,115	

1 2

Using the same customer forecast included in the 2015 COS application the stranded
meter rate rider would change from \$0.42 per residential and GS < 50 kW customer to
\$0.37 per residential customer and \$0.79 per GS < 50 kW customer over a five-year
period commencing January 1, 2015.
