MANAGER'S SUMMARY

PREAMBLE

Welland Hydro's current electricity distribution rates, effective May 1, 2014 were determined in a 2014 4th Generation Incentive Rate-setting ("Price Cap IR") filing; EB-2013-0177 and can be found in Appendix A to this Application.

Welland Hydro has complied with Chapter 3 of the Board's Filing Requirements for Distribution Applications, dated July 25, 2014, in preparing this Application.

The application, as submitted, will affect all of Welland Hydro's customers.

ELEMENTS OF THE APPLICATION

In this 2015 4th Generation Incentive Rate-setting ("Price Cap IR") Application, Welland Hydro has included discussion of:

- The annual 2015 price cap adjustment,
- Tax changes,
- Deferral and Variance Account dispositions,
- Retail Transmission Service Rate adjustment,
- Proposed Rates & Bill Impact and,
- Rate Mitigation

Welland Hydro is not including a Z-factor claim, a LRAM claim, an Incremental Capital Investment Recovery Request, a Renewable Generation Connection Funding Adder, or a Smart Grid Funding Adder.

2015 PRICE CAP ADJUSTMENT

Welland Hydro is submitting a price cap adjustment of 1.55% as stipulated in Chapter 3 of the Board's Filing Requirements for Distribution Applications, dated July 25, 2014. This is based on the current default metrics; an inflation factor of 1.7%, a productivity factor of 0.00%, and a stretch factor of 0.15% (representing Stretch Factor Group II). Welland Hydro acknowledges that the Board may update Welland Hydro's 2015 IR Application with the final parameters to be established in its supplemental report on the Renewed Regulatory Framework for Electricity Distributors ("RRWE").

TAX CHANGES

Under a 4th Generation IR, a 50/50 sharing of the impact of currently known legislated tax changes as applied to the tax level reflected in the Board approved base rates for a distributor applies.

In Welland Hydro's most recent cost of service electricity distribution rate application, EB-2012-0173, the Board approved recovery of \$53,472 for federal and provincial income taxes in the rate requirement. There is no known legislated tax changes that will apply to the tax level reflected in the Board approved base rates determined in EB-2012-0173. As a result, Welland Hydro is not applying for a tax change rate rider in this Application and has completed the tax portion of the 2015 IRM Rate Generator Module accordingly.

DEFERRAL AND VARIANCE ACCOUNT DISPOSITION

Approved Deferral and Variance Account Rate Riders

In the Decision and Order for Welland Hydro's 2013 Cost of Service Application (EB-2012-0173) dated March 21, 2013 the Board approved Rate Riders for Deferral/Variance Account Disposition (2013) and Global Adjustment Sub-Account Disposition (2013) (Applicable only to

non-RPP customers) over a two-year period from May 1, 2013 to April 30, 2015. These rate riders are being removed from rates in this rate application.

In the Decision and Order for Welland Hydro's 2013 Cost of Service Application (EB-2012-0173) dated March 21, 2013 the Board approved Rate Riders for the Residential and GS<50 customer classes for Stranded Meters effective until April 30, 2017 and a Rate Rider for Smart Metering Entity Charge effective until October 31, 2018. All of these rate riders will remain in rates in this rate application.

In the Decision and Order for Welland Hydro's 2014 4th Generation Incentive Rate-setting ("Price Cap IR") application (EB-2013-0177) dated March 13, 2014 the Board approved Rate Riders for Deferral/Variance Account Disposition (2014) and Global Adjustment Sub-Account Disposition (2014) (Applicable only to non-RPP customers) over a one-year period from May 1, 2014 to April 30, 2015. These rate riders are being removed from rates in this rate application.

Welland Hydro has previously disposed of Account 1562 Deferred PILS (EB-2011-0202), Account 1521 Special Purpose Charge (EB-2011-0202), Account 1555 Smart Meter Capital (EB-2011-0415), and Account 1556 Smart Meter Operating Costs (EB-2011-0415).

Proposed Disposition of the Balances of Deferral and Variance Accounts

In Chapter 3 of the Board's Filing Requirements for Electricity Distribution Rate Applications, Section 3.2.3, provides that under 4th Generation IR, the distributor's Group 1 audited account balances as of December 31, 2013 will be reviewed and disposed if the preset threshold of \$.001 per kWh (debit or credit) has been exceeded. Consistent with a letter from the Board on July 25, 2014, distributors may now elect to dispose of Group 1 account balances below the threshold.

Welland Hydro has completed and is filing with this application, the Board's 2015 IRM Rate Generator Model Version 1.1. A copy of the schedules contained in the model is included in Appendix C attached. Table 1 below contains a summary of the Group 1 Variance Account

Balances for Disposition contained in Tab 5 of the 2015 IRM Rate Generation Model. Table 1 is based on balances as at December 31, 2013, plus projected carrying charges to April 30, 2015.

Table 1 – Group 1 Variance Account Balances for Disposition

Total Group 1 Account Balances		\$447,917	\$2,546	\$450,463	\$8,779	\$459,242

Welland Hydro's Group 1 balances as of December 31, 2013 plus projected interest to April 30, 2015 amounts to a debit of \$459,242. Upon completion of the schedules in Tab 6 of the 2015 IRM Rate Generation Model, Welland Hydro has determined that the threshold of \$.001 per kWh has been met as shown in Table 2 below and therefore has included for disposition the Group 1 total amount of \$459,242.

Table 2 - Threshold Test

Total Claim for Threshold Test (All Group 1 Accounts)	\$459,242
Total Metered kWh	365,417,440
Threshold Test (Total claim per kWh)	0.0013

The estimated volumes for metered kWh and metered kW are from the 2013 Cost of Service Rate Application EB-2012-0173 (most recent Board approved forecast) with the exception of the Large Use class. In May, 2014 Welland Hydro's Large Use customer suspended production until further notice. As a result, Welland Hydro has based the metered kWh and metered kW for the Large Use class on annualized actual consumption for this customer from May to September 2014. It is also anticipated that should this customer continue to remain idle that this account

will be switched from the Large Use Class to General Service >50kW effective January 1, 2015. The resulting lost distribution revenue will have a significant impact on Welland Hydro's Regulated Return on Equity in 2015.

The forecasted billed kWh for Non-RPP customers (with the exception of the large use customer class) is based on 2013 actual numbers. During 2013, the Large Use customer was considered Class A for Global Adjustment purposes. As a result, they would not be subject to any rate rider disposition of balances in account 1589 RSVA Global Adjustment. Forecasted billed kWh for Non-RPP Customers was reduced to zero for this customer class.

Welland Hydro can confirm for the Board that no adjustments have been made to any deferral and variance account balance previously approved by the Board on a final basis.

The resulting allocation of the Group 1 balance by account and rate class is shown in Table 3 below.

The EDDVAR Report states that the default disposition period used to clear Group 1 Account balances by means of a rate rider should be one year. However, a distributor could propose a different disposition period to mitigate rate impacts or address any other applicable considerations, where appropriate.

Welland Hydro is proposing a two year disposition period in order to minimize rate volatility and minimize customer bill impacts. Welland Hydro notes the Board has approved a two year

disposition period for Group 1 account balances in Welland Hydro's 2009, 2010, 2012, and 2013 rate applications. However, the Board dismissed Welland Hydro's request for a two year disposition of a favourable variance of \$-762,222 in its 2014 IRM Rate Application EB-2013-0177 and disposed of this balance over a one year period. The resulting removal of this favourable variance from rates as of May 1, 2015 and the disposition of unfavourable variances in the current year will have significant customer bill impacts. As a result, Welland Hydro has requested recovering these unfavourable variances over a two year period to minimize impacts on customers. Welland Hydro will further discuss RSVA variances in the Rate Mitigation section of this application.

Based on a 2 year disposition period, the proposed Deferral/Variance and Global Adjustment Rate Riders are shown in Table 4 below.

RETAIL TRANSMISSION SERVICE RATE ADJUSTMENT

Revision 3.0 of Guideline (G-2008-001) on Retail Transmission Service Rates dated June 28, 2012 instructs electricity distributors to adjust their retail transmission service rates ("RTSR's") based on a comparison of historical transmission costs adjusted for new UTR levels, and revenues generated from existing RTSRs. Welland Hydro has calculated the adjustments to the current RTSRs using Tabs 13 to 23 in the 2015 IRM Rate Generator model. Welland Hydro acknowledges that the Board will adjust each distributors 2015 IRM rate application model to incorporate the January 1, 2015 UTR adjustments. The non-loss adjusted metered kWh and

non-loss adjusted metered kW used in the model are from the 2013 RRR 2.1.5 filing. Welland Hydro has included the RTSRs as calculated in Tab 23 of the model in the proposed Tariff of Rate and Charges effective May 1, 2015 with the exception of the General Service 50 to 4,999 KW Service Classification.

The current Tariff of Rates and Charges for the General Service 50 to 4,999 KW Service Classification contains separate rates for Interval and Non-Interval customers for Retail Transmission Rate – Network charges and for Retail Transmission Rate - Line & Transformation Connection charges. Welland Hydro is proposing to combine these into one Retail Transmission Rate – Network charge and one Retail Transmission Rate – Line & Transformation Connection charge for this service classification. Welland Hydro is proposing this change as a result of the Board's recent decision mandating that all GS>50 customers have an interval meter installed within the next five years which will eliminate the need for separate rates based on meter types. Welland Hydro is also unaware of any technical reason to have separate transmission rates based on the type of meter installed. The calculation of the blended transmission rates for the General Service 50 to 4,999 KW is provided in Table 5 below.

Table 5 – General Service 50 to 4,999 Proposed RTRS Rates

Rate Class	Unit	Existing RTRS Network	Loss Adjusted Billed kW	Current Wholesale Billing	Blended RTRS Network	Existing RTRS Connection	Loss Adjusted Billed kW	Current Wholesale Billing	Blended RTRS Connection

A summary of the proposed RTSRs is provided in the following Table 6.

PROPOSED RATES & BILL IMPACTS

Welland Hydro's proposed Tariff of Rates which can be found in Appendix B attached are outputs of the Board's 2015 IRM Rate Generator Model Version 1.1. Bill Impacts by Customer Class are included in Appendix D attached. Table 7 below identifies the monthly total bill impacts for the Residential and General Service less than 50 kW customer classes.

Table 7 - Bill Impacts

Customer Class	Average Monthly Volume kWh	Distribution Charges		Bill Impacts on Distribution Charges		Total Bill Charges		Total Bill Impact	
		Current	Proposed	\$	%	Current	Proposed	\$	%

Welland Hydro submits that the bill impacts, although reasonable have been impacted by the movement in Deferral/Variance account rate riders as shown in Table 8 below.

Table 8 - Change in Deferral/Variance Rate Rider Bill Impacts

RATE MITIGATION/CONCLUSION

Welland Hydro has complied with the instructions provided in the OEB's 2015 IRM Rate Generator Model as well as the OEB's Chapter 3 Requirements dated July 25, 2014. As a result Welland Hydro applies for an Order or Orders approving the Tariff of Rates and Charges set out in Appendix B to this Application as just and reasonable rates and charges pursuant to section 78 of the OEB Act, to be effective May 1, 2015.

As indicated in the bill impact section above, the majority of the increase to customers bills in this rate application are related to the change in the Deferral/Variance Account rate riders. Welland Hydro submits that two factors could be considered when considering the disposition of Group 1 variances as detailed in Table 1 on page 4 of this manager's summary.

The first is the balance in Account 1595 relating to the deferral/variance account rate riders from the 2012 IRM Rate Application EB-2011-0020 (Decision March 26, 2012). This rate rider was removed from rates effective May 1, 2014. The current balances and estimated interest to April 30, 2015 are shown in Table 9 below:

Table 9 – 1595 Balances 2012 IRM Rate Riders

Total Approved Recovery/(Disposition)	-\$1,450,153.37
Actual Recovery - Final	<u>-1,373,957.23</u>
Balance to Dispose Before Interest	-\$76,196.14
Interest December 31, 2013	-20,483.28
Interest January to December 2014	-1,650.50
Interest January to April 2015	<u>-304.20</u>
Total to Dispose in 2016 IRM	-\$98,634.12

Welland Hydro confirms that Board policy is to dispose of audited balance in variance accounts as at December 31, 2013 along with interest to April 30, 2015. However, there will be no further recoveries from these rate riders as they were removed from rates effective May 1, 2014. Should the balance of this 1595 Group 1 Variance be included for disposition it would drop the total variance to be disposed below the threshold as shown in Table 10 below:

Table 10 – Threshold Test including 1595 Balances 2012 IRM Rate Riders

Total Claim for Threshold Test- Table 2	\$459,242
Adjustment for 2012 Def/Var Balances	<u>-98,634</u>
Total Claim with 2012 Def/Var Balances	\$360,608
Total Metered kWh - Table 2	365,417,440
Threshold Test per kWh	0.00099

The second factor to be considered is the Group 1 account variances year to date in 2014 and their forecasted balances for the year. As at September 30, 2014 the balance in Group 1 variance accounts for 2014 are sufficiently favourable to offset the unfavourable balances for the 2013 year. No material changes are forecast to the variance account balances for the remainder of the 2014 year.

Welland Hydro has prepared Table 11 below displaying revised bill impacts without the disposal of 2013 Group 1 Variance/Deferral accounts:

Table 11 – Bill Impacts excluding 2015 Proposed Deferral/Variance Rate Riders

Unmetered Scattered Load	150		\$30.27	\$30.89	2.05%	\$0.05	0.17%	\$30.84	1.88%
Sentinel Lighting	120	0.3	\$18.23	\$18.50	1.48%	\$0.13	0.71%	\$18.37	0.77%
Street Lighting	16	0.044	\$4.39	\$4.45	1.37%	\$0.02	0.46%	\$4.43	0.91%

Based on the balance to dispose in account 1595 for 2012 IRM Rate Riders and the forecasted deferral/variance accounts for 2014, Welland Hydro submits that deferring the disposition of Group 1 Deferral/Variance accounts would reduce the proposed bill impact for every customer class.
