Subject: APPLICATION FILE NUMBER: EB-2014-0261

Hello.

I am writing today to voice my concern and inquiry about receiving further information regarding the Application number #EB-2014-0261. My primary concern with this project is the addition of a larger compressor at the Lobo pumping station.

Being a Gas Pipeline Landowner, located just across the road from the main pumping station, I have no problem with the pipeline or systems in place.

As mentioned, I would like to hear further about what kind of decibal levels the pumping station is operating at now at full capacity and what to expect if this project proceeds.

Please forward me all relevant information

Thankyou

Gary Goertz
