

Ms. Kirsten Walli
Board Secretary,

My name is Paul Babirad and I am writing on behalf of my father Jim Babirad who owns 40 acres of land on top of an Enbridge natural gas pool referred to as "Crowland" in the Niagara Region of Ontario. There is no executed agreement for storage rights between Enbridge and my father. Mr Babirad has owned this property from 1962 to present and has never received any compensation for the use of storage/pore space from Enbridge.

As such, we are formally applying to the OEB to determine compensation payable. This application is under section 38.3 of the OEB Act :

Authority to store

38. (1) The Board by order may authorize a person to inject gas into, store gas in and remove gas from a designated gas storage area, and to enter into and upon the land in the area and use the land for that purpose. 1998, c. 15, Sched. B, s. 38 (1).

Right to compensation

(2) Subject to any agreement with respect thereto, the person authorized by an order under subsection (1),

(a) shall make to the owners of any gas or oil rights or of any right to store gas in the area just and equitable compensation in respect of the gas or oil rights or the right to store gas; and

(b) shall make to the owner of any land in the area just and equitable compensation for any damage necessarily resulting from the exercise of the authority given by the order. 1998, c. 15, Sched. B, s. 38 (2).

Determination of amount of compensation

(3) No action or other proceeding lies in respect of compensation payable under this section and, failing agreement, the amount shall be determined by the Board. 1998, c. 15, Sched. B, s. 38 (3).

Background Evidence

In 1965 my parents, Jim and Theresa Babirad, granted Enbridge "in fee simple all mines, minerals and mining rights and the right to work the same" for a one time payment of \$800. A copy of the original document is attached to this application. The signed indenture effectively severed the property into a surface estate and a mineral estate. My parents retained ownership to the surface estate but sold to Enbridge the mineral estate for the sum of \$800.

We assert that the storage/pore space rights belong to the surface owner in situations where the land has been severed into a surface estate and a mineral estate. The underlying justification is the Common Law principle that the landowner owns everything from "heaven to hell" (*Cuis est solum, eius est usque ad coelum et ad inferos*). Unless the landowner has explicitly sold the rights to an asset of the property then the asset belongs to the landowner.

In this case my parents sold to Enbridge the right to extract all the minerals from underneath the land and Enbridge retains ownership of any physical structures (mines) it has built in order to extract the minerals. My parents did not sell the storage /pore space rights. The word storage does not appear in the signed indenture. The air/pore space that Enbridge has been storing natural gas in under my parents property is not a mine -- it is a naturally occurring geologic formation.

My parents sold to Enbridge the mineral estate for \$800. If oil, gold, natural gas or any other mineral was discovered under the surface of the property it would belong to Enbridge. But the pockets of air or pore space that naturally exist under the property was not sold and therefore belongs to the landowner. If Enbridge wanted to purchase the storage/pore space rights to the property they needed to have explicitly stated storage/pore space rights in the signed indenture as they do for the much more common landowner storage rights lease agreements.

Indeed recommendation #2 of the OEB's 1964 Crozier report states:

"The Board recommends that there be a requirement that, where storage rights are included in a production lease, the caption include, in bold type, reference to storage rights, and clauses dealing with storage be separated from those dealing with production."

Respectfully,

Paul Babirad
