Re: 2014 IRM Application EB-2014-0274

Dear Ms. Walli:

Natural Resource Gas Limited ("NRG") hereby files its 2014 IRM application for rates effective October 1, 2014.

This document is being filed pursuant to the Board's e-Filing Services.

Yours Truly,

A handwritten signature in cursive script, appearing to read 'L O'Meara', is written in dark ink.

APPLICATION

IN THE MATTER OF the Ontario Energy Board Act
1998, S.O.1998, c.15, (Schedule B);

AND IN THE MATTER OF an Application by Natural Resource Gas Limited for an Order or Orders approving or fixing just and reasonable rates and other charges for the sale, distribution, transmission and storage of gas commencing October 1, 2014.

Natural Resource Gas Limited ("NRG" or "the Applicant") is a privately owned utility that sells and distributes natural gas within Southern Ontario and charges Board-authorized rates (EB-2013-0183) for the distribution service it provides. The utility supplies natural gas in Aylmer and surrounding areas to approximately 8,000 customers. NRG's service territory stretches from south of Highway 401 to the shores of Lake Erie, from Port Bruce to Clear Creek.

NRG is currently using an incentive ratemaking mechanism (“IRM”) which expired on September 30, 2014. On August 22, 2014 NRG filed an Application (the “August 22nd Application”) with the Ontario Energy Board (the “Board”) under section 36 of the *Ontario Energy Board Act, 1998*, S.O. c.15, Sched. B, as amended. The August 22nd Application requested the Board to approve the continuation of the current IRM framework to set distribution rates and other charges for NRG’s next two fiscal years, from October 1, 2014 to September 30, 2016. The Board assigned file number EB-2014-0274 to the August 22nd Application.

On November 11, 2014 the Board held an oral proceeding in the Board's North Hearing Room on the 25th floor at 2300 Yonge Street, Toronto. The Board heard submissions from parties on the requested continuation of the current IRM framework. At the conclusion of the proceeding, the Board approved NRG's request to continue the existing IRM framework

for two years.

In response to the Board's approval, NRG has prepared this 2014 IRM Application (the "Application") for the 2015 fiscal year in general conformity with the Board's Chapter 3 Incentive Regulation Filing Requirements for Electricity Distribution Rate Applications - 2014 Edition for 2015 Rate Applications, dated July 25, 2014. The Application is supported by written evidence provided in the pages that follow.

NRG has prepared an Excel based 2014 IRM Adjustment Model to support the calculation of rates proposed in this Application. A live working version of this model has been filed as supporting material to this Application. A hard copy of the model is provided in Appendix A.

NRG has assumed the file number for this Application will continue to be EB-2014-0274, as this Application is essentially the implementation of the Board's Decision on the August 22nd Application. In addition, this Application requests approval of two minor items (NRG's transportation rates and NRG's existing Rules and Regulations and Schedule of Service Charges) included in the August 22nd Application but not disposed of at the November 11th oral proceeding.

Therefore, in this Application, NRG applies for Board approval of the following:

- a revenue requirement increment based on previous 2013 rates adjusted by a price cap adjustment;
- the continuation of the current rate rider to refund shared tax savings;
- the continuation of NRG's current transportation rates; and
- the continuation of NRG's current Rules and Regulations and Schedule of Service Charges.

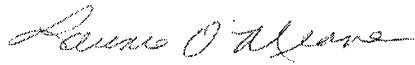

Pre-filed evidence on these last two items was filed as part of the August 22nd Application.

The Applicant requests that, pursuant to Section 34.01 of the Board's *Rules of Practice and Procedure*, this proceeding be conducted by way of written hearing.

1 The Applicant requests that a copy of all documents filed with the Board in this proceeding
2 be served on the Applicant.

3
4 DATED at Aylmer, Ontario, this 25th day of November, 2014.

5 **NATURAL RESOURCE GAS LIMITED**

STATEMENT OF PUBLICATION

Given that Notice has already been provided under this docket number (EB-2014-0274), NRG believes no new or additional notice is necessary in respect of this Application. However, if the Board requires a notice to be published, NRG confirms that NRG's notice would appear in the following publication:

Aylmer Express

NRG confirms it is a paid publication.

NRG has been advised the readership for Aylmer Express is 6,000, and circulation numbers are 6,000.

MANAGER'S SUMMARY

Price Cap Adjustment

The annual price cap adjustment is defined as the annual percentage change in the Inflation factor less an X-Factor (i.e. productivity factor and a stretch factor).

Inflation Factor

In the *Report of the Board: Rate Setting Parameters and Benchmarking under the Renewed Regulatory Framework for Ontario's Electricity Distributors*, the Board adopted a 2-factor Input Price Index ("IPI") methodology. The Board will use the year-over-year change in the GDP-IPI (FDD), and the AWE ("Average Weekly Earnings")-All Employees-Ontario, to calculate the 2-factor IPI. The percentage change will be calculated as the weighted sum of 70% of the annual percentage change in the GDP-IPI (FDD) for the prior year relative to the index value for two years prior and 30% of the annual percentage change in the AWE for the prior year relative to the data for years prior.

On October 30, 2014 the Board issued the IPI of 1.6% to be used as the inflation adjustment for rates adjusted through the price cap adjustment for rates effective in 2015.

Productivity Factor

The Board also determined that the appropriate value for the productivity factor (Industry TFP) for the price cap adjustment is zero.

Stretch Factor

The stretch factor used in previous NRG IRM applications is based on the approved agreement of parties on the stretch factor outlined in the NRG's approved Settlement Agreement for Fiscal 2011 Rates Application (Phase 2) (EB-2010-0018). On page 5 of the Settlement Agreement the following outlines the agreement on the stretch factor to be used in the price cap adjustment.

1 *With respect to the stretch factor, the Parties agree to the application of a stretch*
2 *factor that is 0.1% greater than the stretch factor applicable to mid-range electricity*
3 *distributors. Thus, until such time as the Board adjusts the stretch factors for mid-*
4 *range electricity distributors (currently 0.4%), the stretch factor utilized in NRG's IR*
5 *Plan shall be 0.5%.*

6 At the time the above settlement agreement was approved the electric distributors were
7 under 3rd generation incentive rate-setting. On October 18, 2012, the Board issued its
8 *Report of the Board: Renewed Regulatory Framework for Electricity Distributors: A*
9 *Performance-Based Approach* (the "RRFE Report"). One of the outcomes of the RRFE
10 Report was to move the electricity distributors to 4th generation incentive rate-setting.
11 Under 4th generation, the stretch factor for the mid-range electricity distributors is 0.3%.
12 When the agreed upon adder of 0.1% is applied to the revised mid-range stretch factor the
13 resulting stretch factor to be used by NRG in this Application is 0.4%.

14 Based on the above discussion, the overall price cap adjustment is as follows

15 Inflation = 1.6%

16 Productivity = 0.0%

17 Stretch = (0.4%)

18 Total = 1.2%

19 The price cap adjustment factor of 1.2% has been used in the 2014 IRM Adjustment Model
20 to determine the proposed distribution rates. For comparison purposes the following two
21 tables provides the current and proposed distribution rates.

Shared Tax Savings

The federal general corporate rate of 15% has been effect since June 30, 2012 and is not proposed to change in the 2015 fiscal year.

In addition, the provincial tax rate assumed in the 2013 IRM application is assumed not to change in this Application. The provincial tax rate for the first \$500,000 of taxable income is 4.50% and for the tax rate for the taxable income above \$500,000 is 11.5%

Based on the above, the rate riders associated with the shared tax savings are proposed to continue at the current level.

The following table outlines the proposed rate riders for shared tax savings:

Table 3 – Shared Tax Savings Rate Rider**

Description	Shared Tax Savings
Effective Until	September 30, 2015
	Per Customer Per Month
Rate Group	
RATE 1 - General Service Rate - Residential	-0.11
RATE 1 - General Service Rate - Commercial	-0.11
RATE 1 - General Service Rate - Industrial	-0.11
RATE 2 - Seasonal Service - Apr to Oct	-0.19
RATE 2 - Seasonal Service - Nov to Mar	-0.19
RATE 3 - Special Large Volume Contract Rate	-8.34
RATE 4 - General Service Peaking - Apr to Dec	-0.55
RATE 4 - General Service Peaking - Jan to Mar	-0.55
RATE 5 - Interruptible Peaking Contract Rate	-3.02
RATE 6 - Integrated Grain Processors Co-Operative Aylmer Ethanol Production Facility	-301.13

** Shortly before filing this Application, NRG discovered that the tax sharing rate rider was inadvertently discontinued as of October 1, 2014 (when NRG's rates were made interim). In order to correct this, NRG is proposing that the tax sharing rate rider be

doubled from January 1, 2015 to March 31, 2015. The rationale for this approach is three-fold: (a) NRG is proposing that rates arising from this Application be implemented on January 1, 2015; (b) the loss of the benefit of the rate rider over the three-month period from October 1 to December 31, 2014 will be made up in the subsequent three months (January 1 to March 31, 2015); and (c) the doubling of the rate rider matches the time period NRG is proposing for the Foregone Distribution Revenue (see next section, below).

Foregone Distribution Revenue

The Application has been prepared on the basis that NRG's new rates will be effective October 1, 2014 and implemented January 1, 2015. The date of October 1, 2014 is the commencement of NRG's fiscal 2015 year, and October 1st is the day on which all previous rate changes have been made by NRG under its IRM plan.

NRG is proposing an implementation date of January 1, 2015 on the assumption that approval would be received in December 2014, and in order to keep the period of foregone incremental revenue to be collected as short as possible (and thereby any revenues to be recovered via rate rider as small as possible). The price cap adjustment for fiscal 2015 is relatively small (1.2%). As a result, NRG is proposing a "Foregone Distribution Revenue" rate rider to recover incremental revenue for the period October 1, 2014 to December 31, 2014 – a period of three months. NRG proposes to recover the Foregone Distribution Revenue over a similar period of three months from January 1, 2015 to March 31, 2015. This proposal is consistent with the Board's Decision on the treatment of Foregone Distribution Revenue in the Cambridge and North Dumfries Hydro Inc. 2014 Cost of Service Application (EB-2013-0116).

For the purposes of determining the Foregone Distribution Revenue it is assumed the monthly billing determinants are equal in each month. The monthly volume is one twelve of the annual load forecast from the most recent approved cost of service application which is consistent with the method used in the Cambridge and North Dumfries Hydro Inc. 2014 Cost of Service Application. With the October to December 2014 Foregone Revenue being

collected over the January to March 2015 time period, along with the assumption that volumes are the same in each month, the calculation of the Foregone Revenue Rate Rider is simplified. For all classes, except Class 2, the proposed Foregone Revenue Rate Rider is simply the difference between the proposed and the current rates for the period October 1, 2014 to December 31, 2014.

For Class 2, the calculation of the Foregone Revenue Rate Rider is complicated by the fact that Class 2 is a seasonal class and there is a rate change on November 1st. As a result, the following outlines the calculation of the Foregone Revenue Rate Rider for this class:

	<u>cents/m3</u>
RATE 2 - Apr to Oct - Block 1 (First 1,000 m3 per month) – Proposed	15.1677
RATE 2 - Apr to Oct - Block 1 (First 1,000 m3 per month) – Current	<u>14.5236</u>
Difference (A)	0.6441
RATE 2 - Nov to Mar Block 1 (First 1,000 m3 per month) – Proposed	19.1187
RATE 2 - Nov to Mar Block 1 (First 1,000 m3 per month) – Current	<u>18.3068</u>
Difference (B)	0.8119

$$\begin{aligned} \text{Class 2 Foregone Revenue Rate Rider} &= (A \times 1 + B \times 2) / 3 \\ &= (0.6441 + 0.8119 \times 2) / 3 = 0.7559 \end{aligned}$$

The following table outlines the proposed Foregone Revenue Rate Rider
